DESCRIPTION

IJCA is an international, open access, peer-review journal, devoted to cardiologists, cardiothoracic surgeons, internists, radiologists, pulmonologists and physicians in training.

IJCA publishes case reports, clinical images, brief communications, meta-analyses, article reviews, debates and author biographies in the field of cardiovascular diseases in every March, June, September and December in online version.

EDITORIAL BOARD

Editor-in-Chief
Oktay Ergene, Cardiology, 9 Eylül University, Izmir, Turkey

Editorial Board Chair
Mehdi Zoghi, Cardiology, Ege University, Izmir, Turkey
Rida Berilgen, Dept. of Cardiology, Atakalp Heart Hospital, İzmir, Turkey
Ömer Kozan, Cardiology, 9 Eylül University, Izmir, Turkey

Associate Editors
Antonello Gavazzi, Cardiovascular Department, Riuniti Hospital, Bergamo, Italy
Elif Sade, Cardiology, Baskent University, Ankara, Turkey
Birhan Yılmaz, Cardiology, Cumhuriyet University, Sivas, Turkey
Bülent Görenek, Cardiology, Osmangazi University, Eskişehir, Turkey
Cemil Izgi, Cardiovascular Magnetic Resonance Unit, Royal Brompton Hospital, London, UK
Nurcan Arat, Cardiology, Florence Nightingale Hospital, Istanbul, Turkey
Bariş Ökcün, Cardiology Institute, Istanbul University, Istanbul, Turkey
Hasan Güngör, Cardiology, Adnan Menderes University, Aydın, Turkey
Bülent Boyaci, Cardiology, Gazi University, Ankara, Turkey
Murat Biteker, Cardiology, Mugla Sitki Kocman University, Mugla, Turkey
Uğur Canpolat, Cardiology, Hacettepe University, Ankara, Turkey
Tevfik Ecder, Nephrology, Istanbul Bilim University Faculty of Medicine, Istanbul, Turkey
Raimund Erbel, Cardiology, West-German Heart and Vascular Center Essen, Essen, Germany
Matsatsugu Hori, Osaka Medical Center for Cancer and Cardiovascular Disease, Osaka, Japan
Firdovsi Ibrahimov, Department of Cardiology, Central Clinic Hospital, Baku, Azerbaijan
Nazmi Narin, Pediatric Cardiology, Erciyes Universities, Kayseri, Turkey
İlgin Karaca, Cardiology, Firat University, Elazığ, Turkey
Ümit Yüksek, Dept. of Cardiology, Ödems State Hospital, Izmir, Turkey
İbrahim Oğuz Karaca, Cardiology, Medipol University, Istanbul, Turkey
Sasko Kedev, University Clinic of Cardiology, Skopje, Macedonia
Lale Dinç Asarcıklı, Cardiology, Dişkapi Yıldırım Beyazit Education and Research Hospital, Ankara, Turkey
Güliz Kozdağ, Cardiology, Florida, USA
Enver Roshi, Faculty of Public Health, University of Tirana, Tirana, Albania
Babak Sharif-Kasahi, Cardiology, Shahid Beheshti University of Medical Sciences, Izmir, Turkey
Selahattin Kıyani, Emergency Medicine, Ege University, Izmir, Turkey
Massimo Santini, Cardiology, San Filippo Neri Hospital, Rome, Italy
Gianfranco Sinagra, Cardiovascular Department, Ospedali Riuniti and University of Trieste, Trieste, Italy
Bambang Budi Siswanto, Cardiology, University of Indonesia, Jakarta, Indonesia
Cheuk-Man Yu, Cardiology, Prince of Wales Hospital, Sha Tin, Hong Kong, China

Statistics Consultant
Vildan Mevsim, Department of Public Health, Dokuz Eylül University, Izmir, Turkey

Language Consultant
Dina Kouveliotes
GUIDE FOR AUTHORS

INTRODUCTION
"International Journal of Cardiovascular Academy (IJCAC)" is an international, open access, peer-review journal, devoted to cardiologists, cardiothoracic surgeons, internists, radiologists, pulmonologists and physicians in training. IJCAC publishes case reports, clinical images, brief communications, meta-analyses, article reviews, debates and author biographies in the field of cardiovascular diseases in every March, June, September and December in both print and online versions. IJCAC is included as part of Science Direct electronic service and all articles published in the journal are sited in Science Direct. Accepted papers are published within 3 months of acceptance. The papers will only be accepted for publication if they are of a high scientific standard, written in English, submitted in accordance with the Journal's instructions to authors and consistent with the aims and scope.

