DESCRIPTION

An official publication of the Anatomical Society of India.

*Journal of the Anatomical Society of India* (JASI) is the official peer-reviewed journal of the Anatomical Society of India.

The aim of the journal is to enhance and upgrade the research work in the field of anatomy and allied clinical subjects. It provides an integrative forum for anatomists across the globe to exchange their knowledge and views. It also helps to promote communication among fellow academicians and researchers worldwide. It provides an opportunity to academicians to disseminate their knowledge that is directly relevant to all domains of health sciences. It covers content on Gross Anatomy, Neuroanatomy, Imaging Anatomy, Developmental Anatomy, Histology, Clinical Anatomy, Medical Education, Morphology, and Genetics.

JASI is the leading impact factor journal from Southeast Asia. It publishes original articles, review articles, case reports, and letter to the editor.

The editorial board comprises of academicians across the globe. The journal is indexed in Scopus and MedIND. **Benefits to authors**

We also provide many author benefits, such as free PDFs, special discounts on Elsevier publications and much more. Please click here for more information on our author services. Please see our Guide for Authors for information on article submission. If you require any further information or help, please visit our support pages: http://help.elsevier.com/app/answers/list/p/8045

GUIDE FOR AUTHORS

INTRODUCTION

The aim of the Journal of the Anatomical Society of India is to enhance and upgrade the research work in the field of anatomy and allied clinical subjects. It provides an integrative forum for anatomists across the globe to exchange their knowledge and views. It also helps to promote communication among fellow academicians and researchers worldwide. The Journal is devoted to publish recent original research work and recent advances in the field of Anatomical Sciences and allied clinical subjects. It provides an opportunity to academicians to disseminate their knowledge that is directly relevant to all domains of health sciences.

The Journal of the Anatomical Society of India (JASI) is the official, peer-reviewed publication of the Anatomical Society of India (ASI). The journal is published twice a year in June and December by Elsevier, a division of Reed Elsevier India Pvt. Ltd. It is indexed in Science citation Index Expanded, 'Web of Science'. It is circulated to all the members of ASI and subscribers.

Journal of the Anatomical Society of India commits to publish original scientific papers and review articles on all aspects of Anatomy and allied subjects which contribute in understanding development, morphology, histology, evolution and function through a broad range of anatomical approach. It also accepts case reports, book reviews and journal scans for publication. Proceedings of annual meetings and structured abstracts of research papers presented during the annual conference of anatomical society of India will be published in journal on-line only.

The author/authors will have to pay INR 500 as processing fee at the time of submitting the manuscript. On acceptance of a paper for publication, author will have to pay INR 500 for each black and white photograph, INR 1000 for each colored photograph and INR 500 for each table, graph and drawn figures. If the total amount of the invoice is less than INR 2500, it will be considered rounded off to the same.

The amount can be transferred to the Editor’s account. Name: Editor JASI, SB A/c no: 612102010006692, IFSC code: UBIN0561215, MICR code: 110026101, Swift code: UBININBBGHA.

The amount may also be sent through an account payee bank draft/banker’s cheque drawn in favor of Editor JASI, payable at Ghaziabad only for Union Bank of India, Pratap Vihar, Ghaziabad. All outstation cheques/drafts must include INR 70 as bank collection charges. The draft/cheque may be send to Dr Ruchira Sethi, Joint Editor, JASI, J-41 Patel Nagar I, Ghaziabad, UP-201001.

Categories of Articles

General: Type the manuscript (using ‘Times New Roman’ font, size 10) in single space throughout. Please arrange the manuscript as follows: Title page, Abstract, Introduction, Methods, Results, Discussion, and References. Number all pages consecutively, beginning with the title page. Figures and Tables must be referred to in the manuscript. Consult a recent issue of the Journal for details. Only the Title page should bear the names and addresses of the author(s).

The following categories of articles are accepted by the Journal of the Anatomical Society of India.

Original Research Article: Original, in-depth clinical research that represents new and significant contributions to anatomical and medical science. The entire manuscript should not exceed 3000 words, excluding tables and should have maximum of 40 references. The number of authors should not exceed five, including the corresponding author.

Review Articles: These are comprehensive review articles on topics related to various fields of Anatomy. The entire manuscript should not exceed 7000 words with no more than 50 references and two authors. Following types of articles can be submitted under this category:
• Newer techniques of dissection and histology
• New methodology in Medical Education
• Review of a current concept
Please note that generally review articles are by invitation only. But unsolicited review articles will be considered for publication on merit basis.

