DESCRIPTION

The journal is devoted to fields mentioned in Mathematical Subjects Classification (M S C). To bring together original research thereby providing a forum for active researchers in the mentioned fields and workers in more general areas. Topics covered include all fields stated in the MSC code. Journal of the Egyptian Mathematical Society (JOEMS) is a journal of mathematical sciences publishing refereed, well-written original research articles that describe the latest research and developments in the areas of pure and applied mathematics. This is a broad-based journal covering all branches of mathematics and interdisciplinary research. To bring together original research thereby providing a forum for active researchers in mathematics and workers in more applied areas. To be acceptable for publication in the journal, papers must make significant, original and correct contributions to one or more of the fields mentioned in Mathematical Subjects Classification (M.S.C.). Applied Mathematics accepted papers should be clearly motivated by actual or potential application to real phenomena. JOEMS accepts papers through peer review by professional colleagues in the relevant fields. Unless clearly below the standard required by the journal, submitted articles will be sent to referees. They will generally be reviewed by at least two experts with the aim of reaching a decision as soon as possible. Where possible, the final decision is made on the basis that the referees are in accordance with one another. When there is a strong disagreement between referees, advice is sought from a member of the journal’s Editorial Board.

For queries related to the journal, please contact asobada@yahoo.com

EDITORIAL BOARD

Editor-in-Chief
A.S.F. Obada, Fac. of Science, Dept. of Mathematics, Al-Azhar University, Giza, Egypt

Co-Editor-in-Chief
M. Asaad, Dept. of Mathematics, Cairo University, Giza, Egypt

Associate Editors
M. M. A. Ahmed, Fac. of Science, Dept. of Mathematics, Al-Azhar University, Giza, Egypt
A. Ballester-Bolinches, Dept. of Algebra, Universitat de València, València, Spain
H.M. Barakat, Fac. of Science, Zagazig University, Sharkeya, Egypt
M. Bohner, Dept. of Mathematics and Statistics, Missouri University of Science and Technology, Rolla, Missouri, USA
E.H. Doha, Dept. of Mathematics, Fac. of Science, Cairo University, Giza, Egypt
A.M. El-Sayed, Faculty of Science, Alexandria University, Alexandria, Egypt
A. Facchini, Dept. of Mathematics, University of Padova, Padova, Italy
M.A. Helal, Dept. of Science, Fac. of Science, Cairo University, Giza, Egypt
S. Jafari, University College Sjælland, Sore, Denmark
M.S. Moslehian, Dept. of Mathematics, Ferdowsi University of Mashhad, Mashhad, Iran
S.H. Saker, Fac. of Science, Dept. of Mathematics, Mansoura University, Mansoura, Egypt
C. Tunc, Department of Mathematics, Faculty of Sciences, Yüzüncü Yıl Universitesi, Van, Turkey

