

ELSEVIER

SCANDINAVIAN JOURNAL OF PAIN

The *Scandinavian Journal of Pain* is the official journal of the [Scandinavian Association for the Study of Pain \(SASP\)](#)

and it is affiliated with the Norwegian Pain Society, Danish Pain Society, Swedish Pain Society, Finnish Association for the Study of Pain, and the Pain Society of Iceland

DESCRIPTION

The *Scandinavian Journal of Pain*, the scientific journal of the researcher-network **Scandinavian Association for the Study of Pain** (www.SASP.org), is a comprehensive forum for original research from international researchers, on all aspects of pain including the nature of pain, pain mechanisms, and pain management. In order to bring pain-researchers and pain-clinicians up-to-date on important issues, the journal also encourages submissions of topical reviews.

Scandinavian Journal of Pain provides a broad and stimulating approach to new pain-related research by also commissioning *editorial comments* published together with *all accepted papers*. The editorial comment highlights the significance of the research in the paper and often provides a concise review of the topic of the paper. This puts the papers into context of the present climate of pain research.

Scandinavian Journal of Pain is primarily an online journal, and it also publishes a condensed print version for its subscribers. This paper-version prints the *editorial comments*, the *extended abstracts*, and the *Highlights* of the online-published papers. This provides the essence of the research and its importance in the care or future care of patients.

The editorial comments and the Editor's choice paper in each issue are currently available as Free for View on ScienceDirect and www.scandinavianjournalpain.com. All articles published in the *Scandinavian Journal of Pain* are indexed in Scopus/Science Direct and EMBASE.

Scandinavian Journal of Pain publishes these categories of articles: Basic and clinical research; systemic and topical reviews; hypothesis-generating case-reports and observational studies; letter to the Editor. The abstracts of presentations at scientific meetings of SASP are also published online. For current contents, and for papers in press, see www.scandinavianjournalpain.com. The Scandinavian countries have a long and distinguished tradition of excellent scientific and medical contributions to pain research, and the [Scandinavian Journal of Pain](#) is a consequence of this tradition.

For more information to authors on how to write and submit a manuscript, see www.scandinavianjournalpain.com/authorinfo

EDITORIAL BOARD

Editor-in-Chief:

Harald Breivik, Oslo University Hospital, Oslo, Norway

Senior Editors:

Torsten Gordh, Uppsala Universitet, Uppsala, Sweden
Troels Jensen, Aarhus University, Aarhus, Denmark
Eija Kalso, Helsinki University Central Hospital, Helsinki, Finland

Clinical Science and Epidemiology

Section Editors:

Stephen Butler, Uppsala Universitet, Uppsala, Sweden
Pekka Mäntyselkä, Kuopion Yliopisto, Kuopio, Finland
Mads Werner, Copenhagen University Hospital, Copenhagen, Denmark

Associate Editors:

Jane Ballantyne, University of Washington, Seattle, Washington, USA
Pettery Borchgrevink, Norwegian University of Science & Technology NTNU, Trondheim, Norway
Daniel Carr, Tufts University School of Medicine, Boston, Massachusetts, USA
Michele Curatolo, University of Washington, Seattle, Washington, USA
Jörgen Dahl, Rigshospitalet, Copenhagen, Denmark
Asbjørn Drewes, Aarhus University Hospital, Aarhus, Denmark
James Eisenach, Wake Forest Baptist Medical Center, Winston-Salem, North Carolina, USA
Allen Finley, Dalhousie University, Halifax, Nova Scotia, Canada
Katri Hamunen, Helsinki University Central Hospital, Helsinki, Finland
Rigmor Jensen, University of Copenhagen, Copenhagen, Denmark
Pål Klepstad, Norwegian University of Science & Technology NTNU, Trondheim, Norway
Ulf Kongsgaard, Oslo University Hospital, Oslo, Norway
Gunnvald Kvarstein, Oslo University Hospital, Oslo, Norway
Christopher Nielsen, Norwegian Institute of Public Health, Oslo, Norway
Lone Nikolajsen, Aarhus University Hospital, Aarhus, Denmark
Klaus Olkkola, Helsinki University Central Hospital, Helsinki, Finland
Cecilie Røe, University of Oslo, Oslo, Norway
Tone Rustøen, Oslo University Hospital, Oslo, Norway
Sebastian Straube, University of Alberta, Edmonton, Alberta, Canada
Peter Svensson, Aarhus University, Aarhus, Denmark

