OPTIK
International Journal for Light and Electron Optics

TABLE OF CONTENTS

- Description p.1
- Audience p.1
- Abstracting and Indexing p.2
- Editorial Board p.2
- Guide for Authors p.5

DESCRIPTION

*Optik* publishes articles on all subjects related to light and electron optics and offers a survey on the state of research and technical development within the following fields:

Optics: Optics design, geometrical and beam optics, wave optics, Optical and micro-optical components, diffractive optics, devices and systems, Photoelectric and optoelectronic devices. Optical properties of materials, nonlinear optics, wave propagation and transmission in homogeneous and inhomogeneous materials. Information optics, image formation and processing, holographic techniques, microscopes and spectrometer techniques, and image analysis. Optical testing and measuring techniques. Optical communication and computing. Physiological optics. As well as other related topics.

Electron optics: All methods strongly related to light optics, e.g. geometrical electron optics, imaging theories and methods, GRIN optics, geometrical aberration. Instrumentation and equipments for guiding, focusing and imaging of charged particles, spectrometers and beam lithography. Image reconstruction and analysis, holographic methods. It publishes original papers and short notes on theoretical and experimental research in English. *OPTIK* addresses itself especially to scientific and technical working specialists in this field.

AUDIENCE

Scientists and Engineers working in the fields of Optics, Laseroptics and Electron optics.

EDITORIAL BOARD

Editors-in-Chief
Jer-Shing Huang, Leibniz Institute of Photonic Technology Research, Department of Nanooptics, Jena, Germany  
Spectroscopy, Microscopy, Physical Chemistry, Nanophotonics, Plasmonics, Analytical Chemistry, Photochemistry, Plasmonics, Nonlinear Nanooptics, Optical antennas, Metasurfaces, Chiral spectroscopy and imaging, Optical Trapping, Whispering-gallery Cavity, Optical Nanosensors

Section Editors
Fibre Optics
Hartmut Bartelt, Leibniz Institute of Photonic Technology Fiber Optics Workgroup, Jena, Germany

Nonlinear Dynamics in Optics and Photonics, Optical Solitons
Chen-Bin Huang, National Tsing Hua University, Hsinchu, Taiwan  
Optical solitons, nonlinear optics, fiber optics, ultrafast optics, nanophotonics, plasmonics, photonic quasiparticles, MMW photonics

Metamaterial Optics
Pankaj Kumar Choudhury, International Research Center for Advanced Photonics, Zhejiang University, Zhejiang, China  
Guided Wave Optics, Fiber Optics, Complex Optical Mediums, Metamaterials, Plasmonic Structures, Optical Sensors, Graphene Mediums, Photonic Crystals

Thin Films and Plasmonics
Muhammad Faryad, Lahore University of Management Sciences, Lahore, Pakistan  
Electromagnetic surface waves, Dyadic Green functions, Photonic Crystals, Optical Metamaterials
Mati Horpratham, National Electronics and Computer Technology Center, Khlong Luang, Thailand  
Nanostructure plasmonic sensor, Optical thin film coating, Opto-chemical sensor, Glancing angle deposition technique, Optical and Photonic Materials

Optical Design, Image Analysis & 3D Display
Dayan Li, Shanghai Institute of Optics and Fine Mechanics Chinese Academy of Sciences, Jia Ding Qu, China  
Juan Liu, Beijing Institute of Technology School of Optoelectronics, Hai Dian Qu, China

Photovoltaic
Waseem Haider, Central Michigan University, Mount Pleasant, Michigan, United States of America
Nonlinear Optics and Matter Waves, Laser and Quantum Optics, Optical Image Processing
Qin Zhou, Wuhan Textile University, , China
Optical localized waves, nonlinear physics, fiber laser, matter wave, soliton, breather, rogue wave, remotely sensed image.