**Case Report:** Brief observations during dissection, osteological or histological studies and clinical reports of special interest with a teaching angle. Manuscript should be limited to 1200 words with maximum 2 illustrations and 15 references. The number of authors should not exceed three.

**Letter to the Editor:** These letters are related to any unsolicited, new information of immense academic interest or an article published in the journal within the preceding 20 weeks. A letter must not exceed 500 words, should not have more than 3 authors and 5 references. There should be no tables or figures. Authors of the original article cited in the letter are invited to reply.

**Interesting Photograph:** These are unsolicited photographs, not necessarily related to the mandate of the Journal, published as space fillers. There are no restrictions on subject matter, but photographs of familiar people are generally not published. A digital picture of 300 dpi or higher resolution in TIFF, EPS, and JPEG format needs to be submitted.

**Book Review:** This consists of a critical appraisal of selected books on Anatomy. Potential authors or publishers may submit books, as well as a list of suggested reviewers, to the editorial office. The author/publisher has to pay INR 3500 per book review.

**Calendar of Conferences:** Information regarding important meetings and courses to be conducted in the future are published in each issue. Course directors/organizers are advised to send full information about educational events to the Editor-in-chief. Course directors/organizers, apart from those of JASI, have to pay INR 2500 for information of each event.

**Contact details for submission**
If assistance is required by the authors, please refer to the tutorials for authors and/or customer support that are available on the EVISE website; you may also contact the Editorial Office. Please do not post, fax or e-mail your manuscripts to the Editorial Office.

**BEFORE YOU BEGIN**

**Ethics in publishing**
Please see our information pages on Ethics in publishing and Ethical guidelines for journal publication.

**Studies in humans and animals**
If the work involves the use of human subjects, the author should ensure that the work described has been carried out in accordance with The Code of Ethics of the World Medical Association (Declaration of Helsinki) for experiments involving humans. The manuscript should be in line with the Recommendations for the Conduct, Reporting, Editing and Publication of Scholarly Work in Medical Journals and aim for the inclusion of representative human populations (sex, age and ethnicity) as per those recommendations. The terms sex and gender should be used correctly.

Authors should include a statement in the manuscript that informed consent was obtained for experimentation with human subjects. The privacy rights of human subjects must always be observed.

All animal experiments should comply with the ARRIVE guidelines and should be carried out in accordance with the U.K. Animals (Scientific Procedures) Act, 1986 and associated guidelines, EU Directive 2010/63/EU for animal experiments, or the National Institutes of Health guide for the care and use of Laboratory animals (NIH Publications No. 8023, revised 1978) and the authors should clearly indicate in the manuscript that such guidelines have been followed. The sex of animals must be indicated, and where appropriate, the influence (or association) of sex on the results of the study.
CONFLICT_OF_INTEREST

JASI follows the ICMJE recommendations regarding conflict of interest disclosures. All authors are required to report the following information with each submission: (1) All third-party financial support for the work in the submitted manuscript. (2) All financial relationships with any entities that could be viewed as relevant to the general area of the submitted manuscript. (3) All sources of revenue with relevance to the submitted work who made payments to you, or to your institution on your behalf, in the 36 months prior to submission. (4) Any other interactions with the sponsor of outside of the submitted work should also be reported. (5) Any relevant patents or copyrights (planned, pending, or issued). (6) Any other relationships or affiliations that may be perceived by readers to have influenced, or give the appearance of potentially influencing, what you wrote in the submitted work. As a general guideline, it is usually better to disclose a relationship than not. This information will be acknowledged at publication in a Transparency Document link directly in the article. Additional information on the ICMJE recommendations can be found at: http://www.icmje.org/. The form for conflict of interest disclosure can be downloaded here: http://www.icmje.org/coi_disclosure.pdf (if this link does not display properly in your browser, please right-click the link and select "Save Target As..." or "Save Link as..." from the pop-up menu).

Submission declaration and verification

Submission of an article implies that the work described has not been published previously (except in the form of an abstract, a published lecture or academic thesis, see 'Multiple, redundant or concurrent publication' for more information), that it is not under consideration for publication elsewhere, that its publication is approved by all authors and tacitly or explicitly by the responsible authorities where the work was carried out, and that, if accepted, it will not be published elsewhere in the same form, in English or in any other language, including electronically without the written consent of the copyright-holder. To verify originality, your article may be checked by the originality detection service Crossref Similarity Check.