Neurophysiology and Neuropathic Pain

Section Editors:

Nanna Finnerup, Aarhus University, Aarhus, Denmark
Satu Jääskeläinen, Turku University Hospital, Turku, Finland
Ellen Jørum, Rikshospitalet University Hospital, Oslo, Norway

Associate Editors:

Allan I. Basbaum, University of California at San Francisco (UCSF), San Francisco, California, USA
Maija Haanpää, Helsinki University Central Hospital, Helsinki, Finland
Per Hansson, Karolinska Institutet, Stockholm, Sweden
Srinivasa Raja, Johns Hopkins University School of Medicine, Baltimore, Maryland, USA
Andrew Rice, Imperial College School of Medicine (ICSM), London, England, UK
Michael Rowbotham, California Pacific Medical Center (CPMC), San Francisco, California, USA

Neurobiology and Pharmacology

Section Editors:

Malin Lagerström, Uppsala Universitet, Uppsala, Sweden
Antti Pertovaara, University of Helsinki, Helsinki, Finland
Christian Bjerggaard Vaegter, Aarhus University, Aarhus, Denmark

Associate Editors:

Fernando Cervero, McGill University, Montréal, Canada

Gerald Gebhart, University of Pittsburgh School of Medicine, Pittsburgh, Pennsylvania, USA

Johannes Gjerstad, Statens Arbeidsmiljø Institutt (STAMI), Oslo, Norway

Martin Schmelz, Ruprecht-Karls-Universität Heidelberg, Mannheim, Germany

Carl-Olav Stiller, Karolinska Institutet, Stockholm, Sweden

Outi Vainio, University of Helsinki, Helsinki, Finland

Tony Yaksh, University of California at San Diego (UCSD), San Diego, California, USA

Pain Measurement, Experimental, Statistics, and Imaging

Section Editors:

Lars Arendt-Nielsen, Aalborg University, Aalborg, Denmark

Eva Skovlund, Norwegian University of Science & Technology NTNU, Trondheim, Norway

Audun Stubhaug, Rikshospitalet University Hospital, Oslo, Norway

Associate Editors:

Thomas Graven-Nielsen, Aalborg University, Aalborg, Denmark

Eva Kosek, Karolinska Institutet, Stockholm, Sweden

Psychology

Section Editors:

Steven Linton, Örebro University, Örebro, Sweden

Silje Endresen Reme, Oslo University Hospital, Oslo, Norway

Associate Editors:

Amanda de C. Williams, University College London (UCL), London, UK

Eirikur Lindal, Psychological Services, Reykjavik, Iceland

Michael Nicholas, The University of Sydney, St. Leonards, New South Wales, Australia

Johan Vlaeyen, KU Leuven, Leuven, Belgium

GUIDE FOR AUTHORS

Your Paper Your Way

We now differentiate between the requirements for new and revised submissions. You may choose to submit your manuscript as a single Word or PDF file to be used in the refereeing process. Only when your paper is at the revision stage, will you be requested to put your paper in to a 'correct format' for acceptance and provide the items required for the publication of your article.

To find out more, please visit the Preparation section below.

INTRODUCTION

Papers accepted for publication in the *Scandinavian Journal of Pain* will be published in 2 formats in this *hybrid journal*:

- 1) an extended abstract together with an editorial comment, in the printed paper-version of the Journal
- 2) in full on ScienceDirect and the Journal website (<http://www.ScandinavianJournalPain.com>). All articles remain fully citable and available to searches. They are indexed on Scopus/ScienceDirect and EMBASE

IMPORTANT MESSAGE

Articles can only be submitted online via the Elsevier Editorial System at <http://ees.elsevier.com/sjpain>. Before you can upload your manuscript you will need to register to the program as an author. An individual username and a password will be sent to you. Please make sure that your manuscript is in accordance with the Guide for Authors given below.