Managing Editor
M. Abdel Aty, Sohag, Egypt

Editors
N.A. Abdel-All, Fac. of Sciences, Dept. of Mathematics, Assiut University, Assiut, Egypt
M. Ahsanullah, Information Systems and Supply Chain Management, Rider University, Lawrenceville, New Jersey, USA
N.M. Allam, Fac. of Science, Dept. of Mathematics, Mansoura University, Mansoura, Egypt
J. Andres, Fac. of Science, Dept. of Mathematical Analysis and Applications of Mathematics, Palacky University, Olomouc, Czech Republic
A. Biswas, Dept. of Applied Mathematics and Theoretical Physics, College of Mathematics, Natural Sciences and Technology, Delaware State University, Dover, Delaware, USA
G. Dimitrios, Dept. of Mathematics, University of Patras, Patras, Greece
M. Elhamdadi, Dept. of Mathematics and Statistics, University of South Florida, Tampa, Florida, USA
M.F. El-Sabbagh, Faculty Of Science, Dept. of Mathematics, Minia University, Minia, Egypt
M.H. Fahmy, Dept. of Mathematics, Fac. of Science, Cairo University, Giza, Egypt
J. Fleckinger, Institut de Mathématiques de Toulouse CNRS UMR 5219, Université de Toulouse, Toulouse, France
M. Fontana, Dept. of Mathematics and Physics, Università di Roma Tre, Roma, Italy
A.F. Ghaleb, Dept. of Mathematics, Fac. of Science, Cairo University, Giza, Egypt
F. Ghaleb, Dept. of Mathematics, Fac. of Science, Ain Shams University, Cairo, Egypt
M. Guedda, LAMFA UMR CNRS 6140, Université de Picardie Jules Verne, Amiens, France
T. Hayat, Dept. of Mathematics, Quaid-i-Azam University, Islamabad, Pakistan
A. Kandil, Fac. of Science, Dept. of Mathematics, Al-Azhar University, Giza, Egypt
M. Kirane, Lab. of mathetics, University of La Rochelle, La Rochelle, France
S.V. Lapin, Mordovian State University, Saransk, Russian Federation
G.M. Mahmoud, Fac. of Sciences, Dept. of Mathematics, Assiut University, Assiut, Egypt
M.A. Noor, COMSATS Institute of Information Technology (CIIT), Islamabad, Pakistan
A.S. Okb El-Bab, Fac. of Science, Dept. of Mathematics, Al-Azhar University, Giza, Egypt
S.E.D. S. Hussein, Dept. of Mathematics, Fac. of Science, Ain Shams University, Cairo, Egypt
R.M. Salem, Fac. of Science, Dept. of Mathematics, Al-Azhar University, Giza, Egypt
A.N. Skiba, Francisck Skorina Gomel State University, Gomel, Belarus
I.M. Stancu-Minasian, Institute of Mathematical Statistics and Applied Mathematics, Romanian Academy, Bucharest, Romania
J. Stasheff, Dept. of Mathematics, University of North Carolina at Chapel Hill, Chapel Hill, North Carolina, USA
I.P. Stavroulakis, Dept. of Mathematics, University of Ioannina, Ioannina, Greece
N. Sweilam, Faculty of Science, Deptartment of Mathematics, Cairo University, Giza, Egypt
J.J. Trujillo, Dept. of Mathematical Analysis, Universidad de La Laguna, La Laguna Tenerife, Spain
Y. Yayli, Fac. of Sciences, Dept. of Mathematics, Ankara University, Ankara, Turkey
H. Yehia, Fac. of Science, Dept. of Mathematics, Mansoura University, Mansoura, Egypt
K. Zimmermann, Fac. of Mathematics and Physics, Charles University, Prague, Czech Republic
BEFORE YOU BEGIN

*Ethics in publishing*
Please see our information pages on *Ethics in publishing* and *Ethical guidelines for journal publication*.

*Declaration of interest*
All authors must disclose any financial and personal relationships with other people or organizations that could inappropriately influence (bias) their work. Examples of potential conflicts of interest include employment, consultancies, stock ownership, honoraria, paid expert testimony, patent applications/registrations, and grants or other funding. If there are no conflicts of interest then please state this: 'Conflicts of interest: none'. [More information.]

*Submission declaration and verification*
Submission of an article implies that the work described has not been published previously (except in the form of an abstract or as part of a published lecture or academic thesis or as an electronic preprint, see 'Multiple, redundant or concurrent publication' section of our ethics policy for more information), that it is not under consideration for publication elsewhere, that its publication is approved by all authors and tacitly or explicitly by the responsible authorities where the work was carried out, and that, if accepted, it will not be published elsewhere in the same form, in English or in any other language, including electronically without the written consent of the copyright-holder. To verify originality, your article may be checked by the originality detection service CrossCheck.

*Clinical trial results*
In line with the position of the International Committee of Medical Journal Editors, the journal will not consider results posted in the same clinical trials registry in which primary registration resides to be prior publication if the results posted are presented in the form of a brief structured (less than 500 words) abstract or table. However, divulging results in other circumstances (e.g., investors' meetings) is discouraged and may jeopardise consideration of the manuscript. Authors should fully disclose all posting in registries of results of the same or closely related work.