Use of inclusive language

Inclusive language acknowledges diversity, conveys respect to all people, is sensitive to differences, and promotes equal opportunities. Articles should make no assumptions about the beliefs or commitments of any reader, should contain nothing which might imply that one individual is superior to another on the grounds of race, sex, culture or any other characteristic, and should use inclusive language throughout. Authors should ensure that writing is free from bias, for instance by using 'he or she', 'his/her' instead of 'he' or 'his', and by making use of job titles that are free of stereotyping (e.g. 'chairperson' instead of 'chairman' and 'flight attendant' instead of 'stewardess').

Authorship

All authors should have made substantial contributions to all of the following: (1) the conception and design of the study, or acquisition of data, or analysis and interpretation of data, (2) drafting the article or revising it critically for important intellectual content, (3) final approval of the version to be submitted.

Changes to authorship

Authors are expected to consider carefully the list and order of authors before submitting their manuscript and provide the definitive list of authors at the time of the original submission. Any addition, deletion or rearrangement of author names in the authorship list should be made only before the manuscript has been accepted and only if approved by the journal Editor. To request such a change, the Editor must receive the following from the corresponding author: (a) the reason for the change in author list and (b) written confirmation (e-mail, letter) from all authors that they agree with the addition, removal or rearrangement. In the case of addition or removal of authors, this includes confirmation from the author being added or removed. Only in exceptional circumstances will the Editor consider the addition, deletion or rearrangement of authors after the manuscript has been accepted. While the Editor considers the request, publication of the manuscript will be suspended. If the manuscript has already been published in an online issue, any requests approved by the Editor will result in a corrigendum.

Reporting clinical trials

Randomized controlled trials should be presented according to the CONSORT guidelines. At manuscript submission, authors must provide the CONSORT checklist accompanied by a flow diagram that illustrates the progress of patients through the trial, including recruitment, enrollment, randomization, withdrawal and completion, and a detailed description of the randomization procedure. The CONSORT checklist and template flow diagram are available online.
Copyright
Upon acceptance of an article, authors will be asked to complete a 'Journal Publishing Agreement' (for more information on this and copyright see http://www.elsevier.com/copyright). Acceptance of the agreement will ensure the widest possible dissemination of information. An e-mail will be sent to the corresponding author confirming receipt of the manuscript together with a 'Journal Publishing Agreement' form or a link to the online version of this agreement.
Subscribers may reproduce tables of contents or prepare lists of articles including abstracts for internal circulation within their institutions. Permission of the Publisher is required for resale or distribution outside the institution and for all other derivative works, including compilations and translations (please consult http://www.elsevier.com/permissions). If excerpts from other copyrighted works are included, the author(s) must obtain written permission from the copyright owners and credit the source(s) in the article. Elsevier has preprinted forms for use by authors in these cases: please consult http://www.elsevier.com/permissions

Copyright
Upon acceptance of an article, authors will be asked to complete a 'Journal Publishing Agreement' (see more information on this). An e-mail will be sent to the corresponding author confirming receipt of the manuscript together with a 'Journal Publishing Agreement' form or a link to the online version of this agreement.

Subscribers may reproduce tables of contents or prepare lists of articles including abstracts for internal circulation within their institutions. Permission of the Publisher is required for resale or distribution outside the institution and for all other derivative works, including compilations and translations. If excerpts from other copyrighted works are included, the author(s) must obtain written permission from the copyright owners and credit the source(s) in the article. Elsevier has preprinted forms for use by authors in these cases.

For gold open access articles: Upon acceptance of an article, authors will be asked to complete an 'Exclusive License Agreement' (more information). Permitted third party reuse of gold open access articles is determined by the author's choice of user license.

Author rights
As an author you (or your employer or institution) have certain rights to reuse your work. More information.

Elsevier supports responsible sharing
Find out how you can share your research published in Elsevier journals.

Role of the funding source
You are requested to identify who provided financial support for the conduct of the research and/or preparation of the article and to briefly describe the role of the sponsor(s), if any, in study design; in the collection, analysis and interpretation of data; in the writing of the report; and in the decision to submit the article for publication. If the funding source(s) had no such involvement then this should be stated.

Funding body agreements and policies
Elsevier has established a number of agreements with funding bodies which allow authors to comply with their funder's open access policies. Some funding bodies will reimburse the author for the gold open access publication fee. Details of existing agreements are available online.

Open access
This journal offers authors a choice in publishing their research:

Subscription
• Articles are made available to subscribers as well as developing countries and patient groups through our universal access programs.
• No open access publication fee payable by authors.
• The Author is entitled to post the accepted manuscript in their institution's repository and make this public after an embargo period (known as green Open Access). The published journal article cannot be shared publicly, for example on ResearchGate or Academia.edu, to ensure the sustainability of peer-reviewed research in journal publications. The embargo period for this journal can be found below.