Types of article

The *Scandinavian Journal of Pain* publishes high quality reports on original basic and clinical research; comprehensive systematic and topical reviews; hypothesis-generating case-reports and observational studies; letter to the Editor.

Basic and Clinical Research

Word limit; Abstract : 500 words, Introduction : 500 words, Methods : no limit; Results : no limits; Discussion : 1500 words. Follow CONSORT-guidelines when planning and reporting clinical trials (<http://www.consort-statement.org>), and ARRIVE-guidelines when planning and reporting animal studies (<http://www.nc3rs.org.uk/ARRIVE>).

Please refer to ethics for guidelines for reporting on animal studies or clinical trials (ethics and clinical trials).

Comprehensive Systematic Reviews and Topical Reviews

Topical reviews focus on recent research and development of important issues in pain medicine. Comprehensive reviews can include meta-analysis when appropriate or be narrative when meta-analysis is not possible. Follow the **PRISMA** (formerly QUOROM) guidelines for reporting systematic reviews and meta-analysis (<http://www.prisma-statement.org>).

Word limit : 6000 words.

Case-reports and observational studies

Should describe new and important observations that may generate hypothesis that can subsequently be tested in proper clinical trials. Word-limits: These should generally be brief reports (no longer than 4000 words).

Letters to the Editor

Letters containing critical assessment of papers recently published in the *Scandinavian Journal of Pain* will be considered for publication in the correspondence section. Letters should not exceed 1000 words including references as necessary, one table or one figure. Letters should be typed in double spacing, should have a heading and no abbreviations. If related to a previously published article, the article should be identified by title, author(s), and volume/page numbers. All letters are subject to editorial review. At the Editor's discretion, a letter may be sent to authors of the original paper for comment, and both letter and reply may be published together.

Submission checklist

You can use this list to carry out a final check of your submission before you send it to the journal for review. Please check the relevant section in this Guide for Authors for more details.

Ensure that the following items are present:

One author has been designated as the corresponding author with contact details:

- E-mail address
- Full postal address

All necessary files have been uploaded:

Manuscript:

- Include keywords
- All figures (include relevant captions)
- All tables (including titles, description, footnotes)
- Ensure all figure and table citations in the text match the files provided
- Indicate clearly if color should be used for any figures in print

Graphical Abstracts / Highlights files (where applicable)

Supplemental files (where applicable)

Further considerations

- Manuscript has been 'spell checked' and 'grammar checked'
- All references mentioned in the Reference List are cited in the text, and vice versa
- Permission has been obtained for use of copyrighted material from other sources (including the Internet)
- Relevant declarations of interest have been made
- Journal policies detailed in this guide have been reviewed
- Referee suggestions and contact details provided, based on journal requirements

For further information, visit our [Support Center](#).

Additional Material

The submission needs to be accompanied by a covering letter to the editor.

Your cover letter should include the following:

Title, authors, number of pages, and number of tables and figures. Indication that all the authors have read and approved the paper. Description of how each author contributed to the manuscript and others who may have assisted. Name of type of paper. Information about any previous presentation of the data (e.g., at a specific meeting or as a thesis). Information about the existence of any closely related manuscripts that you have submitted for simultaneous consideration to the same or another journal. Notice of any interests that might be seen as influencing the research (e.g., financial interest in a test or procedure, funding by pharmaceutical companies for drug research, etc.). A copy of the permission granted to reproduce or adapt any copyrighted material from another source or a notice that permissions are pending. Indicate the original source(s) in the legend of the illustration, or as appropriate in a footnote to the text. Please submit the CONSORT-check-list for articles that cover clinical trials, the ARRIVE-checklist for animal studies, and the PRISMA checklist for systematic reviews. Names of three potential reviewers with complete contact details. As our objective is to obtain independent reviews that are free from bias, please do NOT suggest people with whom you have worked or published in recent years or anyone who works at your institution. There is no assurance that the editors will choose reviewers from the list you provided.

