DESCRIPTION

The Review of Development Finance has been founded in response to a growing scholarly literature that has been discussing the role of financial systems in the economic development process. The Journal provides a global forum for intellectually stimulating analysis of topics related to the deepening, outreach, efficiency and stability of financial systems. We welcome theoretical and empirical micro and macro analysis. The focus of the journal is on applied and policy-oriented research, which can serve as basis for public policy discussions on the financial system issues, especially in developing and emerging markets. The journal seeks to foster the dialogue between researchers, policy-makers and practitioners to identify policies that help deepen and broaden financial systems in an efficient and sustainable manner. It aims to accomplish the following:

- publish leading-edge research that further our understanding and use of development finance
- establish an outstanding level of academic rigor that will ensure the publication of first class development finance research
- appeal to a broad cross-section of readers, including both the academic audience as well as practitioners of finance
- **Markets, Institutions and Training Cost:** This will cover areas including, Contracts, Agency and Transaction Cost; Asymmetric Information
Capital Markets and Credit Rationing; Risk Management and Domestic and International Capital Flows
- **Finance, Economic Growth and Development:** This covers a broad area including issues surrounding Capital Flows and Economic Growth;
Financial Institutions and Economic Growth; Financial Development and Economic Growth and Financial Development & Economic Development
- **Microcredit and Inverted Banking:** Covering Social Collateral and Inverted Banking; Credit Markets; Rural Credit Markets and the Design of Rural Credit Institutions
- **Law and Finance:** Corporate governance, regulation; corporate finance and Corporate Social Responsibility
- **Global Finance Architecture:** This will cover areas including Capital Adequacy and Financial Soundness and Issues surrounding financial liberalization and Globalisation; International Financial Institutions
- **External Aid and Development:** Broadly covering the impact of external aid on economic growth
- **Sovereign Debt Management:** This will cover issues surrounding Debt Management; External Debt and Economic Growth; Debt Contracts and Renegotiation; Debt Relieve Policies; Design of Incentives and Broader issues on Sovereign Debt Management
- **Finance and Sustainable Development:** This will cover areas including Sustainable Development; Issues surrounding Finance and the Global Environment

•**Financial Evaluation and Optimality Measures:** Innovative methods of cost benefit analysis and Risk analysis and credit ratings.

EDITORIAL BOARD

Editor-in-Chief

N. Biekpe, University of Cape Town & Africagrowth Institute, South Africa

Co-Editors

D. Cassimon, Universiteit Antwerpen, Belgium

L.K. Ng, York University, Canada

U. Panizza, The Graduate Institute of International and Development Studies, Switzerland

Advisory Editors

G.A. Akerlof, University of California at Berkeley, USA

V.R. Errunza, McGill University, Canada

C.R. Harvey, Duke University, USA

R.C. Merton, Harvard Business School, USA

M. Scholes, Stanford University, USA

L.W. Senbet, University of Maryland, USA

Editorial Assistant

D. Potgieter, Africagrowth Institute, South Africa

Editorial Board Members

R. Aggarwal, Georgetown University, USA

F. Allen, University of Pennsylvania Wharton School, USA

F.E. Benth, University of Oslo, Norway

T.J. Besley, London School of Economics, UK

G.M. Bodnar, Johns Hopkins University, USA

A.W. Boot, The Univ. of Amsterdam, Netherlands

K.C. Chen, California State University, USA

Y.-W. Cheung, University of California, Santa Cruz (USA)

G. Chichilnisky, Columbia University, USA

M.D. Chinn, University of Wisconsin at Madison, USA

S. Claessens, The IMF

G.M. Constantinides, University of Chicago, USA

I. Cooper, London Business School, UK

F. Edwards, Columbia University, USA

M. Giannetti, Stockholm School of Economics, Sweden

J.D. Glen, International Finance Corporation (IFC), USA

R.J. Hodrick, Columbia University, USA

R. Kanbur, Cornell University, USA

R. Korajczyk, Northwestern University, USA

S. Lahiri, Southern Illinois University, USA

M.D. Levi, University of British Columbia, Canada

R. Levine, Brown University, USA

R. Michaely, Cornell University, USA

P. Minford, University of Wales, UK

F.S. Mishkin, Columbia University, USA

M. Moore, University of Warwick, UK

V. Murinde, SOAS, University of London, UK

L. Ndikumana, African Development Bank, South Africa

K. Ojah, University of the Witwatersrand, South Africa

K. Opong, University of Glasgow, UK
K. Phylaktis, City, University of London, UK

J. Sheen, Macquarie University, Australia
B. Solnik, Hong Kong University of Science and Technology, Hong Kong
I.M. Werner, The Ohio State University, USA
Y.P. Yafeh, Hebrew University of Jerusalem, Israel

GUIDE FOR AUTHORS

BEFORE YOU BEGIN

Ethics in publishing

Please see our information pages on [Ethics in publishing](#) and [Ethical guidelines for journal publication](#).