Gold open access
• Articles are freely available to both subscribers and the wider public with permitted reuse.
• A gold open access publication fee is payable by authors or on their behalf, e.g. by their research funder or institution.

Regardless of how you choose to publish your article, the journal will apply the same peer review criteria and acceptance standards.

For gold open access articles, permitted third party (re)use is defined by the following Creative Commons user licenses:

Creative Commons Attribution-NonCommercial-NoDerivs (CC BY-NC-ND)
For non-commercial purposes, lets others distribute and copy the article, and to include in a collective work (such as an anthology), as long as they credit the author(s) and provided they do not alter or modify the article.

OPEN_ACCESS_FEE
The gold open access publication fee for this journal is $3000, excluding taxes. Learn more about Elsevier's pricing policy.

Green open access
Authors can share their research in a variety of different ways and Elsevier has a number of green open access options available. We recommend authors see our green open access page for further information. Authors can also self-archive their manuscripts immediately and enable public access from their institution’s repository after an embargo period. This is the version that has been accepted for publication and which typically includes author-incorporated changes suggested during submission, peer review and in editor-author communications. Embargo period: For subscription articles, an appropriate amount of time is needed for journals to deliver value to subscribing customers before an article becomes freely available to the public. This is the embargo period and it begins from the date the article is formally published online in its final and fully citable form. Find out more.
This journal has an embargo period of 12 months.

Language (usage and editing services)
Please write your text in good English (American or British usage is accepted, but not a mixture of these). Authors who feel their English language manuscript may require editing to eliminate possible grammatical or spelling errors and to conform to correct scientific English may wish to use the English Language Editing service available from Elsevier's WebShop.

Informed consent and patient details
Studies on patients or volunteers require ethics committee approval and informed consent, which should be documented in the paper. Appropriate consents, permissions and releases must be obtained where an author wishes to include case details or other personal information or images of patients and any other individuals in an Elsevier publication. Written consents must be retained by the author but copies should not be provided to the journal. Only if specifically requested by the journal in exceptional circumstances (for example if a legal issue arises) the author must provide copies of the consents or evidence that such consents have been obtained. For more information, please review the Elsevier Policy on the Use of Images or Personal Information of Patients or other Individuals. Unless you have written permission from the patient (or, where applicable, the next of kin), the personal details of any patient included in any part of the article and in any supplementary materials (including all illustrations and videos) must be removed before submission.

Submission
Our online submission system guides you stepwise through the process of entering your article details and uploading your files. Editable article files (e.g., Word, LaTeX) are mandatory to use in the peer-review process and typeset your article for final publication. All correspondence, including notification of the Editor's decision and requests for revision, is sent by e-mail.

The Journal of the Anatomical Society of India (JASI) accepts online submissions in electronic format. All new manuscripts must be submitted through Journal of the Anatomical Society of India online submission and review Website (https://www.evise.com/profile/api/navigate/JASI). Please refer to the following steps to submit your manuscript online:

1. Open the homepage of the Journal’s Website at https://www.evise.com/profile/api/navigate/JASI
2. Register yourself for free by clicking on register on the top and create a user profile with a desired "Username" (preferably use your email-id) and mandatory details. On submission of the information, you will receive an e-mail confirming your registration along with the “Password”.

3. Click “Log In” on the main navigation menu at the top of the journal screen to open the login page.

4. Enter your username and password in the appropriate fields (e-mailed to you at the time of registration). You can update your password by selecting the "change details" option on the menu bar at the top of the page. While changing the password, please ensure the password is minimum 8 characters ling, with a combination of both capital and small letters, and a number, eg. "Shweta99" - it is suggested that you use your name as password.

5. Click "Author Log in", this takes you to the “Author Main Menu”.

By submitting a manuscript online, the author agrees to the following:
1. The work is original and free from plagiarism.
2. It has not been submitted for publication/is not under consideration for publication at another Journal.
3. All authors are aware of the order of authorship. The submitting author shall be solely responsible in case disputes arise.
4. Once published, copyright of manuscript shall stand transferred to the Journal.
5. ‘Conflict of interest’ if any, must be explicitly stated at the end of the manuscript.

Submit your article
Please submit your article via https://www.evise.com/profile/api/navigate/JASI.