Types of article
Contributions falling into the following categories will be considered for publication: Case Reports, Clinical images, Brief Communications, Article Reviews, Meta-analysis, Debates, Author biography and Announcements.

Case Reports
Case reports should describe a new disease, or confirmation of a rare disease; a new insight into pathogenesis, etiology, diagnosis, or treatment; or a new finding associated with a currently known cardiovascular disease. Case report should include a title page, an abstract and introduction, followed by the case report and discussion. The length should ordinarily be 1,500 words maximum, with no more than 3 figures and 10 references.

Clinical images
Original clinical diagnostic and therapeutic images are considered for publication. The images must be accompanied by a brief history and dissection followed by a conclusion. IJCAC does not publish video case studies.

Brief Communications
A brief communication is a short research articles intended to present results of original fundamental research in the field of cardiovascular diseases. Text must not exceed 3000 words (not including abstract, tables, figures and references), 3 figures/tables in total and 30 references. An abstract of 250 words or less should be included with no subdivision of text into sections. Authors should state that subjects have given their informed consent and that the study protocol has been approved by the institute's research committee. The type of statistical analysis used must be stated together with the commercial software. The statistical analysis should define the probability values and prove that the differences reported were found to be statistically significant.

Article Reviews
Reviews should aim to summarize and evaluate research critically in the field and to identify future implications. There will be a maximum of three reviews per issue. It is expected that the authors of review articles are experts in the related field. The length of the review article is within the discretion of the author however should be in reasonable limits with no more than 5 figures, tables and 50 references. The Editor-in-Chief can be consulted regarding reviews of unusual length.

Meta-analysis
A meta-analysis is a quantitative synthesis of the results, critical assessments of literature and data sources within maximum 3000 words of text, total of 5 tables and/or figures and 50 references.

Debates
Controversial issues or topics in cardiovascular medicine are discussed by invited experts in Debates as the format of a general introduction from the proposer and opposer, followed by a constructive critique of each other's point of view and any concluding remarks.

Author biography
Each submission should include a short biography.
Announcements are also published in IJCAC.

Please ensure that you select the appropriate article type from the list of options when making your submission. Authors contributing to special issues should ensure that they select the special issue article type from this list.

**Submission checklist**

You can use this list to carry out a final check of your submission before you send it to the journal for review. Please check the relevant section in this Guide for Authors for more details.

**Ensure that the following items are present:**

One author has been designated as the corresponding author with contact details:
- E-mail address
- Full postal address

All necessary files have been uploaded:

*Manuscript:*
- Include keywords
- All figures (include relevant captions)
- All tables (including titles, description, footnotes)
- Ensure all figure and table citations in the text match the files provided
- Indicate clearly if color should be used for any figures in print

*Graphical Abstracts / Highlights files* (where applicable)

*Supplemental files* (where applicable)

Further considerations
- Manuscript has been ‘spell checked’ and ‘grammar checked’
- All references mentioned in the Reference List are cited in the text, and vice versa
- Permission has been obtained for use of copyrighted material from other sources (including the Internet)
- A competing interests statement is provided, even if the authors have no competing interests to declare
- Journal policies detailed in this guide have been reviewed
- Referee suggestions and contact details provided, based on journal requirements

For further information, visit our [Support Center](https://www.elsevier.com/support).

**BEFORE YOU BEGIN**

**Ethics in publishing**

*Policy and Ethics:* Please see our information pages on [Ethics in publishing](https://www.elsevier.com/ethics) and [Ethical guidelines for journal publication](https://www.elsevier.com/ethics).