BEFORE YOU BEGIN

Ethics in publishing

Please see our information pages on [Ethics in publishing](#) and [Ethical guidelines for journal publication](#).

Human and animal rights

If the work involves the use of human subjects, the author should ensure that the work described has been carried out in accordance with [The Code of Ethics of the World Medical Association](#) (Declaration of Helsinki) for experiments involving humans; [Uniform Requirements for manuscripts submitted to Biomedical journals](#). Authors should include a statement in the manuscript that informed consent was obtained for experimentation with human subjects. The privacy rights of human subjects must always be observed.

All animal experiments should comply with the [ARRIVE guidelines](#) and should be carried out in accordance with the U.K. Animals (Scientific Procedures) Act, 1986 and associated guidelines, [EU Directive 2010/63/EU for animal experiments](#), or the National Institutes of Health guide for the care and use of Laboratory animals (NIH Publications No. 8023, revised 1978) and the authors should clearly indicate in the manuscript that such guidelines have been followed.

The protocol for interventional pain studies on humans should be approved by an institutional clinical research board/committee.

Ethics of Animal Experiments

Work described in your article that deals with animal experiments just follow the guidelines listed hereunder.

The experiments must adhere to the guidelines of the Committee for Research and Ethical Issues of IASP [http://www.iasp-pain.org/AM/Template.cfm?Section=Animal_Research]. The study-protocol should be reviewed by an institutional animal care and use committee.

When reporting animal pain research, please follow the ARRIVE Guidelines (Rice A SC et al. *Scand J Pain* 2013;4:58-62; Kontinen VK *Scand J pain* 2013;4:57.) <http://www.nc3rs.org.uk/page.asp?id=1357>.

Declaration of interest

All authors must disclose any financial and personal relationships with other people or organizations that could inappropriately influence (bias) their work. Examples of potential conflicts of interest include employment, consultancies, stock ownership, honoraria, paid expert testimony, patent applications/registrations, and grants or other funding. If there are no conflicts of interest then please state this: 'Conflicts of interest: none'. [More information](#).

Submission declaration and verification

Submission of an article implies that the work described has not been published previously (except in the form of an abstract or as part of a published lecture or academic thesis or as an electronic preprint, see '[Multiple, redundant or concurrent publication](#)' section of our ethics policy for more information), that it is not under consideration for publication elsewhere, that its publication is approved by all authors and tacitly or explicitly by the responsible authorities where the work was carried out, and that, if accepted, it will not be published elsewhere in the same form, in English or in any other language, including electronically without the written consent of the copyright-holder. To verify originality, your article may be checked by the originality detection service [CrossCheck](#).

Changes to authorship

Authors are expected to consider carefully the list and order of authors **before** submitting their manuscript and provide the definitive list of authors at the time of the original submission. Any addition, deletion or rearrangement of author names in the authorship list should be made only **before** the manuscript has been accepted and only if approved by the journal Editor. To request such a change, the Editor must receive the following from the **corresponding author**: (a) the reason for the change in author list and (b) written confirmation (e-mail, letter) from all authors that they agree with the addition, removal or rearrangement. In the case of addition or removal of authors, this includes confirmation from the author being added or removed.

Only in exceptional circumstances will the Editor consider the addition, deletion or rearrangement of authors **after** the manuscript has been accepted. While the Editor considers the request, publication of the manuscript will be suspended. If the manuscript has already been published in an online issue, any requests approved by the Editor will result in a corrigendum.

Reporting clinical trials

Randomized controlled trials should be presented according to the CONSORT guidelines. At manuscript submission, authors must provide the CONSORT checklist accompanied by a flow diagram that illustrates the progress of patients through the trial, including recruitment, enrollment, randomization, withdrawal and completion, and a detailed description of the randomization procedure. The [CONSORT checklist and template flow diagram](#) are available online.

Clinical trials

Please submit the CONSORT check-list with the cover-letter to the Editor. In addition, authors should consider describing the outcome measures following the IMMPACT recommendations (Dworkin et al., *Pain* 2005:113;9-19).