PREPARATION

Covering letter
The covering letter should explain any deviation from the standard IMRAD (Introduction, Methods, Results, and Discussion) format and should outline the importance and uniqueness of the work. It should include the signed declaration from all authors on:
1. The category of manuscript (original research, review articles, case reports etc.
2. Statement that the material has not been previously published or submitted elsewhere for publication (This restriction does not apply to abstracts published in connection with scientific meetings.) 3. Transfer of copyright to the Journal of the Anatomical Society of India upon the acceptance of the manuscript for publication
4. All authors have reviewed the article and agree with its contents
5. Information of any conflicts of interest (of any) of the authors
6. Sources of research support, if any, including funding, equipment, and drugs

The covering letter should also include the mailing address, telephone and fax numbers, and e-mail address of the corresponding author.

Manuscript preparation
The manuscripts should comply with the following guidelines.

Title page (Page 1) should contain:
• Title and keywords of the article along with the running title
• Brief structured abstract (as Introduction, Methods, Results, and Discussion) of the article (mandatory for Original articles, abstracts for review articles and case reports may not be structured)
• Name(s) of author(s), their academic qualifications and current affiliations (E.g.: Complete name, Department, Name of the Institute, City, State, Country)
• Name, mailing and e-mail addresses of the corresponding author
• Acknowledgement of financial support, if any.

The title represents the subject matter of the manuscript. A subtitle can be added if necessary. The title should be brief and comprehensive. A structured abstract (i.e., an abstract with distinct labeled sections e.g. Introduction, methods, results, discussion; for rapid comprehension) not more than 250 words in length, should be provided with 3-5 keywords. Keywords should be the listed terms in the medical subject’s headings (MeSH) of the Index Medicus, to help in easy indexing.

The manuscript should be well organized and written in simple and correct English under appropriate headings. Preferably, no statement should be supported by more than three references. The Introduction should address the subject of the paper. The Materials and Methods section should
describe in adequate detail the laboratory or study methods followed and state the statistical procedures employed in the research. This section should also identify the ethical guidelines followed by the investigators with regard to the population, patient samples or animal specimens used. The Results section should be concise and include pertinent findings and necessary tables and figures. The Discussion should contain conclusions based on the major findings of the study, a review of the relevant literature, clinical application of the conclusions and future research implications. Following the Discussion, Acknowledgments of important contributors and funding agencies may be given. The editorial office must receive written, signed consent from each contributor recognized in the Acknowledgements because the statement can imply endorsement of data and conclusions.

Peer review
This journal operates a double blind review process. All contributions will be initially assessed by the editor for suitability for the journal. Papers deemed suitable are then typically sent to a minimum of two independent expert reviewers to assess the scientific quality of the paper. The Editor is responsible for the final decision regarding acceptance or rejection of articles. The Editor's decision is final. More information on types of peer review.

Double-blind review
This journal uses double-blind review, which means the identities of the authors are concealed from the reviewers, and vice versa. More information is available on our website. To facilitate this, please include the following separately:
Title page (with author details): This should include the title, authors' names, affiliations, acknowledgements and any Declaration of Interest statement, and a complete address for the corresponding author including an e-mail address.
Blinded manuscript (no author details): The main body of the paper (including the references, figures, tables and any acknowledgements) should not include any identifying information, such as the authors' names or affiliations.

Article structure
Subdivision - numbered sections
Divide your article into clearly defined and numbered sections. Subsections should be numbered 1.1 (then 1.1.1, 1.1.2, ...), 1.2, etc. (the abstract is not included in section numbering). Use this numbering also for internal cross-referencing: do not just refer to 'the text'. Any subsection may be given a brief heading. Each heading should appear on its own separate line.

Introduction
State the objectives of the work and provide an adequate background, avoiding a detailed literature survey or a summary of the results.

Material and methods
Provide sufficient details to allow the work to be reproduced by an independent researcher. Methods that are already published should be summarized, and indicated by a reference. If quoting directly from a previously published method, use quotation marks and also cite the source. Any modifications to existing methods should also be described.

Theory/calculation
A Theory section should extend, not repeat, the background to the article already dealt with in the Introduction and lay the foundation for further work. In contrast, a Calculation section represents a practical development from a theoretical basis.

Results
Results should be clear and concise.

Discussion
This should explore the significance of the results of the work, not repeat them. A combined Results and Discussion section is often appropriate. Avoid extensive citations and discussion of published literature.

Conclusions
The main conclusions of the study may be presented in a short Conclusions section, which may stand alone or form a subsection of a Discussion or Results and Discussion section.
Appendices
If there is more than one appendix, they should be identified as A, B, etc. Formulae and equations in appendices should be given separate numbering: Eq. (A.1), Eq. (A.2), etc.; in a subsequent appendix, Eq. (B.1) and so on. Similarly for tables and figures: Table A.1; Fig. A.1, etc.