*Human and Animal Rights:* If the work involves the use of human subjects, the author should ensure that the work described has been carried out in accordance with [The Code of Ethics of the World Medical Association (Declaration of Helsinki)](https://www.wma.net/en/30publications/10policies/b3/) for experiments involving humans; [Uniform Requirements for manuscripts submitted to Biomedical journals](https://www.ncbi.nlm.nih.gov/pmc/articles/PMC5620163/). Authors should include a statement in the manuscript that informed consent was obtained for experimentation with human subjects. The privacy rights of human subjects must always be observed.

All animal experiments should comply with the [ARRIVE guidelines](https://arriveguidelines.org/) and should be carried out in accordance with the U.K. [Animals (Scientific Procedures) Act, 1986](https://www.gov.uk/government/publications/animals-spa) and associated guidelines, [EU Directive 2010/63/EU for animal experiments](https://ec.europa.eu/environment/animal-welfare/initiative_28965_en.html), or the [National Institutes of Health guide for the care and use of Laboratory animals (NIH Publications No. 8023, revised 1978)](https://www.niehs.nih.gov/research/resources/ogawguideline/docs/) and the authors should clearly indicate in the manuscript that such guidelines have been followed.
Declaration of interest
All authors must disclose any financial and personal relationships with other people or organizations that could inappropriately influence (bias) their work. Examples of potential conflicts of interest include employment, consultancies, stock ownership, honoraria, paid expert testimony, patent applications/registrations, and grants or other funding. If there are no conflicts of interest then please state this: 'Conflicts of interest: none'. More information.

Submission declaration and verification
Submission of an article implies that the work described has not been published previously (except in the form of an abstract or as part of a published lecture or academic thesis or as an electronic preprint, see 'Multiple, redundant or concurrent publication' section of our ethics policy for more information), that it is not under consideration for publication elsewhere, that its publication is approved by all authors and tacitly or explicitly by the responsible authorities where the work was carried out, and that, if accepted, it will not be published elsewhere in the same form, in English or in any other language, including electronically without the written consent of the copyright-holder. To verify originality, your article may be checked by the originality detection service CrossCheck.

Changes to authorship
Authors are expected to consider carefully the list and order of authors before submitting their manuscript and provide the definitive list of authors at the time of the original submission. Any addition, deletion or rearrangement of author names in the authorship list should be made only before the manuscript has been accepted and only if approved by the journal Editor. To request such a change, the Editor must receive the following from the corresponding author: (a) the reason for the change in author list and (b) written confirmation (e-mail, letter) from all authors that they agree with the addition, removal or rearrangement. In the case of addition or removal of authors, this includes confirmation from the author being added or removed.

Only in exceptional circumstances will the Editor consider the addition, deletion or rearrangement of authors after the manuscript has been accepted. While the Editor considers the request, publication of the manuscript will be suspended. If the manuscript has already been published in an online issue, any requests approved by the Editor will result in a corrigendum.

Elsevier supports responsible sharing
Find out how you can share your research published in Elsevier journals.

Role of the funding source
You are requested to identify who provided financial support for the conduct of the research and/or preparation of the article and to briefly describe the role of the sponsor(s), if any, in study design; in the collection, analysis and interpretation of data; in the writing of the report; and in the decision to submit the article for publication. If the funding source(s) had no such involvement then this should be stated.

OPEN ACCESS

Open Access This journal is a peer reviewed, subsidized open access journal where The Society of Cardiovascular Academy pays the OA fee. Authors do not have to pay any open access publication fee. Peer review under the responsibility of The Society of Cardiovascular Academy.

Elsevier Publishing Campus
The Elsevier Publishing Campus (www.publishingcampus.com) is an online platform offering free lectures, interactive training and professional advice to support you in publishing your research. The College of Skills training offers modules on how to prepare, write and structure your article and explains how editors will look at your paper when it is submitted for publication. Use these resources, and more, to ensure that your submission will be the best that you can make it.

Language (usage and editing services)
Please write your text in good English (American or British usage is accepted, but not a mixture of these). Authors who feel their English language manuscript may require editing to eliminate possible grammatical or spelling errors and to conform to correct scientific English may wish to use the English Language Editing service available from Elsevier's WebShop.