All trials initiated after July 1, 2005 must be registered in a publicly accessible registry before patient inclusion has begun. The name of the registry and the registry number must be included in the method section. Examples of acceptable registries: WHO International Clinical Trials Registry Platform (ICTRP) and ClinicalTrials.gov.

We also recommend that the protocols for systematic reviews be registered at PROSPERO (www.crd.york.ac.uk/prospéro/).

Registration of clinical trials

Registration in a public trials registry is a condition for publication of clinical trials in this journal in accordance with [International Committee of Medical Journal Editors](#) recommendations. Trials must register at or before the onset of patient enrolment. The clinical trial registration number should be included at the end of the abstract of the article. A clinical trial is defined as any research study that prospectively assigns human participants or groups of humans to one or more health-related interventions to evaluate the effects of health outcomes. Health-related interventions include any intervention used to modify a biomedical or health-related outcome (for example drugs, surgical procedures, devices, behavioural treatments, dietary interventions, and process-of-care changes). Health outcomes include any biomedical or health-related measures obtained in patients or participants, including pharmacokinetic measures and adverse events. Purely observational studies (those in which the assignment of the medical intervention is not at the discretion of the investigator) will not require registration.

Copyright

Upon acceptance of an article, authors will be asked to complete a 'Journal Publishing Agreement' (see [more information](#) on this). An e-mail will be sent to the corresponding author confirming receipt of the manuscript together with a 'Journal Publishing Agreement' form or a link to the online version of this agreement.

Subscribers may reproduce tables of contents or prepare lists of articles including abstracts for internal circulation within their institutions. [Permission](#) of the Publisher is required for resale or distribution outside the institution and for all other derivative works, including compilations and translations. If excerpts from other copyrighted works are included, the author(s) must obtain written permission from the copyright owners and credit the source(s) in the article. Elsevier has [preprinted forms](#) for use by authors in these cases.

For open access articles: Upon acceptance of an article, authors will be asked to complete an 'Exclusive License Agreement' ([more information](#)). Permitted third party reuse of open access articles is determined by the author's choice of [user license](#).

Author rights

As an author you (or your employer or institution) have certain rights to reuse your work. [More information](#).

Elsevier supports responsible sharing

Find out how you can [share your research](#) published in Elsevier journals.

Role of the funding source

You are requested to identify who provided financial support for the conduct of the research and/or preparation of the article and to briefly describe the role of the sponsor(s), if any, in study design; in the collection, analysis and interpretation of data; in the writing of the report; and in the decision to submit the article for publication. If the funding source(s) had no such involvement then this should be stated.

Funding body agreements and policies

Elsevier has established a number of agreements with funding bodies which allow authors to comply with their funder's open access policies. Some funding bodies will reimburse the author for the Open Access Publication Fee. Details of [existing agreements](#) are available online.

After acceptance, open access papers will be published under a noncommercial license. For authors requiring a commercial CC BY license, you can apply after your manuscript is accepted for publication.

Open access

This journal offers authors a choice in publishing their research:

Open access

- Articles are freely available to both subscribers and the wider public with permitted reuse.
- An open access publication fee is payable by authors or on their behalf, e.g. by their research funder or institution.

Subscription

- Articles are made available to subscribers as well as developing countries and patient groups through our [universal access programs](#).
- No open access publication fee payable by authors.

Regardless of how you choose to publish your article, the journal will apply the same peer review criteria and acceptance standards.

For open access articles, permitted third party (re)use is defined by the following [Creative Commons user licenses](#):

Creative Commons Attribution-NonCommercial-NoDerivs (CC BY-NC-ND)

For non-commercial purposes, lets others distribute and copy the article, and to include in a collective work (such as an anthology), as long as they credit the author(s) and provided they do not alter or modify the article.

The open access publication fee for this journal is **USD 2750**, excluding taxes. Learn more about Elsevier's pricing policy: <https://www.elsevier.com/openaccesspricing>.