Declaration of interest

All authors must disclose any financial and personal relationships with other people or organizations that could inappropriately influence (bias) their work. Examples of potential conflicts of interest include employment, consultancies, stock ownership, honoraria, paid expert testimony, patent applications/registrations, and grants or other funding. Authors must disclose any interests in two places: 1. A summary declaration of interest statement in the title page file (if double-blind) or the manuscript file (if single-blind). If there are no interests to declare then please state this: 'Declarations of interest: none'. This summary statement will be ultimately published if the article is accepted. 2. Detailed disclosures as part of a separate Declaration of Interest form, which forms part of the journal's official records. It is important for potential interests to be declared in both places and that the information matches. [More information](#).

Submission declaration and verification

Submission of an article implies that the work described has not been published previously (except in the form of an abstract or as part of a published lecture or academic thesis or as an electronic preprint, see '[Multiple, redundant or concurrent publication](#)' section of our ethics policy for more information), that it is not under consideration for publication elsewhere, that its publication is approved by all authors and tacitly or explicitly by the responsible authorities where the work was carried out, and that, if accepted, it will not be published elsewhere in the same form, in English or in any other language, including electronically without the written consent of the copyright-holder. To verify originality, your article may be checked by the originality detection service [CrossCheck](#).

Changes to authorship

Authors are expected to consider carefully the list and order of authors **before** submitting their manuscript and provide the definitive list of authors at the time of the original submission. Any addition, deletion or rearrangement of author names in the authorship list should be made only **before** the manuscript has been accepted and only if approved by the journal Editor. To request such a change, the Editor must receive the following from the **corresponding author**: (a) the reason for the change in author list and (b) written confirmation (e-mail, letter) from all authors that they agree with the addition, removal or rearrangement. In the case of addition or removal of authors, this includes confirmation from the author being added or removed.

Only in exceptional circumstances will the Editor consider the addition, deletion or rearrangement of authors **after** the manuscript has been accepted. While the Editor considers the request, publication of the manuscript will be suspended. If the manuscript has already been published in an online issue, any requests approved by the Editor will result in a corrigendum.

Copyright

Upon acceptance of an article, authors will be asked to complete an 'Exclusive License Agreement' (see [more information](#) on this). Permitted third party reuse of open access articles is determined by the author's choice of [user license](#).

Author rights

As an author you (or your employer or institution) have certain rights to reuse your work. [More information](#).

It is a condition of publication in the journal that authors assign copyright to the Africagrowth Institute. This ensures that requests from third parties to reproduce articles are handled efficiently and consistently and will also allow the article to be as widely disseminated as possible. In assigning copyright, authors may use their own material in other publications provided that the journal is acknowledged as the original place of publication.

Elsevier supports responsible sharing

Find out how you can [share your research](#) published in Elsevier journals.

Role of the funding source

You are requested to identify who provided financial support for the conduct of the research and/or preparation of the article and to briefly describe the role of the sponsor(s), if any, in study design; in the collection, analysis and interpretation of data; in the writing of the report; and in the decision to submit the article for publication. If the funding source(s) had no such involvement then this should be stated.

Funding body agreements and policies

Elsevier has established a number of agreements with funding bodies which allow authors to comply with their funder's open access policies. Some funding bodies will reimburse the author for the Open Access Publication Fee. Details of [existing agreements](#) are available online.

Open access

Every peer-reviewed research article appearing in this journal will be published open access. This means that the article is universally and freely accessible via the internet in perpetuity, in an easily readable format immediately after publication. The author does not have any publication charges for open access. The Africagrowth Institute will pay to make the article open access.

A CC user license manages the reuse of the article (see <http://www.elsevier.com/openaccesslicenses>). All articles will be published under the following license:

Creative Commons Attribution-NonCommercial-NoDerivs (CC BY-NC-ND)

For non-commercial purposes, lets others distribute and copy the article, and to include in a collective work (such as an anthology), as long as they credit the author(s) and provided they do not alter or modify the article.

Elsevier Publishing Campus

The Elsevier Publishing Campus (www.publishingcampus.com) is an online platform offering free lectures, interactive training and professional advice to support you in publishing your research. The College of Skills training offers modules on how to prepare, write and structure your article and explains how editors will look at your paper when it is submitted for publication. Use these resources, and more, to ensure that your submission will be the best that you can make it.

Language (usage and editing services)

Please write your text in good English (American or British usage is accepted, but not a mixture of these). Authors who feel their English language manuscript may require editing to eliminate possible grammatical or spelling errors and to conform to correct scientific English may wish to use the [English Language Editing service](#) available from Elsevier's WebShop.