Submission
Submission to this journal proceeds totally online. Use the following guidelines to prepare your article. Via the homepage of this journal (http://www.evise.com/evise/faces/pages/navigation/NavController.jspx?JRNL_ACR=IJCAC) you will
be guided stepwise through the creation and uploading of the various files. The system automatically converts source files to a single Adobe Acrobat PDF version of the article, which is used in the peer-review process. Please note that even though manuscript source files are converted to PDF at submission for the review process, these source files are needed for further processing after acceptance. All correspondence, including notification of the Editor's decision and requests for revision, takes place by e-mail and via the author's homepage, removing the need for a hard-copy paper trail. If you are unable to provide an electronic version, please contact the editorial office prior to submission [e-mail: mehdi.zoghi@ege.edu.tr; Telephone: +90(232)3905454; or Fax: +90 232 3903287].

The corresponding author takes primary responsibility for the article during submission and review process. Submission of an article commits that the work has not been published elsewhere before and it is approved by all authors. The submitted article, if accepted, will not be published in the same form in any other languages without written consent of the publisher.

**PREPARATION**

**Peer review**

This journal operates a double blind review process. All contributions are typically sent to a minimum of two independent expert reviewers to assess the scientific quality of the paper. The Editor is responsible for the final decision regarding acceptance or rejection of articles. The Editor's decision is final. More information on types of peer review.

**Use of word processing software**

It is important that the file be saved in the native format of the word processor used. The text should be in single-column format. Keep the layout of the text as simple as possible. Most formatting codes will be removed and replaced on processing the article. In particular, do not use the word processor's options to justify text or to hyphenate words. However, do use bold face, italics, subscripts, superscripts etc. When preparing tables, if you are using a table grid, use only one grid for each individual table and not a grid for each row. If no grid is used, use tabs, not spaces, to align columns. The electronic text should be prepared in a way very similar to that of conventional manuscripts (see also the Guide to Publishing with Elsevier). Note that source files of figures, tables and text graphics will be required whether or not you embed your figures in the text. See also the section on Electronic artwork.

To avoid unnecessary errors you are strongly advised to use the 'spell-check' and 'grammar-check' functions of your word processor.

**Article structure**

**Subdivision - numbered sections**

Divide your article into clearly defined and numbered sections. Subsections should be numbered 1.1 (then 1.1.1, 1.1.2, ...), 1.2, etc. (the abstract is not included in section numbering). Use this numbering also for internal cross-referencing: do not just refer to 'the text'. Any subsection may be given a brief heading. Each heading should appear on its own separate line.

**Introduction**

State the objectives of the work and provide an adequate background, avoiding a detailed literature survey or a summary of the results.

**Material and methods**

Provide sufficient detail to allow the work to be reproduced. Methods already published should be indicated by a reference: only relevant modifications should be described.

**Theory/calculation**

A Theory section should extend, not repeat, the background to the article already dealt with in the Introduction and lay the foundation for further work. In contrast, a Calculation section represents a practical development from a theoretical basis.

**Results**

Results should be clear and concise.

**Discussion**

This should explore the significance of the results of the work, not repeat them. A combined Results and Discussion section is often appropriate. Avoid extensive citations and discussion of published literature.
Conclusions
The main conclusions of the study may be presented in a short Conclusions section, which may stand alone or form a subsection of a Discussion or Results and Discussion section.

Appendices
If there is more than one appendix, they should be identified as A, B, etc. Formulae and equations in appendices should be given separate numbering: Eq. (A.1), Eq. (A.2), etc.; in a subsequent appendix, Eq. (B.1) and so on. Similarly for tables and figures: Table A.1; Fig. A.1, etc.

Essential title page information
• Title. Concise and informative. Titles are often used in information-retrieval systems. Avoid abbreviations and formulae where possible.
• Author names and affiliations. Please clearly indicate the given name(s) and family name(s) of each author and check that all names are accurately spelled. Present the authors’ affiliation addresses (where the actual work was done) below the names. Indicate all affiliations with a lower-case superscript letter immediately after the author's name and in front of the appropriate address. Provide the full postal address of each affiliation, including the country name and, if available, the e-mail address of each author.
• Corresponding author. Clearly indicate who will handle correspondence at all stages of refereeing and publication, also post-publication. Ensure that the e-mail address is given and that contact details are kept up to date by the corresponding author.
• Present/permanent address. If an author has moved since the work described in the article was done, or was visiting at the time, a 'Present address' (or 'Permanent address') may be indicated as a footnote to that author's name. The address at which the author actually did the work must be retained as the main, affiliation address. Superscript Arabic numerals are used for such footnotes.