Green open access

Authors can share their research in a variety of different ways and Elsevier has a number of green open access options available. We recommend authors see our [green open access page](#) for further information. Authors can also self-archive their manuscripts immediately and enable public access from their institution's repository after an embargo period. This is the version that has been accepted for publication and which typically includes author-incorporated changes suggested during submission, peer review and in editor-author communications. Embargo period: For subscription articles, an appropriate amount of time is needed for journals to deliver value to subscribing customers before an article becomes freely available to the public. This is the embargo period and it begins from the date the article is formally published online in its final and fully citable form. [Find out more](#).

This journal has an embargo period of 12 months.

Language (usage and editing services)

Please write your text in good English (American or British usage is accepted, but not a mixture of these). Authors who feel their English language manuscript may require editing to eliminate possible grammatical or spelling errors and to conform to correct scientific English may wish to use the [English Language Editing service](#) available from Elsevier's WebShop.

Translations

Mere translations of questionnaires into another language will not be considered for publication except if the study provides information and insights that go beyond the issue of translation. Such data include for example comprehensive validity analyses including factorial validity, divergent and convergent validity or findings with regard to the clinical usefulness of a particular questionnaire.

Informed consent and patient details

Studies on patients or volunteers require ethics committee approval and informed consent, which should be documented in the paper. Appropriate consents, permissions and releases must be obtained where an author wishes to include case details or other personal information or images of patients and any other individuals in an Elsevier publication. Written consents must be retained by the author and copies of the consents or evidence that such consents have been obtained must be provided to Elsevier on request. For more information, please review the [Elsevier Policy on the Use of Images or Personal Information of Patients or other Individuals](#). Unless you have written permission from the patient (or, where applicable, the next of kin), the personal details of any patient included in any part of the article and in any supplementary materials (including all illustrations and videos) must be removed before submission.

Submission

Our online submission system guides you stepwise through the process of entering your article details and uploading your files. The system converts your article files to a single PDF file used in the peer-review process. Editable files (e.g., Word, LaTeX) are required to typeset your article for final publication. All correspondence, including notification of the Editor's decision and requests for revision, is sent by e-mail.

Submit your article

Please submit your article via <http://ees.elsevier.com/sjpain>.

Referees

Please submit the names and institutional e-mail addresses of several potential referees. For more details, visit our [Support site](#). Note that the editor retains the sole right to decide whether or not the suggested reviewers are used.

PREPARATION

NEW SUBMISSIONS

Submission to this journal proceeds totally online and you will be guided stepwise through the creation and uploading of your files. The system automatically converts your files to a single PDF file, which is used in the peer-review process.

As part of the Your Paper Your Way service, you may choose to submit your manuscript as a single file to be used in the refereeing process. This can be a PDF file or a Word document, in any format or layout that can be used by referees to evaluate your manuscript. It should contain high enough quality figures for refereeing. If you prefer to do so, you may still provide all or some of the source files at the initial submission. Please note that individual figure files larger than 10 MB must be uploaded separately.

References

There are no strict requirements on reference formatting at submission. References can be in any style or format as long as the style is consistent. Where applicable, author(s) name(s), journal title/book title, chapter title/article title, year of publication, volume number/book chapter and the pagination must be present. Use of DOI is highly encouraged. The reference style used by the journal will be applied to the accepted article by Elsevier at the proof stage. Note that missing data will be highlighted at proof stage for the author to correct.

Formatting requirements

There are no strict formatting requirements but all manuscripts must contain the essential elements needed to convey your manuscript, for example Abstract, Keywords, Introduction, Materials and Methods, Results, Conclusions, Artwork and Tables with Captions.

If your article includes any Videos and/or other Supplementary material, this should be included in your initial submission for peer review purposes.

Divide the article into clearly defined sections.

Figures and tables embedded in text

Please ensure the figures and the tables included in the single file are placed next to the relevant text in the manuscript, rather than at the bottom or the top of the file. The corresponding caption should be placed directly below the figure or table.