*Copyright*
Upon acceptance of an article, authors will be asked to complete an 'Exclusive License Agreement' (see [more information on this](#)). Permitted third party reuse of open access articles is determined by the author's choice of [user license](#).

*Author rights*
As an author you (or your employer or institution) have certain rights to reuse your work. [More information.]

*Elsevier supports responsible sharing*
Find out how you can [share your research](#) published in Elsevier journals.

*Funding body agreements and policies*
Elsevier has established a number of agreements with funding bodies which allow authors to comply with their funder's open access policies. Some funding bodies will reimburse the author for the [Open Access Publication Fee](#). Details of [existing agreements](#) are available online. After acceptance, open access papers will be published under a noncommercial license. For authors requiring a commercial CC BY license, you can apply after your manuscript is accepted for publication.

*Open access*
Every peer-reviewed research article appearing in this journal will be published open access. This means that the article is universally and freely accessible via the internet in perpetuity, in an easily readable format immediately after publication. The author does not have any publication charges for open access. The Journal of the Egyptian Mathematical Society will pay to make the article open access.

A CC user license manages the reuse of the article (see [http://www.elsevier.com/openaccesslicenses](http://www.elsevier.com/openaccesslicenses)). All articles will be published under the following license:

*Creative Commons Attribution-NonCommercial-NoDerivs (CC BY-NC-ND)*
For non-commercial purposes, let others distribute and copy the article, and to include in a collective work (such as an anthology), as long as they credit the author(s) and provided they do not alter or modify the article.
Elsevier Publishing Campus
The Elsevier Publishing Campus (www.publishingcampus.com) is an online platform offering free lectures, interactive training and professional advice to support you in publishing your research. The College of Skills training offers modules on how to prepare, write and structure your article and explains how editors will look at your paper when it is submitted for publication. Use these resources, and more, to ensure that your submission will be the best that you can make it.

Language (usage and editing services)
Please write your text in good English (American or British usage is accepted, but not a mixture of these). Authors who feel their English language manuscript may require editing to eliminate possible grammatical or spelling errors and to conform to correct scientific English may wish to use the English Language Editing service available from Elsevier's WebShop.

Submission
Our online submission system guides you stepwise through the process of entering your article details and uploading your files. The system converts your article files to a single PDF file used in the peer-review process. Editable files (e.g., Word, LaTeX) are required to typeset your article for final publication. All correspondence, including notification of the Editor's decision and requests for revision, is sent by e-mail.

Referees
Please submit the names and institutional e-mail addresses of several potential referees. For more details, visit our Support site. Note that the editor retains the sole right to decide whether or not the suggested reviewers are used.

PREPARATION
Figures and tables embedded in text
Please ensure the figures and the tables included in the single file are placed next to the relevant text in the manuscript, rather than at the bottom or the top of the file. The corresponding caption should be placed directly below the figure or table.

Peer review
This journal operates a single blind review process. All contributions will be initially assessed by the editor for suitability for the journal. Papers deemed suitable are then typically sent to a minimum of two independent expert reviewers to assess the scientific quality of the paper. The Editor is responsible for the final decision regarding acceptance or rejection of articles. The Editor's decision is final. More information on types of peer review.

Use of word processing software
It is important that the file be saved in the native format of the word processor used. The text should be in single-column format. Keep the layout of the text as simple as possible. Most formatting codes will be removed and replaced on processing the article. In particular, do not use the word processor's options to justify text or to hyphenate words. However, do use bold face, italics, subscripts, superscripts etc. When preparing tables, if you are using a table grid, use only one grid for each individual table and not a grid for each row. If no grid is used, use tabs, not spaces, to align columns. The electronic text should be prepared in a way very similar to that of conventional manuscripts (see also the Guide to Publishing with Elsevier). Note that source files of figures, tables and text graphics will be required whether or not you embed your figures in the text. See also the section on Electronic artwork.
To avoid unnecessary errors you are strongly advised to use the 'spell-check' and 'grammar-check' functions of your word processor.