Ultrafast Optics, Photonic Materials and Nanostructures, Nanophotonics and related Applications
Luigi Sirleto, Eduardo Caianiello Institute for Applied Science and Intelligent Systems National Research Council, Pozzuoli, Italy
Nonlinear optics, Ultrafast optics, Nonlinear spectroscopy, Nonlinear microscopy, Nonlinear micro and nanophotonics, Photonics materials and nanostructures

Polymer and Glass Optical Material
Hiroshi Yamagishi, University of Tsukuba, Tsukuba, Japan
Optics, Lasers, Supramolecular Chemistry, Organic Chemistry

Optical networks and communications
Mark Harrison, Chapman University Fowler School of Engineering, Orange, United States of America
Nanophotonics, Plasmonics, Photonic integrated circuits, Nonlinear optics, Optical communications and information processing

Optomechanics, Light-matter interaction, Metasurfaces, Near-field optics
Angela Barreda, University Carlos III of Madrid, Getafe, Spain
Nanophotonics, Plasmonics, Dielectric Nanostructures, Optical Antennas, Metasurfaces, Sensing, Nonlinear Nanooptics, Whispering-gallery modes

Optical Metrology and Interferometry
Percival Almoro, University of the Philippines Diliman, Quezon City, Philippines

Board
Milivoj Belic, Texas A&M University at Qatar, Doha, Qatar
Eusebio Bernabeu, Complutense University of Madrid, Faculty of Optics and Optometry, Madrid, Spain
Chaoqing Dai, Zhejiang A and F University, Department of Optical Engineering, Lin’an, Zhejiang, China
Optical soliton; matter wave; electroluminescence
Michael J. Damzen, Imperial College London, Department of Physics, London, United Kingdom
Francois Flory, Fresnel Institute Marseille, Marseille, France
John Healy, University College Dublin School of Electrical and Electronic Engineering, Dublin, Ireland
Numerics of optical propagation, holography, microscopy, sampling theory, mathematical tools like linear integral transforms and phase space
Henryk Kasprzak, Wroclaw University of Science and Technology, Faculty of Fundamental Problems of Technology, Wroclaw, Poland
Damien Peter Kelly, Ilmenau University of Technology, Department of Mechanical Engineering, Ilmenau, Germany
Akhlesh Lakhtakia, The Pennsylvania State University, Department of Engineering Science and Mechanics, University Park, Pennsylvania, United States of America
Electromagnetics, Nanotechnology, Thin Films, Biomimetics, Solar Cells, Forensics
Wenjun Liu, Beijing University of Posts and Telecommunications School of Science, Beijing, China
Fiber laser
Helena Lopez Aviles, Coherent Corp, East Granby, Connecticut, United States of America
Optics, Photonics, Nonlinear Optics, Active fibers, Fiber lasers
Baida Lü, Sichuan University Institute of Laser Physics and Laser Chemistry, Chengdu, China
Kaoru Minoshima, University of Electrocommunications, Faculty of Informatics and Engineering Graduate School of Informatics and Engineering, Chofu, Japan
Serguey Odoulov, Institute of Physics National Academy of Sciences of Ukraine, Kyiv, Ukraine
Yukitoshi E. Otani, Utsunomiya University Center for Optical Research and Education, Utsunomiya, Japan
Optical measurement, Polarization
John Sheridan, University College Dublin School of Electrical and Electronic Engineering, Dublin, Ireland
Serguej Stepanov, Center for Scientific Research and Higher Education of Ensenada, Department of Optics, Ensenada, Mexico
Jari Turunen, University of Eastern Finland, Department of Physics and Mathematics, JOENSUU, Finland
Lingli Wang, FLEXIM Flexible Industriemesstechnik GmbH, Berlin, Germany
Guo-Cheng Wu, Chongqing University of Posts and Telecommunications, Chongqing, China
Fractional calculus, Fractional discrete-time systems with dynamical analysis
Chunming Zhang, Xi'an Jiaotong University School of Science, Xi'an, China
Xiao-Fei Zhang, Shaanxi University of Science and Technology, Xi'an, China
Matter wave, Ultracold atom and molecule, Bose-Einstein condensate, Nonlinear optics, Quantum optics, Nonlinear dynamics
GUIDE FOR AUTHORS

Authors can submit their manuscript the Elsevier Online Submission System https://www.editorialmanager.com/ijleo/default.aspx

BEFORE YOU BEGIN

Ethics in publishing
Please see our information on Ethics in publishing.