Peer review

This journal operates a single blind review process. All contributions will be initially assessed by the editor for suitability for the journal. Papers deemed suitable are then typically sent to a minimum of two independent expert reviewers to assess the scientific quality of the paper. The Editor is responsible for the final decision regarding acceptance or rejection of articles. The Editor's decision is final. [More information on types of peer review](#).

REVISED SUBMISSIONS

Use of word processing software

Regardless of the file format of the original submission, at revision you must provide us with an editable file of the entire article. Keep the layout of the text as simple as possible. Most formatting codes will be removed and replaced on processing the article. The electronic text should be prepared in a way very similar to that of conventional manuscripts (see also the [Guide to Publishing with Elsevier](#)). See also the section on Electronic artwork.

To avoid unnecessary errors you are strongly advised to use the 'spell-check' and 'grammar-check' functions of your word processor.

Article headings - numbered sections

Divide your article into clearly defined and numbered main sections (see below). The subsections should then be numbered 1.1 (then 1.1.1, 1.1.2, ...), 1.2, etc. (the abstract (500 words) is not included in section numbering). Use this numbering also for internal cross-referencing: do not just refer to 'the text'. Any subsection is given a brief subheading. Each heading/subheading should appear on its own separate line.

1. Introduction (limit to about 500 words)

Describe briefly the background and why this study is important and interesting. State clearly the objectives and aims of this study.

2. Material and methods (no limits)

Provide sufficient detail to allow the work to be reproduced. Methods already published should be indicated by a reference: only relevant modifications should be described.

3. Results (no limits)

Results should be clear and concise.

4. Discussion (limit about 1,500 words)

This should explore the significance of the results of the work, not repeat them. A combined Results and Discussion section can be appropriate. Avoid extensive citations and discussion of published literature.

5. Conclusions

The main conclusions **based solely on the data** of the study.

6. Implications

What do the authors think their findings and conclusions mean: The wider interpretation and possible consequences of their findings?

Ethical issues

Please use this section to detail how issues relating to informed consent were handled. Also state whether or not Ethical Board/Ethical Committee approval of the study protocol was needed. Please confirm whether the study protocol was registered; and if so, where it was registered.

Conflicts of interest

State any potential conflicts of interest, as detailed above.

Appendices

If there is more than one appendix, they should be identified as A, B, etc. Formulae and equations in appendices should be given separate numbering: Eq. (A.1), Eq. (A.2), etc.; in a subsequent appendix, Eq. (B.1) and so on. Similarly for tables and figures: Table A.1; Fig. A.1, etc.

Essential title page information

- **Title.** Concise and informative. Titles are often used in information-retrieval systems. Avoid abbreviations and formulae where possible.
- **Author names and affiliations.** Please clearly indicate the given name(s) and family name(s) of each author and check that all names are accurately spelled. Present the authors' affiliation addresses (where the actual work was done) below the names. Indicate all affiliations with a lower-case superscript letter immediately after the author's name and in front of the appropriate address. Provide the full postal address of each affiliation, including the country name and, if available, the e-mail address of each author.
- **Corresponding author.** Clearly indicate who will handle correspondence at all stages of refereeing and publication, also post-publication. **Ensure that the e-mail address is given and that contact details are kept up to date by the corresponding author.**
- **Present/permanent address.** If an author has moved since the work described in the article was done, or was visiting at the time, a 'Present address' (or 'Permanent address') may be indicated as a footnote to that author's name. The address at which the author actually did the work must be retained as the main, affiliation address. Superscript Arabic numerals are used for such footnotes.

Page numbering

When preparing your files for submission, you must insert page numbers to your main manuscript file.

Structured abstract

A structured abstract, by means of appropriate headings, should provide the context or background for the research and should state its purpose, basic procedures (selection of study subjects or laboratory animals, observational and analytical methods), main findings (giving specific effect sizes and their statistical significance, if possible), and principal conclusions. It should emphasize new and important aspects of the study or observations.