Article structure
Introduction
State the objectives of the work and provide an adequate background, avoiding a detailed literature survey or a summary of the results.

Material and methods
Provide sufficient detail to allow the work to be reproduced. Methods already published should be indicated by a reference: only relevant modifications should be described.
Theory/calculation
A Theory section should extend, not repeat, the background to the article already dealt with in the Introduction and lay the foundation for further work. In contrast, a Calculation section represents a practical development from a theoretical basis.

Results
Results should be clear and concise.

Discussion
This should explore the significance of the results of the work, not repeat them. A combined Results and Discussion section is often appropriate. Avoid extensive citations and discussion of published literature.

Conclusions
The main conclusions of the study may be presented in a short Conclusions section, which may stand alone or form a subsection of a Discussion or Results and Discussion section.

Appendices
If there is more than one appendix, they should be identified as A, B, etc. Formulae and equations in appendices should be given separate numbering: Eq. (A.1), Eq. (A.2), etc.; in a subsequent appendix, Eq. (B.1) and so on. Similarly for tables and figures: Table A.1; Fig. A.1, etc.

Essential title page information
• Title. Concise and informative. Titles are often used in information-retrieval systems. Avoid abbreviations and formulae where possible.
• Author names and affiliations. Please clearly indicate the given name(s) and family name(s) of each author and check that all names are accurately spelled. Present the authors’ affiliation addresses (where the actual work was done) below the names. Indicate all affiliations with a lowercase superscript letter immediately after the author’s name and in front of the appropriate address. Provide the full postal address of each affiliation, including the country name and, if available, the e-mail address of each author.
• Corresponding author. Clearly indicate who will handle correspondence at all stages of refereeing and publication, also post-publication. Ensure that the e-mail address is given and that contact details are kept up to date by the corresponding author.
• Present/permanent address. If an author has moved since the work described in the article was done, or was visiting at the time, a 'Present address' (or 'Permanent address') may be indicated as a footnote to that author’s name. The address at which the author actually did the work must be retained as the main, affiliation address. Superscript Arabic numerals are used for such footnotes.

Abstract
A concise and factual abstract is required. The abstract should state briefly the purpose of the research, the principal results and major conclusions. An abstract is often presented separately from the article, so it must be able to stand alone. For this reason, References should be avoided, but if essential, then cite the author(s) and year(s). Also, non-standard or uncommon abbreviations should be avoided, but if essential they must be defined at their first mention in the abstract itself.

Keywords
Immediately after the abstract, provide a maximum of 6 keywords, using American spelling and avoiding general and plural terms and multiple concepts (avoid, for example, 'and', 'of'). Be sparing with abbreviations: only abbreviations firmly established in the field may be eligible. These keywords will be used for indexing purposes.

Abbreviations
Define abbreviations that are not standard in this field in a footnote to be placed on the first page of the article. Such abbreviations that are unavoidable in the abstract must be defined at their first mention there, as well as in the footnote. Ensure consistency of abbreviations throughout the article.

Acknowledgements
Collate acknowledgements in a separate section at the end of the article before the references and do not, therefore, include them on the title page, as a footnote to the title or otherwise. List here those individuals who provided help during the research (e.g., providing language help, writing assistance or proof reading the article, etc.).
**Math formulae**
Please submit math equations as editable text and not as images. Present simple formulae in line with normal text where possible and use the solidus (/) instead of a horizontal line for small fractional terms, e.g., X/Y. In principle, variables are to be presented in italics. Powers of e are often more conveniently denoted by exp. Number consecutively any equations that have to be displayed separately from the text (if referred to explicitly in the text).