Declaration of competing interest
Corresponding authors, on behalf of all the authors of a submission, must disclose any financial and personal relationships with other people or organizations that could inappropriately influence (bias) their work. Examples of potential conflicts of interest include employment, consultancies, stock ownership, honoraria, paid expert testimony, patent applications/registrations, and grants or other funding. All authors, including those without competing interests to declare, should provide the relevant information to the corresponding author (which, where relevant, may specify they have nothing to declare). Corresponding authors should then use this tool to create a shared statement and upload to the submission system at the Attach Files step. Please do not convert the .docx template to another file type. Author signatures are not required.

Declaration of generative AI in scientific writing
The below guidance only refers to the writing process, and not to the use of AI tools to analyse and draw insights from data as part of the research process.

Where authors use generative artificial intelligence (AI) and AI-assisted technologies in the writing process, authors should only use these technologies to improve readability and language. Applying the technology should be done with human oversight and control, and authors should carefully review and edit the result, as AI can generate authoritative-sounding output that can be incorrect, incomplete or biased. AI and AI-assisted technologies should not be listed as an author or co-author, or be cited as an author. Authorship implies responsibilities and tasks that can only be attributed to and performed by humans, as outlined in Elsevier’s AI policy for authors.

Authors should disclose in their manuscript the use of AI and AI-assisted technologies in the writing process by following the instructions below. A statement will appear in the published work. Please note that authors are ultimately responsible and accountable for the contents of the work.

Disclosure instructions
Authors must disclose the use of generative AI and AI-assisted technologies in the writing process by adding a statement at the end of their manuscript in the core manuscript file, before the References list. The statement should be placed in a new section entitled ‘Declaration of Generative AI and AI-assisted technologies in the writing process’.

Statement: During the preparation of this work the author(s) used [NAME TOOL / SERVICE] in order to [REASON]. After using this tool/service, the author(s) reviewed and edited the content as needed and take(s) full responsibility for the content of the publication.

This declaration does not apply to the use of basic tools for checking grammar, spelling, references etc. If there is nothing to disclose, there is no need to add a statement.

Submission declaration and verification
Submission of an article implies that the work described has not been published previously (except in the form of an abstract, a published lecture or academic thesis, see ‘Multiple, redundant or concurrent publication’ for more information), that it is not under consideration for publication elsewhere, that its publication is approved by all authors and tacitly or explicitly by the responsible authorities where the work was carried out, and that, if accepted, it will not be published elsewhere in the same form, in English or in any other language, including electronically without the written consent of the copyright-holder. To verify compliance, your article may be checked by Crossref Similarity Check and other originality or duplicate checking software.
Preprints
Please note that preprints can be shared anywhere at any time, in line with Elsevier's sharing policy. Sharing your preprints e.g. on a preprint server will not count as prior publication (see 'Multiple, redundant or concurrent publication' for more information).

Use of inclusive language
Inclusive language acknowledges diversity, conveys respect to all people, is sensitive to differences, and promotes equal opportunities. Content should make no assumptions about the beliefs or commitments of any reader; contain nothing which might imply that one individual is superior to another on the grounds of age, gender, race, ethnicity, culture, sexual orientation, disability or health condition; and use inclusive language throughout. Authors should ensure that writing is free from bias, stereotypes, slang, reference to dominant culture and/or cultural assumptions. We advise to seek gender neutrality by using plural nouns ("clinicians, patients/clients") as default/wherever possible to avoid using "he, she," or "he/she." We recommend avoiding the use of descriptors that refer to personal attributes such as age, gender, race, ethnicity, culture, sexual orientation, disability or health condition unless they are relevant and valid. When coding terminology is used, we recommend to avoid offensive or exclusionary terms such as "master", "slave", "blacklist" and "whitelist". We suggest using alternatives that are more appropriate and (self-) explanatory such as "primary", "secondary", "blocklist" and "allowlist". These guidelines are meant as a point of reference to help identify appropriate language but are by no means exhaustive or definitive.

Reporting sex- and gender-based analyses
Reporting guidance
For research involving or pertaining to humans, animals or eukaryotic cells, investigators should integrate sex and gender-based analyses (SGBA) into their research design according to funder/sponsor requirements and best practices within a field. Authors should address the sex and/or gender dimensions of their research in their article. In cases where they cannot, they should discuss this as a limitation to their research's generalizability. Importantly, authors should explicitly state what definitions of sex and/or gender they are applying to enhance the precision, rigor and reproducibility of their research and to avoid ambiguity or conflation of terms and the constructs to which they refer (see Definitions section below). Authors can refer to the Sex and Gender Equity in Research (SAGER) guidelines and the SAGER guidelines checklist. These offer systematic approaches to the use and editorial review of sex and gender information in study design, data analysis, outcome reporting and research interpretation - however, please note there is no single, universally agreed-upon set of guidelines for defining sex and gender.