Submission

Our online submission system guides you stepwise through the process of entering your article details and uploading your files. The system converts your article files to a single PDF file used in the peer-review process. Editable files (e.g., Word, LaTeX) are required to typeset your article for final publication. All correspondence, including notification of the Editor's decision and requests for revision, is sent by e-mail.

Referees

Please submit the names and institutional e-mail addresses of several potential referees. For more details, visit our [Support site](#). Note that the editor retains the sole right to decide whether or not the suggested reviewers are used.

PREPARATION

(1) Manuscript should be typewritten using 1.5 spacing throughout, including tables, references, and footnotes. Assemble sections in the following order

Title page (Separate Page)

Abstract (Separate Page)

Text (Including Tables & Figures)

References

Appendix

(2) Manuscript (Microsoft Word) should be submitted to EES <https://www.evise.com/profile/api/navigate/RDF>. First time authors should register themselves as Author.

(3) The **Title page** should include the name(s) of the author(s), and institutional affiliation for each author. It should also include name, address, telephone number and email of the author responsible for correspondence, as well as the name, address of the author to whom requests for reprints should be sent.

(4) Each article should include an **Abstract** of not more than 100 words, beginning on a separate page. The text should also begin on a separate page. The first numbered section should follow the **Abstract** of the article.

Footnotes should be kept to a minimum and placed at the bottom of the page on which they are cited. Do not number author affiliations or acknowledgements of support or assistance.

(5) **Tables and Figures** should be placed on the page on which it is first referred to or as close as possible to such page and should be numbered sequentially with Arabic numerals. Each should be designed to fit on a page without undue compression. Authors may use a "landscape" page setup for tables.

It should be as self-explanatory as possible, incorporating any necessary descriptive material in an unnumbered footnote.

Tables - The table number and heading are displayed **above the table**, in bold typed and left aligned.

Figures - All explanatory material should be included in the legend and not in the figure itself. The figure number and heading are displayed **below the figure**, in bold typed and left aligned.

(6) **Headings** are numbered and formatted as follows:

1. MAIN HEADING (bold)

1.1 Sub Heading (bold)

1.1.1 Minor Heading (italics)

(7) **References:** the Harvard method must be used, namely short references in the text and more detailed references arranged in alphabetical order at the end of the manuscript (follow the guidelines below).

References in the text: Omit the page numbers if the entire publication is referred to (Cane, 1980); or ... according to Cane (1987b). If a quotation is cited, (Abraham, 1985: 2).

The list of references should be in unnumbered alphabetical format and should begin on a new page. Hakansson, N. (1979): "A Characterization of Optimal Multi-period Portfolio Policies", in *Portfolio Theory, 25 Years After: Essays in Honor of Harry Markowitz*, eds. E. Elton and M. Gruber Amsterdam: North-Holland, pp. 169-177

Gibbons, M. R., Ross, S. A. and Shanken, J. (1989): "A Test of the Efficiency of a Given Portfolio" *Econometrica*, 57(4), pp.1121-1152.

Merton, R. C. (1990): *Continuous-Time Finance*. Cambridge: Basil Blackwell.

Norton, C. (2000): "African Capital Market: The way forward", Working Paper, the University of Cape Town, South Africa.

Peer review

This journal operates a double blind review process. All contributions will be initially assessed by the editor for suitability for the journal. Papers deemed suitable are then typically sent to a minimum of two independent expert reviewers to assess the scientific quality of the paper. The Editor is responsible for the final decision regarding acceptance or rejection of articles. The Editor's decision is final. [More information on types of peer review.](#)

Formatting of funding sources

List funding sources in this standard way to facilitate compliance to funder's requirements:

Funding: This work was supported by the National Institutes of Health [grant numbers xxxx, yyyy]; the Bill & Melinda Gates Foundation, Seattle, WA [grant number zzzz]; and the United States Institutes of Peace [grant number aaaa].

It is not necessary to include detailed descriptions on the program or type of grants and awards. When funding is from a block grant or other resources available to a university, college, or other research institution, submit the name of the institute or organization that provided the funding.

If no funding has been provided for the research, please include the following sentence:

This research did not receive any specific grant from funding agencies in the public, commercial, or not-for-profit sectors.

Data references

This journal encourages you to cite underlying or relevant datasets in your manuscript by citing them in your text and including a data reference in your Reference List. Data references should include the following elements: author name(s), dataset title, data repository, version (where available), year, and global persistent identifier. Add [dataset] immediately before the reference so we can properly identify it as a data reference. The [dataset] identifier will not appear in your published article.

Reference management software

Most Elsevier journals have their reference template available in many of the most popular reference management software products. These include all products that support [Citation Style Language styles](#), such as [Mendeley](#) and [Zotero](#), as well as [EndNote](#). Using the word processor plug-ins from these products, authors only need to select the appropriate journal template when preparing their article, after which citations and bibliographies will be automatically formatted in the journal's style. If no template is yet available for this journal, please follow the format of the sample references and citations as shown in this Guide.