Abstract
A concise and factual abstract is required. The abstract should state briefly the purpose of the research, the principal results and major conclusions. An abstract is often presented separately from the article, so it must be able to stand alone. For this reason, References should be avoided, but if essential, then cite the author(s) and year(s). Also, non-standard or uncommon abbreviations should be avoided, but if essential they must be defined at their first mention in the abstract itself.

Keywords
Authors are invited to submit three to ten keywords associated with their paper.

Abbreviations
Define abbreviations that are not standard in this field in a footnote to be placed on the first page of the article. Such abbreviations that are unavoidable in the abstract must be defined at their first mention there, as well as in the footnote. Ensure consistency of abbreviations throughout the article.

Acknowledgements
Collate acknowledgements in a separate section at the end of the article before the references and do not, therefore, include them on the title page, as a footnote to the title or otherwise. List here those individuals who provided help during the research (e.g., providing language help, writing assistance or proof reading the article, etc.).

Formatting of funding sources
List funding sources in this standard way to facilitate compliance to funder's requirements:

Funding: This work was supported by the National Institutes of Health [grant numbers xxxx, yyyy]; the Bill & Melinda Gates Foundation, Seattle, WA [grant number zzzz]; and the United States Institutes of Peace [grant number aaaa].

It is not necessary to include detailed descriptions on the program or type of grants and awards. When funding is from a block grant or other resources available to a university, college, or other research institution, submit the name of the institute or organization that provided the funding.

If no funding has been provided for the research, please include the following sentence:

This research did not receive any specific grant from funding agencies in the public, commercial, or not-for-profit sectors.
Nomenclature and units
Follow internationally accepted rules and conventions: use the international system of units (SI). If other quantities are mentioned, give their equivalent in SI. Authors wishing to present a table of nomenclature should do so on the second page of their manuscript.

Math formulae
Present simple formulae in the line of normal text where possible and use the solidus (/) instead of a horizontal line for small fractional terms, e.g., X/Y. In principle, variables are to be presented in italics. Powers of e are often more conveniently denoted by exp. Number consecutively any equations that have to be displayed separately from the text (if referred to explicitly in the text).

Footnotes
Footnotes should be used sparingly. Number them consecutively throughout the article. Many word processors can build footnotes into the text, and this feature may be used. Otherwise, please indicate the position of footnotes in the text and list the footnotes themselves separately at the end of the article. Do not include footnotes in the Reference list.

Artwork
Electronic artwork
General points
• Make sure you use uniform lettering and sizing of your original artwork.
• Embed the used fonts if the application provides that option.
• Aim to use the following fonts in your illustrations: Arial, Courier, Times New Roman, Symbol, or use fonts that look similar.
• Number the illustrations according to their sequence in the text.
• Use a logical naming convention for your artwork files.
• Provide captions to illustrations separately.
• Size the illustrations close to the desired dimensions of the published version.
• Submit each illustration as a separate file.
A detailed guide on electronic artwork is available.
You are urged to visit this site; some excerpts from the detailed information are given here.
Formats
If your electronic artwork is created in a Microsoft Office application (Word, PowerPoint, Excel) then please supply 'as is' in the native document format. Regardless of the application used other than Microsoft Office, when your electronic artwork is finalized, please 'Save as' or convert the images to one of the following formats (note the resolution requirements for line drawings, halftones, and line/halftone combinations given below):
EPS (or PDF): Vector drawings, embed all used fonts.
TIFF (or JPEG): Color or grayscale photographs (halftones), keep to a minimum of 300 dpi.
TIFF (or JPEG): Bitmapped (pure black & white pixels) line drawings, keep to a minimum of 1000 dpi.
TIFF (or JPEG): Combinations bitmapped line/half-tone (color or grayscale), keep to a minimum of 500 dpi.
Please do not:
• Supply files that are optimized for screen use (e.g., GIF, BMP, PICT, WPG); these typically have a low number of pixels and limited set of colors;
• Supply files that are too low in resolution;
• Submit graphics that are disproportionately large for the content.