Definitions
Sex generally refers to a set of biological attributes that are associated with physical and physiological features (e.g., chromosomal genotype, hormonal levels, internal and external anatomy). A binary sex categorization (male/female) is usually designated at birth ("sex assigned at birth"), most often based solely on the visible external anatomy of a newborn. Gender generally refers to socially constructed roles, behaviors, and identities of women, men and gender-diverse people that occur in a historical and cultural context and may vary across societies and over time. Gender influences how people view themselves and each other, how they behave and interact and how power is distributed in society. Sex and gender are often incorrectly portrayed as binary (female/male or woman/man) and unchanging whereas these constructs actually exist along a spectrum and include additional sex categorizations and gender identities such as people who are intersex/have differences of sex development (DSD) or identify as non-binary. Moreover, the terms "sex" and "gender" can be ambiguous—thus it is important for authors to define the manner in which they are used. In addition to this definition guidance and the SAGER guidelines, the resources on this page offer further insight around sex and gender in research studies.

Authorship
Please enter details of all Authors who contributed to the work reported in the manuscript based on their seniority and contribution. The corresponding author of the paper must be indicated in the paper. All communication regarding this submission will be sent to the person who is selected as the Corresponding Author during submission. Please note that we will not be able to make any changes to the author names (adding/removing authors, change of order of authors) after the paper is accepted and moved to typesetting.
Article transfer service
This journal uses the Elsevier Article Transfer Service to find the best home for your manuscript. This means that if an editor feels your manuscript is more suitable for an alternative journal, you might be asked to consider transferring the manuscript to such a journal. The recommendation might be provided by a Journal Editor, a dedicated Scientific Managing Editor, a tool assisted recommendation, or a combination. If you agree, your manuscript will be transferred, though you will have the opportunity to make changes to the manuscript before the submission is complete. Please note that your manuscript will be independently reviewed by the new journal. More information.

Elsevier supports responsible sharing
Find out how you can share your research published in Elsevier journals.

Role of the funding source
You are requested to identify who provided financial support for the conduct of the research and/or preparation of the article and to briefly describe the role of the sponsor(s), if any, in study design; in the collection, analysis and interpretation of data; in the writing of the report; and in the decision to submit the article for publication. If the funding source(s) had no such involvement, it is recommended to state this.

Open access
Please visit our Open Access page for more information.

Language (usage and editing services)
Please write your text in good English (American or British usage is accepted, but not a mixture of these). Authors who feel their English language manuscript may require editing to eliminate possible grammatical or spelling errors and to conform to correct scientific English may wish to use the English Language Editing service available from Elsevier's Author Services.

Submission
Our online submission system guides you stepwise through the process of entering your article details and uploading your files. The system converts your article files to a single PDF file used in the peer-review process. Editable files (e.g., Word, LaTeX) are required to typeset your article for final publication. All correspondence, including notification of the Editor's decision and requests for revision, is sent by e-mail.

Text should be typed double-spaced, in a single column using 12-point type

Authors can submit their manuscript to our online Elsevier Online Submission System https://www.editorialmanager.com/IJLEO/default.aspx

PREPARATION

Queries
For questions about the editorial process (including the status of manuscripts under review) or for technical support on submissions, please visit our Support Center.

Peer review
This journal operates a single anonymized review process. All contributions will be initially assessed by the editor for suitability for the journal. Papers deemed suitable are then typically sent to a minimum of two independent expert reviewers to assess the scientific quality of the paper. The Editor is responsible for the final decision regarding acceptance or rejection of articles. The Editor's decision is final. Editors are not involved in decisions about papers which they have written themselves or have been written by family members or colleagues or which relate to products or services in which the editor has an interest. Any such submission is subject to all of the journal's usual procedures, with peer review handled independently of the relevant editor and their research groups. More information on types of peer review.