Users of Mendeley Desktop can easily install the reference style for this journal by clicking the following link:

<http://open.mendeley.com/use-citation-style/review-of-development-finance>

When preparing your manuscript, you will then be able to select this style using the Mendeley plug-ins for Microsoft Word or LibreOffice.

Reference style

(Harvard) style (Style 2):

[dataset] Oguro, M., Imahiro, S., Saito, S., Nakashizuka, T., 2015. Mortality data for Japanese oak wilt disease and surrounding forest compositions. Mendeley Data, v1. <http://dx.doi.org/10.17632/xwj98nb39r.1>.

RESEARCH DATA

This journal encourages and enables you to share data that supports your research publication where appropriate, and enables you to interlink the data with your published articles. Research data refers to the results of observations or experimentation that validate research findings. To facilitate reproducibility and data reuse, this journal also encourages you to share your software, code, models, algorithms, protocols, methods and other useful materials related to the project.

Below are a number of ways in which you can associate data with your article or make a statement about the availability of your data when submitting your manuscript. If you are sharing data in one of these ways, you are encouraged to cite the data in your manuscript and reference list. Please refer to the "References" section for more information about data citation. For more information on depositing, sharing and using research data and other relevant research materials, visit the [research data](#) page.

Data linking

If you have made your research data available in a data repository, you can link your article directly to the dataset. Elsevier collaborates with a number of repositories to link articles on ScienceDirect with relevant repositories, giving readers access to underlying data that gives them a better understanding of the research described.

There are different ways to link your datasets to your article. When available, you can directly link your dataset to your article by providing the relevant information in the submission system. For more information, visit the [database linking page](#).

For [supported data repositories](#) a repository banner will automatically appear next to your published article on ScienceDirect.

In addition, you can link to relevant data or entities through identifiers within the text of your manuscript, using the following format: Database: xxxx (e.g., TAIR: AT1G01020; CCDC: 734053; PDB: 1XFN).

Mendeley Data

This journal supports Mendeley Data, enabling you to deposit any research data (including raw and processed data, video, code, software, algorithms, protocols, and methods) associated with your manuscript in a free-to-use, open access repository. During the submission process, after uploading your manuscript, you will have the opportunity to upload your relevant datasets directly to *Mendeley Data*. The datasets will be listed and directly accessible to readers next to your published article online.

For more information, visit the [Mendeley Data for journals page](#).

Data statement

To foster transparency, we encourage you to state the availability of your data in your submission. This may be a requirement of your funding body or institution. If your data is unavailable to access or unsuitable to post, you will have the opportunity to indicate why during the submission process, for example by stating that the research data is confidential. The statement will appear with your published article on ScienceDirect. For more information, visit the [Data Statement page](#).

AFTER ACCEPTANCE

Proofs

One set of page proofs (as PDF files) will be sent by e-mail to the corresponding author (if we do not have an e-mail address then paper proofs will be sent by post) or, a link will be provided in the e-mail so that authors can download the files themselves. Elsevier now provides authors with PDF proofs which can be annotated; for this you will need to [download the free Adobe Reader](#), version 9 (or higher). Instructions on how to annotate PDF files will accompany the proofs (also given online). The exact system requirements are given at the [Adobe site](#).

If you do not wish to use the PDF annotations function, you may list the corrections (including replies to the Query Form) and return them to Elsevier in an e-mail. Please list your corrections quoting line number. If, for any reason, this is not possible, then mark the corrections and any other comments (including replies to the Query Form) on a printout of your proof and scan the pages and return via e-mail. Please use this proof only for checking the typesetting, editing, completeness and correctness of the text, tables and figures. Significant changes to the article as accepted for publication will only be considered at this stage with permission from the Editor. We will do everything possible to get your article published quickly and accurately. It is important to ensure that all corrections are sent back to us in one communication: please check carefully before replying, as inclusion of any subsequent corrections cannot be guaranteed. Proofreading is solely your responsibility.

Offprints

The corresponding author will be notified and receive a link to the published version of the open access article on [ScienceDirect](#). This link is in the form of an article DOI link which can be shared via email and social networks. For an extra charge, paper offprints can be ordered via the offprint order form which is sent once the article is accepted for publication. Both corresponding and co-authors may order offprints at any time via Elsevier's [Webshop](#). Authors requiring printed copies of multiple articles may use Elsevier Webshop's 'Create Your Own Book' service to collate multiple articles within a single cover.

AUTHOR INQUIRIES

Visit the [Elsevier Support Center](#) to find the answers you need. Here you will find everything from Frequently Asked Questions to ways to get in touch.

You can also [check the status of your submitted article](#) or find out [when your accepted article will be published](#).