**Footnotes**
Footnotes should be used sparingly. Number them consecutively throughout the article. Many word processors can build footnotes into the text, and this feature may be used. Otherwise, please indicate the position of footnotes in the text and list the footnotes themselves separately at the end of the article. Do not include footnotes in the Reference list.

**Artwork**

**Electronic artwork**

**General points**
- Make sure you use uniform lettering and sizing of your original artwork.
- Embed the used fonts if the application provides that option.
- Aim to use the following fonts in your illustrations: Arial, Courier, Times New Roman, Symbol, or use fonts that look similar.
- Number the illustrations according to their sequence in the text.
- Use a logical naming convention for your artwork files.
- Provide captions to illustrations separately.
- Size the illustrations close to the desired dimensions of the published version.
- Submit each illustration as a separate file.

A detailed guide on electronic artwork is available. You are urged to visit this site; some excerpts from the detailed information are given here.

**Formats**
If your electronic artwork is created in a Microsoft Office application (Word, PowerPoint, Excel) then please supply 'as is' in the native document format.
Regardless of the application used other than Microsoft Office, when your electronic artwork is finalized, please 'Save as' or convert the images to one of the following formats (note the resolution requirements for line drawings, halftones, and line/halftone combinations given below):
- EPS (or PDF): Vector drawings, embed all used fonts.
- TIFF (or JPEG): Color or grayscale photographs (halftones), keep to a minimum of 300 dpi.
- TIFF (or JPEG): Bitmapped (pure black & white pixels) line drawings, keep to a minimum of 1000 dpi.
- TIFF (or JPEG): Combinations bitmapped line/half-tone (color or grayscale), keep to a minimum of 500 dpi.

**Please do not:**
- Supply files that are optimized for screen use (e.g., GIF, BMP, PICT, WPG); these typically have a low number of pixels and limited set of colors;
- Supply files that are too low in resolution;
- Submit graphics that are disproportionately large for the content.

**Color artwork**
Please make sure that artwork files are in an acceptable format (TIFF (or JPEG), EPS (or PDF) or MS Office files) and with the correct resolution. If, together with your accepted article, you submit usable color figures then Elsevier will ensure, at no additional charge, that these figures will appear in color online (e.g., ScienceDirect and other sites) in addition to color reproduction in print. Further information on the preparation of electronic artwork.

**Figure captions**
Ensure that each illustration has a caption. Supply captions separately, not attached to the figure. A caption should comprise a brief title (not on the figure itself) and a description of the illustration. Keep text in the illustrations themselves to a minimum but explain all symbols and abbreviations used.

**Tables**
Please submit tables as editable text and not as images. Tables can be placed either next to the relevant text in the article, or on separate page(s) at the end. Number tables consecutively in accordance with their appearance in the text and place any table notes below the table body. Be sparing in the use of tables and ensure that the data presented in them do not duplicate results described elsewhere in the article. Please avoid using vertical rules and shading in table cells.
References

Citation in text
Please ensure that every reference cited in the text is also present in the reference list (and vice versa). Any references cited in the abstract must be given in full. Unpublished results and personal communications are not recommended in the reference list, but may be mentioned in the text. If these references are included in the reference list they should follow the standard reference style of the journal and should include a substitution of the publication date with either 'Unpublished results' or 'Personal communication'. Citation of a reference as 'in press' implies that the item has been accepted for publication.

Web references
As a minimum, the full URL should be given and the date when the reference was last accessed. Any further information, if known (DOI, author names, dates, reference to a source publication, etc.), should also be given. Web references can be listed separately (e.g., after the reference list) under a different heading if desired, or can be included in the reference list.

References in a special issue
Please ensure that the words 'this issue' are added to any references in the list (and any citations in the text) to other articles in the same Special Issue.

Reference management software
Most Elsevier journals have their reference template available in many of the most popular reference management software products. These include all products that support Citation Style Language styles, such as Mendeley and Zotero, as well as EndNote. Using the word processor plug-ins from these products, authors only need to select the appropriate journal template when preparing their article, after which citations and bibliographies will be automatically formatted in the journal's style. If no template is yet available for this journal, please follow the format of the sample references and citations as shown in this Guide.