Use of word processing software
It is important that the file be saved in the native format of the word processor used. The text should be in single-column format. Keep the layout of the text as simple as possible. Most formatting codes will be removed and replaced on processing the article. In particular, do not use the word processor's options to justify text or to hyphenate words. However, do use bold face, italics, subscripts, superscripts etc. When preparing tables, if you are using a table grid, use only one grid for each individual table and not a grid for each row. If no grid is used, use tabs, not spaces, to align columns. The electronic text should be prepared in a way very similar to that of conventional manuscripts (see
also the Guide to Publishing with Elsevier). Note that source files of figures, tables and text graphics will be required whether or not you embed your figures in the text. See also the section on Electronic artwork.

To avoid unnecessary errors you are strongly advised to use the 'spell-check' and 'grammar-check' functions of your word processor.

LaTeX

You are recommended to use the Elsevier article class elsarticle.cls to prepare your manuscript and BibTeX to generate your bibliography.

Our LaTeX site has detailed submission instructions, templates and other information.

Article structure

Appendices

If there is more than one appendix, they should be identified as A, B, etc. Formulae and equations in appendices should be given separate numbering: Eq. (A.1), Eq. (A.2), etc.; in a subsequent appendix, Eq. (B.1) and so on. Similarly for tables and figures: Table A.1; Fig. A.1, etc.

Essential title page information

• Title. Concise and informative. Titles are often used in information-retrieval systems. Avoid abbreviations and formulae where possible.
• Author names and affiliations. Please clearly indicate the given name(s) and family name(s) of each author and check that all names are accurately spelled. You can add your name between parentheses in your own script behind the English transliteration. Present the authors’ affiliation addresses (where the actual work was done) below the names. Indicate all affiliations with a lower-case superscript letter immediately after the author’s name and in front of the appropriate address. Provide the full postal address of each affiliation, including the country name and, if available, the e-mail address of each author.
• Corresponding author. Clearly indicate who will handle correspondence at all stages of refereeing and publication, also post-publication. This responsibility includes answering any future queries about Methodology and Materials. Ensure that the e-mail address is given and that contact details are kept up to date by the corresponding author.
• Present/permanent address. If an author has moved since the work described in the article was done, or was visiting at the time, a 'Present address' (or 'Permanent address') may be indicated as a footnote to that author's name. The address at which the author actually did the work must be retained as the main, affiliation address. Superscript Arabic numerals are used for such footnotes.

Highlights

Highlights are optional yet highly encouraged for this journal, as they increase the discoverability of your article via search engines. They consist of a short collection of bullet points that capture the novel results of your research as well as new methods that were used during the study (if any). Please have a look at the example Highlights.

Highlights should be submitted in a separate editable file in the online submission system. Please use 'Highlights' in the file name and include 3 to 5 bullet points (maximum 85 characters, including spaces, per bullet point).

Abstract

• Abstract (200 words maximum) should be a summary of the paper and not an introduction. Because the abstract may be used in abstracting journals, it should be self-contained (i.e., no numerical references) and substantive in nature, presenting concisely the objectives, methodology used, results obtained, and their significance.

Graphical abstract

Although a graphical abstract is optional, its use is encouraged as it draws more attention to the online article. The graphical abstract should summarize the contents of the article in a concise, pictorial form designed to capture the attention of a wide readership. Graphical abstracts should be submitted as a separate file in the online submission system. Image size: Please provide an image with a minimum of 531 × 1328 pixels (h × w) or proportionally more. The image should be readable at a size of 5 × 13 cm using a regular screen resolution of 96 dpi. Preferred file types: TIFF, EPS, PDF or MS Office files. You can view Example Graphical Abstracts on our information site.
Keywords
- Subject terms or keywords are required, maximum of eight. Key words referring to the special contents of the publication, and not to its methods. The editor retains the right to change the Key words.

Acknowledgements
Collate acknowledgements in a separate section at the end of the article before the references and do not, therefore, include them on the title page, as a footnote to the title or otherwise. List here those individuals who provided help during the research (e.g., providing language help, writing assistance or proof reading the article, etc.).

Formatting of funding sources
List funding sources in this standard way to facilitate compliance to funder's requirements:

Funding: This work was supported by the National Institutes of Health [grant numbers xxxx, yyyy]; the Bill & Melinda Gates Foundation, Seattle, WA [grant number zzzz]; and the United States Institutes of Peace [grant number aaaa].