Essential title page information
• Title. Concise and informative. Titles are often used in information-retrieval systems. Avoid abbreviations and formulae where possible.
• Author names and affiliations. Please clearly indicate the given name(s) and family name(s) of each author and check that all names are accurately spelled. You can add your name between parentheses in your own script behind the English transliteration. Present the authors' affiliation addresses (where the actual work was done) below the names. Indicate all affiliations with a lowercase superscript letter immediately after the author's name and in front of the appropriate address. Provide the full postal address of each affiliation, including the country name and, if available, the e-mail address of each author.
• Corresponding author. Clearly indicate who will handle correspondence at all stages of refereeing and publication, also post-publication. This responsibility includes answering any future queries about Methodology and Materials. Ensure that the e-mail address is given and that contact details are kept up to date by the corresponding author.
• Present/permanent address. If an author has moved since the work described in the article was done, or was visiting at the time, a 'Present address' (or 'Permanent address') may be indicated as a footnote to that author's name. The address at which the author actually did the work must be retained as the main, affiliation address. Superscript Arabic numerals are used for such footnotes.

Abstract
A concise and factual abstract is required. The abstract should state briefly the purpose of the research, the principal results and major conclusions. An abstract is often presented separately from the article, so it must be able to stand alone. For this reason, References should be avoided, but if essential, then cite the author(s) and year(s). Also, non-standard or uncommon abbreviations should be avoided, but if essential they must be defined at their first mention in the abstract itself.

Keywords
Immediately after the abstract, provide a minimum of 3 keywords to maximum of 12 keywords, using American spelling and avoiding general and plural terms and multiple concepts (avoid, for example, 'and', 'of'). Be sparing with abbreviations: only abbreviations firmly established in the field may be eligible. These keywords will be used for indexing purposes.

Abbreviations
Define abbreviations that are not standard in this field in a footnote to be placed on the first page of the article. Such abbreviations that are unavoidable in the abstract must be defined at their first mention there, as well as in the footnote. Ensure consistency of abbreviations throughout the article.

Acknowledgements
Collate acknowledgements in a separate section at the end of the article before the references and do not, therefore, include them on the title page, as a footnote to the title or otherwise. List here those individuals who provided help during the research (e.g., providing language help, writing assistance or proof reading the article, etc.).

Formatting of funding sources
List funding sources in this standard way to facilitate compliance to funder's requirements:

Funding: This work was supported by the National Institutes of Health [grant numbers xxxx, yyyy]; the Bill & Melinda Gates Foundation, Seattle, WA [grant number zzzz]; and the United States Institutes of Peace [grant number aaaa].

It is not necessary to include detailed descriptions on the program or type of grants and awards. When funding is from a block grant or other resources available to a university, college, or other research institution, submit the name of the institute or organization that provided the funding.

If no funding has been provided for the research, please include the following sentence:

This research did not receive any specific grant from funding agencies in the public, commercial, or not-for-profit sectors.
Units
Follow internationally accepted rules and conventions: use the international system of units (SI). If other units are mentioned, please give their equivalent in SI.

Units of measurement should be given in conventional units. All bio-clinical measurements should be given in conventional units, with Systeme International d'unites (SI) units given in parenthesis. Generic rather than trade names of drugs should be used.

Artwork
Figures and graphics
1. For graphics, a digital picture of 300 dpi or higher resolution in TIFF, EPS, and JPEG format should be submitted.
2. Figures should be in Arabic numerals, consecutively according to the order in which they have been first cited in the text, if there is more than 1 figure. Each figure should be cited in the text.
3. Each figure/illustration should be provided with a suitable legend that includes enough information to permit its interpretation without reference to the text.
4. All photomicrographs should indicate the magnification of the prints.
5. When symbols, arrows, numbers or letters are used to identify parts of the illustrations, each one should be explained clearly in the legend.

Electronic artwork
General points
• Make sure you use uniform lettering and sizing of your original artwork.
• Embed the used fonts if the application provides that option.
• Aim to use the following fonts in your illustrations: Arial, Courier, Times New Roman, Symbol, or use fonts that look similar.
• Number the illustrations according to their sequence in the text.
• Use a logical naming convention for your artwork files.
• Provide captions to illustrations separately.
• Size the illustrations close to the desired dimensions of the published version.
• Submit each illustration as a separate file.
A detailed guide on electronic artwork is available.
You are urged to visit this site; some excerpts from the detailed information are given here.