Users of Mendeley Desktop can easily install the reference style for this journal by clicking the following link: http://open.mendeley.com/use-citation-style/journal-of-the-egyptian-mathematical-society
When preparing your manuscript, you will then be able to select this style using the Mendeley plug-ins for Microsoft Word or LibreOffice.

Reference style
Text: Indicate references by number(s) in square brackets in line with the text. The actual authors can be referred to, but the reference number(s) must always be given.
Example: ..... as demonstrated [3,6]. Barnaby and Jones [8] obtained a different result ....
List: Number the references (numbers in square brackets) in the list in the order in which they appear in the text.
Examples:
Reference to a journal publication:
Reference to a book:

Journal abbreviations source
Journal names should be abbreviated according to the List of Title Word Abbreviations.

Supplementary material
Supplementary material such as applications, images and sound clips, can be published with your article to enhance it. Submitted supplementary items are published exactly as they are received (Excel or PowerPoint files will appear as such online). Please submit your material together with the article and supply a concise, descriptive caption for each supplementary file. If you wish to make changes to supplementary material during any stage of the process, please make sure to provide an updated file. Do not annotate any corrections on a previous version. Please switch off the 'Track Changes' option in Microsoft Office files as these will appear in the published version.
**Supplementary and multimedia data**
Elsevier accepts electronic supplementary and multimedia data to support and enhance your scientific research. Supplementary files offer the author additional possibilities to publish supporting applications, movies, animation sequences, high-resolution images, background datasets, sound clips and more. Supplementary files supplied will be published online alongside the electronic version of your article in Elsevier Web products, including ScienceDirect: http://www.sciencedirect.com. In order to ensure that your submitted material is directly usable, please ensure that data are provided in one of our recommended file formats. Authors should submit the material in electronic format together with the article and supply a concise and descriptive caption for each file. Video files: please supply ‘stills’ with your files: you can choose any frame from the video or make a separate image. These will be used instead of standard icons and will personalize the link to your supplementary information. For more detailed instructions please visit our artwork instruction pages at http://www.elsevier.com/artworkinstructions

**AFTER ACCEPTANCE**

**Online proof correction**
Corresponding authors will receive an e-mail with a link to our online proofing system, allowing annotation and correction of proofs online. The environment is similar to MS Word: in addition to editing text, you can also comment on figures/tables and answer questions from the Copy Editor. Web-based proofing provides a faster and less error-prone process by allowing you to directly type your corrections, eliminating the potential introduction of errors. If preferred, you can still choose to annotate and upload your edits on the PDF version. All instructions for proofing will be given in the e-mail we send to authors, including alternative methods to the online version and PDF.
We will do everything possible to get your article published quickly and accurately. Please use this proof only for checking the typesetting, editing, completeness and correctness of the text, tables and figures. Significant changes to the article as accepted for publication will only be considered at this stage with permission from the Editor. It is important to ensure that all corrections are sent back to us in one communication. Please check carefully before replying, as inclusion of any subsequent corrections cannot be guaranteed. Proofreading is solely your responsibility.

**Offprints**
The corresponding author will be notified and receive a link to the published version of the open access article on ScienceDirect. This link is in the form of an article DOI link which can be shared via email and social networks. For an extra charge, paper offprints can be ordered via the offprint order form which is sent once the article is accepted for publication. Both corresponding and co-authors may order offprints at any time via Elsevier’s Webshop. Authors requiring printed copies of multiple articles may use Elsevier Webshop’s ‘Create Your Own Book’ service to collate multiple articles within a single cover.

**Author Inquiries**
The open access fee for the journal is 50 USD per page, excluding taxes. Learn more about Elsevier's pricing policy: https://www.elsevier.com/openaccesspricing. The ability to pay does not influence whether or not a manuscript is accepted for publication.