It is not necessary to include detailed descriptions on the program or type of grants and awards. When funding is from a block grant or other resources available to a university, college, or other research institution, submit the name of the institute or organization that provided the funding.

If no funding has been provided for the research, it is recommended to include the following sentence:

This research did not receive any specific grant from funding agencies in the public, commercial, or not-for-profit sectors.

Math formulae
Please submit math equations as editable text and not as images. Present simple formulae in line with normal text where possible and use the solidus (/) instead of a horizontal line for small fractional terms, e.g., X/Y. In principle, variables are to be presented in italics. Powers of e are often more conveniently denoted by exp. Number consecutively any equations that have to be displayed separately from the text (if referred to explicitly in the text).

Artwork
Electronic artwork
General points
- Make sure you use uniform lettering and sizing of your original artwork.
- Embed the used fonts if the application provides that option.
- Aim to use the following fonts in your illustrations: Arial, Courier, Times New Roman, Symbol, or use fonts that look similar.
- Number the illustrations according to their sequence in the text.
- Use a logical naming convention for your artwork files.
- Provide captions to illustrations separately.
- Size the illustrations close to the desired dimensions of the published version.
- Submit each illustration as a separate file.
- Ensure that color images are accessible to all, including those with impaired color vision.

A detailed guide on electronic artwork is available. You are urged to visit this site; some excerpts from the detailed information are given here.

Formats
If your electronic artwork is created in a Microsoft Office application (Word, PowerPoint, Excel) then please supply 'as is' in the native document format.

Regardless of the application used other than Microsoft Office, when your electronic artwork is finalized, please 'Save as' or convert the images to one of the following formats (note the resolution requirements for line drawings, halftones, and line/halftone combinations given below):

EPS (or PDF): Vector drawings, embed all used fonts.
TIFF (or JPEG): Color or grayscale photographs (halftones), keep to a minimum of 300 dpi.
TIFF (or JPEG): Bitmapped (pure black & white pixels) line drawings, keep to a minimum of 1000 dpi.
TIFF (or JPEG): Combinations bitmapped line/half-tone (color or grayscale), keep to a minimum of 500 dpi.

Please do not:
• Supply files that are optimized for screen use (e.g., GIF, BMP, PICT, WPG); these typically have a low number of pixels and limited set of colors;
• Supply files that are too low in resolution;
• Submit graphics that are disproportionately large for the content.

Color artwork
Please make sure that artwork files are in an acceptable format (TIFF (or JPEG), EPS (or PDF), or MS Office files) and with the correct resolution. If, together with your accepted article, you submit usable color figures then Elsevier will ensure, at no additional charge, that these figures will appear in color online (e.g., ScienceDirect and other sites) regardless of whether or not these illustrations are reproduced in color in the printed version. For color reproduction in print, you will receive information regarding the costs from Elsevier after receipt of your accepted article. Please indicate your preference for color: in print or online only. Further information on the preparation of electronic artwork.

Figure captions
Ensure that each illustration has a caption. Supply captions separately, not attached to the figure. A caption should comprise a brief title (not on the figure itself) and a description of the illustration. Keep text in the illustrations themselves to a minimum but explain all symbols and abbreviations used.

Illustrations
It is important that the following instructions be followed precisely for the graphics files to be utilized in the journal production process: •Size your illustrations according to the journal’s specifications for column widths. Figures are generally reduced to either one-column width (8.8 cm) or smaller. Submit each illustration at the final size in which you would like it to appear in the journal. Each illustration should be prepared for 100% reproduction. •Avoid submitting illustrations containing small axes with oversized labels. •Ensure that line weights will be 0.5 points or greater in the final published size. Line weights below 0.5 points will reproduce poorly. •The graph should be sent with the correct orientation. •Set the graphic for 600 dpi resolution for line art, 264 dpi for halftones, and 600 dpi for combinations (line art and halftone). •Save line art as black/white bitmap; not greyscale. •Save halftones and combinations as greyscale, not black/white bitmap. •Set the bounding box to image to avoid excess white space around the image. •Submit ALL illustrations for each article, including line art.

Tables
Tables should bear consecutive numbers. Please add headings immediately above the tables.