Formats
If your electronic artwork is created in a Microsoft Office application (Word, PowerPoint, Excel) then please supply ‘as is’ in the native document format.
Regardless of the application used other than Microsoft Office, when your electronic artwork is finalized, please ‘Save as’ or convert the images to one of the following formats (note the resolution requirements for line drawings, halftones, and line/halftone combinations given below):
EPS (or PDF): Vector drawings, embed all used fonts.
TIFF (or JPEG): Color or grayscale photographs (halftones), keep to a minimum of 300 dpi.
TIFF (or JPEG): Bitmapped (pure black & white pixels) line drawings, keep to a minimum of 1000 dpi.
TIFF (or JPEG): Combinations bitmapped line/half-tone (color or grayscale), keep to a minimum of 500 dpi.
Please do not:
• Supply files that are optimized for screen use (e.g., GIF, BMP, PICT, WPG); these typically have a low number of pixels and limited set of colors;
• Supply files that are too low in resolution;
• Submit graphics that are disproportionately large for the content.

Color artwork
Please make sure that artwork files are in an acceptable format (TIFF (or JPEG), EPS (or PDF) or MS Office files) and with the correct resolution. If, together with your accepted article, you submit usable color figures then Elsevier will ensure, at no additional charge, that these figures will appear in color online (e.g., ScienceDirect and other sites) in addition to color reproduction in print. Further information on the preparation of electronic artwork.

Figure captions
Ensure that each illustration has a caption. Supply captions separately, not attached to the figure. A caption should comprise a brief title (not on the figure itself) and a description of the illustration. Keep text in the illustrations themselves to a minimum but explain all symbols and abbreviations used.
Tables
Please submit tables as editable text and not as images. Tables can be placed either next to the relevant text in the article, or on separate page(s) at the end. Number tables consecutively in accordance with their appearance in the text and place any table notes below the table body. Be sparing in the use of tables and ensure that the data presented in them do not duplicate results described elsewhere in the article. Please avoid using vertical rules and shading in table cells.

1. Number tables in the order of their find it citation in the text. Each table should be cited in the text in Arabic numerals.
2. Titles should be brief and a short or abbreviated heading for each column should be given. Explanatory matter should be placed in footnotes and not in the heading.
3. Abbreviations in each table should be explained in footnotes.
4. The data presented in a table should not be repeated in the text or figure.

References
The authors are responsible for the accuracy and completeness of the references and their citations in the text.

1. References should be numbered consecutively in the order in which they are first mentioned in the text.
2. References in text, tables and legends should be identified by superscript Arabic numerals at the end of the sentence outside any punctuation. If several different studies or papers are cited within one sentence, the number should be placed where it will accurately identify the correct study.
3. The names of authors in the text should concur with the reference list.
4. References cited only in tables or in legends to figures should be numbered in accordance with a sequence established by the first identification in the text of the particular table or illustration.
5. Abstracts as references may be used; "unpublished observations" and "personal communications" may not be used as references, although references to written, not oral, communications may be inserted (in parentheses) in the text.
6. Papers accepted but not yet published may be included as references by adding "In press" after the journal name. Information from manuscripts submitted but not yet accepted should be cited in the text as "unpublished observations" (in parentheses).
7. In general: • All authors/editors should be listed unless the number exceeds three, when you should give three followed by "et al." • Full page number for first page and as many digits as are changed for final page need to be mentioned.

Example

For more details and examples of correct forms of references, please refer to ICMJE guidelines sheet at http://www.nlm.nih.gov/bsd/uniform_requirements.html.

Editorial Process
Journal of the Anatomical Society of India commits to high ethical and scientific standards. Submitted manuscripts are considered with the understanding that they have not been published previously in print or electronic format (except in abstract or poster form) and are not under consideration by another publication or electronic medium.

Statements and opinions expressed in the articles published in the Journal are those of the authors and not necessarily of the Editor. Neither the Editor nor the Publisher guarantees, warrants, or endorses any product or service advertised in the Journal.

Submitted manuscripts are reviewed by two or more referees along with a section editor to determine whether an article is suitable for publication in IHJ based on their scientific merit, originality, validity of the material presented and readability. Decision about provisional or final acceptance is communicated within 8-12 weeks.
Data references
This journal encourages you to cite underlying or relevant datasets in your manuscript by citing them in your text and including a data reference in your Reference List. Data references should include the following elements: author name(s), dataset title, data repository, version (where available), year, and global persistent identifier. Add [dataset] immediately before the reference so we can properly identify it as a data reference. The [dataset] identifier will not appear in your published article.

Supplementary material
Supplementary material such as applications, images and sound clips, can be published with your article to enhance it. Submitted supplementary items are published exactly as they are received (Excel or PowerPoint files will appear as such online). Please submit your material together with the article and supply a concise, descriptive caption for each supplementary file. If you wish to make changes to supplementary material during any stage of the process, please make sure to provide an updated file. Do not annotate any corrections on a previous version. Please switch off the 'Track Changes' option in Microsoft Office files as these will appear in the published version.