Color artwork
Please make sure that artwork files are in an acceptable format (TIFF, EPS or MS Office files) and with the correct resolution. If, together with your accepted article, you submit usable color figures then Elsevier will ensure, at no additional charge, that these figures will appear in color on the Web (e.g., ScienceDirect and other sites) regardless of whether or not these illustrations are reproduced in color in the printed version
Figure captions
Ensure that each illustration has a caption. Supply captions separately, not attached to the figure. A caption should comprise a brief title (not on the figure itself) and a description of the illustration. Keep text in the illustrations themselves to a minimum but explain all symbols and abbreviations used.

References
Citation in text
Please ensure that every reference cited in the text is also present in the reference list (and vice versa). Any references cited in the abstract must be given in full. Unpublished results and personal communications are not recommended in the reference list, but may be mentioned in the text. If these references are included in the reference list they should follow the standard reference style of the journal and should include a substitution of the publication date with either "Unpublished results" or "Personal communication" Citation of a reference as "in press" implies that the item has been accepted for publication.

**Web references**

As a minimum, the full URL should be given and the date when the reference was last accessed. Any further information, if known (DOI, author names, dates, reference to a source publication, etc.), should also be given. Web references can be listed separately (e.g., after the reference list) under a different heading if desired, or can be included in the reference list.

**References in a special issue**

Please ensure that the words 'this issue' are added to any references in the list (and any citations in the text) to other articles in the same Special Issue.

**Reference management software**

This journal has standard templates available in key reference management packages EndNote ( http://www.endnote.com/support/enstyles.asp) and Reference Manager ( http://refman.com/support/rmstyles.asp). Using plug-ins to wordprocessing packages, authors only need to select the appropriate journal template when preparing their article and the list of references and citations to these will be formatted according to the journal style which is described below.

**Reference style**

Significant references should solely be included. References must be indicated by number(s) in square brackets in line with the text. All references must be typed out at the end of the article on a new page. Index Medicus abbreviations of periodical names should be used. Author(s), title, journal, year, volume, issue, and first and last page numbers must be provided for each periodical article; if an article has more than six authors, list the first three and add 'et al.' (see example below).

**Journal abbreviations source**

Journal names should be abbreviated according to Journal names should be abbreviated according to Index Medicus journal abbreviations: http://www.nlm.nih.gov/tsd/serials/lji.html

**AFTER ACCEPTANCE**

**Online proof correction**

Corresponding authors will receive an e-mail with a link to our online proofing system, allowing annotation and correction of proofs online. The environment is similar to MS Word: in addition to editing text, you can also comment on figures/tables and answer questions from the Copy Editor. Web-based proofing provides a faster and less error-prone process by allowing you to directly type your corrections, eliminating the potential introduction of errors.

If preferred, you can still choose to annotate and upload your edits on the PDF version. All instructions for proofing will be given in the e-mail we send to authors, including alternative methods to the online version and PDF.
We will do everything possible to get your article published quickly and accurately. Please use this proof only for checking the typesetting, editing, completeness and correctness of the text, tables and figures. Significant changes to the article as accepted for publication will only be considered at this stage with permission from the Editor. It is important to ensure that all corrections are sent back to us in one communication. Please check carefully before replying, as inclusion of any subsequent corrections cannot be guaranteed. Proofreading is solely your responsibility.

**Offprints**

The corresponding author, at no cost, will be provided with a PDF file of the article via e-mail (the PDF file is a watermarked version of the published article and includes a cover sheet with the journal cover image and a disclaimer outlining the terms and conditions of use). For an extra charge, paper offprints can be ordered via the offprint order form which is sent once the article is accepted for publication. Both corresponding and co-authors may order offprints at any time via Elsevier's WebShop. Authors requiring printed copies of multiple articles may use Elsevier WebShop's 'Create Your Own Book' service to collate multiple articles within a single cover.

**AUTHOR INQUIRIES**

Visit the Elsevier Support Center to find the answers you need. Here you will find everything from Frequently Asked Questions to ways to get in touch.

You can also check the status of your submitted article or find out when your accepted article will be published.