References

Reference links
Increased discoverability of research and high quality peer review are ensured by online links to the sources cited. In order to allow us to create links to abstracting and indexing services, such as Scopus, Crossref and PubMed, please ensure that data provided in the references are correct. Please note that incorrect surnames, journal/book titles, publication year and pagination may prevent link creation. When copying references, please be careful as they may already contain errors. Use of the DOI is highly encouraged.

A DOI is guaranteed never to change, so you can use it as a permanent link to any electronic article. An example of a citation using DOI for an article not yet in an issue is: VanDecar J.C., Russo R.M., James D.E., Ambeh W.B., Franke M. (2003). Aseismic continuation of the Lesser Antilles slab beneath northeastern Venezuela. Journal of Geophysical Research, https://doi.org/10.1029/2001JB000884. Please note the format of such citations should be in the same style as all other references in the paper.

Web references
As a minimum, the full URL should be given and the date when the reference was last accessed. Any further information, if known (DOI, author names, dates, reference to a source publication, etc.), should also be given. Web references can be listed separately (e.g., after the reference list) under a different heading if desired, or can be included in the reference list.
References to published literature must be typed double-spaced and numbered consecutively in the order of their citation in the text. Private communications or unpublished reports should be treated as references.

**Data references**

This journal encourages you to cite underlying or relevant datasets in your manuscript by citing them in your text and including a data reference in your Reference List. Data references should include the following elements: author name(s), dataset title, data repository, version (where available), year, and global persistent identifier. Add [dataset] immediately before the reference so we can properly identify it as a data reference. The [dataset] identifier will not appear in your published article.

**Preprint references**

Where a preprint has subsequently become available as a peer-reviewed publication, the formal publication should be used as the reference. If there are preprints that are central to your work or that cover crucial developments in the topic, but are not yet formally published, these may be referenced. Preprints should be clearly marked as such, for example by including the word preprint, or the name of the preprint server, as part of the reference. The preprint DOI should also be provided.

**Reference management software**

Most Elsevier journals have their reference template available in many of the most popular reference management software products. These include all products that support Citation Style Language styles, such as Mendeley. Using citation plug-ins from these products, authors only need to select the appropriate journal template when preparing their article, after which citations and bibliographies will be automatically formatted in the journal's style. If no template is yet available for this journal, please follow the format of the sample references and citations as shown in this Guide. If you use reference management software, please ensure that you remove all field codes before submitting the electronic manuscript. More information on how to remove field codes from different reference management software.

**Research data**

This journal requires and enables you to share data that supports your research publication where appropriate, and enables you to interlink the data with your published articles. Research data refers to the results of observations or experimentation that validate research findings, which may also include software, code, models, algorithms, protocols, methods and other useful materials related to the project.

Below are a number of ways in which you can associate data with your article or make a statement about the availability of your data when submitting your manuscript. When sharing data in one of these ways, you are expected to cite the data in your manuscript and reference list. Please refer to the "References" section for more information about data citation. For more information on depositing, sharing and using research data and other relevant research materials, visit the research data page.

**Data linking**

If you have made your research data available in a data repository, you can link your article directly to the dataset. Elsevier collaborates with a number of repositories to link articles on ScienceDirect with relevant repositories, giving readers access to underlying data that gives them a better understanding of the research described.

There are different ways to link your datasets to your article. When available, you can directly link your dataset to your article by providing the relevant information in the submission system. For more information, visit the database linking page.

For supported data repositories a repository banner will automatically appear next to your published article on ScienceDirect.

In addition, you can link to relevant data or entities through identifiers within the text of your manuscript, using the following format: Database: xxxx (e.g., TAIR: AT1G01020; CCDC: 734053; PDB: 1XFN).

**Research Elements**

This journal enables you to publish research objects related to your original research – such as data, methods, protocols, software and hardware – as an additional paper in a Research Elements journal.
Research Elements is a suite of peer-reviewed, open access journals which make your research objects findable, accessible and reusable. Articles place research objects into context by providing detailed descriptions of objects and their application, and linking to the associated original research articles. Research Elements articles can be prepared by you, or by one of your collaborators.

During submission, you will be alerted to the opportunity to prepare and submit a manuscript to one of the Research Elements journals.

More information can be found on the Research Elements page.