Research data
This journal encourages and enables you to share data that supports your research publication where appropriate, and enables you to interlink the data with your published articles. Research data refers to the results of observations or experimentation that validate research findings. To facilitate reproducibility and data reuse, this journal also encourages you to share your software, code, models, algorithms, protocols, methods and other useful materials related to the project.

Below are a number of ways in which you can associate data with your article or make a statement about the availability of your data when submitting your manuscript. If you are sharing data in one of these ways, you are encouraged to cite the data in your manuscript and reference list. Please refer to the "References" section for more information about data citation. For more information on depositing, sharing and using research data and other relevant research materials, visit the research data page.

Data linking
If you have made your research data available in a data repository, you can link your article directly to the dataset. Elsevier collaborates with a number of repositories to link articles on ScienceDirect with relevant repositories, giving readers access to underlying data that gives them a better understanding of the research described.

There are different ways to link your datasets to your article. When available, you can directly link your dataset to your article by providing the relevant information in the submission system. For more information, visit the database linking page.

For supported data repositories a repository banner will automatically appear next to your published article on ScienceDirect.

In addition, you can link to relevant data or entities through identifiers within the text of your manuscript, using the following format: Database: xxxx (e.g., TAIR: AT1G01020; CCDC: 734053; PDB: 1XFN).

Mendeley Data
This journal supports Mendeley Data, enabling you to deposit any research data (including raw and processed data, video, code, software, algorithms, protocols, and methods) associated with your manuscript in a free-to-use, open access repository. During the submission process, after uploading your manuscript, you will have the opportunity to upload your relevant datasets directly to Mendeley Data. The datasets will be listed and directly accessible to readers next to your published article online.

For more information, visit the Mendeley Data for journals page.

Data statement
To foster transparency, we encourage you to state the availability of your data in your submission. This may be a requirement of your funding body or institution. If your data is unavailable to access or unsuitable to post, you will have the opportunity to indicate why during the submission process, for example by stating that the research data is confidential. The statement will appear with your published article on ScienceDirect. For more information, visit the Data Statement page.
**Submission Checklist**

- Cover letter.
- Manuscript with supported documents (Single-journal submission affirmation, copyright assignment and declaration form).
- Informed patient consent statement (if applicable)/Institutional Ethical Committee approval.
- Funding agency’s role in data interpretation.

In addition to above, the author should submit:

1. A hard copy, with original photographs
2. A soft copy, a CD compatible with MS Word 2003-07 to the editor(Dr Vishram Singh, Professor & HOD Department of Anatomy, Santosh Medical College, Pratap Vihar, Ghaziabad-201009 NCR-Delhi)

**AFTER ACCEPTANCE**

**Online proof correction**

Corresponding authors will receive an e-mail with a link to our online proofing system, allowing annotation and correction of proofs online. The environment is similar to MS Word: in addition to editing text, you can also comment on figures/tables and answer questions from the Copy Editor. Web-based proofing provides a faster and less error-prone process by allowing you to directly type your corrections, eliminating the potential introduction of errors.

If preferred, you can still choose to annotate and upload your edits on the PDF version. All instructions for proofing will be given in the e-mail we send to authors, including alternative methods to the online version and PDF.

We will do everything possible to get your article published quickly and accurately. Please use this proof only for checking the typesetting, editing, completeness and correctness of the text, tables and figures. Significant changes to the article as accepted for publication will only be considered at this stage with permission from the Editor. It is important to ensure that all corrections are sent back to us in one communication. Please check carefully before replying, as inclusion of any subsequent corrections cannot be guaranteed. Proofreading is solely your responsibility.

**Offprints**

The corresponding author will, at no cost, receive a customized [Share Link] providing 50 days free access to the final published version of the article on ScienceDirect. The Share Link can be used for sharing the article via any communication channel, including email and social media. For an extra charge, paper offprints can be ordered via the offprint order form which is sent once the article is accepted for publication. Both corresponding and co-authors may order offprints at any time via Elsevier’s [Webshop]. Corresponding authors who have published their article gold open access do not receive a Share Link as their final published version of the article is available open access on ScienceDirect and can be shared through the article DOI link.

**AUTHOR INQUIRIES**

Visit the [Elsevier Support Center] to find the answers you need. Here you will find everything from Frequently Asked Questions to ways to get in touch.

You can also check the status of your submitted article or find out when your accepted article will be published.