Data statement
To foster transparency, we require you to state the availability of your data in your submission if your data is unavailable to access or unsuitable to post. This may also be a requirement of your funding body or institution. You will have the opportunity to provide a data statement during the submission process. The statement will appear with your published article on ScienceDirect. For more information, visit the Data Statement page.

The following list will be useful during the final checking of an article prior to sending it to the journal for review. Please consult this Guide for Authors for further details of any item.

Ensure that the following items are present:
One author has been designated as the corresponding author with contact details:
• E-mail address
• Full postal address
All necessary files have been uploaded, and contain:
• Keywords
• All figure captions
• All tables (including title, description, footnotes)
• IMPACT STATEMENT - Authors must upload personal statement together with their submission to express briefly relevance and importance of their publication in less than 250 words. The formulated declaration will not be published but will be sent to the appropriate editor and invited reviewers.

Further considerations
Please upload the source files in an Editable format (e.g., Word, LaTeX) Please upload the figures with at least 300 DPI resolution or in an editable format. Manuscript has been 'spell-checked' and 'grammar-checked' References are in the correct format for this journal All references mentioned in the Reference list are cited in the text, and vice versa Permission has been obtained for use of copyrighted material from other sources (including the Internet) Printed version of figures (if applicable) in color or black-and-white Indicate clearly whether or not color or black-and-white in print is required.

AFTER ACCEPTANCE
Availability of accepted article
This journal makes articles available online as soon as possible after acceptance. This concerns the Journal Pre-proofs (both in HTML and PDF format), which have undergone enhancements after acceptance, such as the addition of a cover page and metadata, and formatting for readability, but are not yet the definitive versions of record. A Digital Object Identifier (DOI) is allocated, thereby making it fully citable and searchable by title, author name(s) and the full text. The article's PDF also carries a disclaimer stating that it is an unedited article. Subsequent production stages will simply replace this version.

Typeset Model
IJLEO will publish all the articles in single column format and please click on the below link for an example. download this article

Online proof correction
To ensure a fast publication process of the article, we kindly ask authors to provide us with their proof corrections within two days. Corresponding authors will receive an e-mail with a link to our online proofing system, allowing annotation and correction of proofs online. The environment is similar to MS Word: in addition to editing text, you can also comment on figures/tables and answer questions from the Copy Editor. Web-based proofing provides a faster and less error-prone process by allowing you to directly type your corrections, eliminating the potential introduction of errors.
If preferred, you can still choose to annotate and upload your edits on the PDF version. All instructions for proofing will be given in the e-mail we send to authors, including alternative methods to the online version and PDF.

We will do everything possible to get your article published quickly and accurately. Please use this proof only for checking the typesetting, editing, completeness and correctness of the text, tables and figures. Significant changes to the article as accepted for publication will only be considered at this stage with permission from the Editor. It is important to ensure that all corrections are sent back to us in one communication. Please check carefully before replying, as inclusion of any subsequent corrections cannot be guaranteed. Proofreading is solely your responsibility.

The corresponding author, at no cost, will be provided with a PDF file of the article via e-mail. The PDF file is a watermarked version of the published article and includes a cover sheet with the journal cover image and a disclaimer outlining the terms and conditions of use. Additional offprints may be ordered when proofs are returned.

Originality and plagiarism

Originality and plagiarism

The authors should ensure that they have written entirely original works, and if the authors have used the work and/or words of others, that this has been appropriately cited or quoted. Plagiarism takes many forms, from ‘passing off’ another’s paper as the author’s own paper, to copying or paraphrasing substantial parts of another’s paper (without attribution), to claiming results from research conducted by others. Plagiarism in all its forms constitutes unethical publishing behavior and is unacceptable.

AUTHOR INQUIRIES

Visit the Elsevier Support Center to find the answers you need. Here you will find everything from Frequently Asked Questions to ways to get in touch.

You can also check the status of your submitted article or find out when your accepted article will be published.

For inquiries relating to the submission of articles (including electronic submission) please visit this journal’s homepage. For detailed instructions on the preparation of electronic artwork, please visit https://www.elsevier.com/artworkinstructions. Contact details for questions arising after acceptance of an article, especially those relating to proofs, will be provided by the publisher. You can track accepted articles at https://www.elsevier.com/trackarticle. You can also check our Author FAQs at https://https://www.elsevier.com/authorFAQ and/or contact Customer Support via https://service.elsevier.com.