NOTE: This abstract will also be published in the printed version of this hybrid journal, **with an editorial comment** prepared by the Editor. **Use 500 words** with the following **subheadings in bold (some variations allowed for reviews and case reports/observational studies): Background and aims Methods Results Conclusions** (based on your data) **Implications** (your opinion on what your findings mean) **References** should be avoided, but if essential, then cite the author(s) and year(s), as well as the [number] in the list of references of the paper. Non-standard or uncommon abbreviations should be avoided, but if essential they must be defined at their first mention in the abstract itself.

It is possible to submit a single illustration if considered essential to summarising the topic, accompanied by a short concise legend. Editorially approved color illustrations will be reproduced in color in the printed journal at no additional charge. Color reproduction is as outlined under the **Color Artwork** section below

Graphical abstract

Although a graphical abstract is optional, its use is encouraged as it draws more attention to the online article. The graphical abstract should summarize the contents of the article in a concise, pictorial form designed to capture the attention of a wide readership. Graphical abstracts should be submitted as a separate file in the online submission system. Image size: Please provide an image with a minimum of 531 × 1328 pixels (h × w) or proportionally more. The image should be readable at a size of 5 × 13 cm using a regular screen resolution of 96 dpi. Preferred file types: TIFF, EPS, PDF or MS Office files. You can view [Example Graphical Abstracts](#) on our information site.

Authors can make use of Elsevier's Illustration and Enhancement service to ensure the best presentation of their images and in accordance with all technical requirements: [Illustration Service](#).

Highlights

Highlights are mandatory for this journal. They consist of a short collection of bullet points that convey the core findings of the article and should be submitted in a separate editable file in the online submission system. Please use 'Highlights' in the file name and include 3 to 5 bullet points (maximum 85 characters, including spaces, per bullet point). You can view [example Highlights](#) on our information site.

Keywords

Immediately after the abstract, provide a maximum of 6 keywords, and avoiding general and plural terms and multiple concepts (avoid, for example, 'and', 'of'). Be sparing with abbreviations: only abbreviations firmly established in the field may be eligible. These keywords will be used for indexing purposes.

Abbreviations

Define abbreviations that are not standard in this field in a footnote to be placed on the first page of the article. Such abbreviations that are unavoidable in the abstract must be defined at their first mention there, as well as in the footnote. Ensure consistency of abbreviations throughout the article.

Acknowledgements

Collate acknowledgements in a separate section at the end of the article before the references and do not, therefore, include them on the title page, as a footnote to the title or otherwise. List here those individuals who provided help during the research (e.g., providing language help, writing assistance or proof reading the article, etc.).

Formatting of funding sources

List funding sources in this standard way to facilitate compliance to funder's requirements:

Funding: This work was supported by the National Institutes of Health [grant numbers xxxx, yyyy]; the Bill & Melinda Gates Foundation, Seattle, WA [grant number zzzz]; and the United States Institutes of Peace [grant number aaaa].

It is not necessary to include detailed descriptions on the program or type of grants and awards. When funding is from a block grant or other resources available to a university, college, or other research institution, submit the name of the institute or organization that provided the funding.

If no funding has been provided for the research, please include the following sentence:

This research did not receive any specific grant from funding agencies in the public, commercial, or not-for-profit sectors.

Units

Temperatures should be given in degrees Celsius and blood pressures in millimetres of mercury or kPa with the alternative units in parentheses. All other measurements including laboratory measurements should be reported in the metric system in terms of the International System of Units (SI), e.g. metre [m], litre [L], kilogram [kg].

Abbreviations should be limited and defined after the first use of the term.

Drug Names

Generic names of drugs should be used where possible. When quoting from specific materials on proprietary drugs, authors must state in parentheses the name and address of the manufacturer.

Math formulae

Please submit math equations as editable text and not as images. Present simple formulae in line with normal text where possible and use the solidus (/) instead of a horizontal line for small fractional terms, e.g., X/Y. In principle, variables are to be presented in italics. Powers of e are often more conveniently denoted by exp. Number consecutively any equations that have to be displayed separately from the text (if referred to explicitly in the text).

Footnotes

Footnotes should be used sparingly. Number them consecutively throughout the article. Many word processors build footnotes into the text, and this feature may be used. Should this not be the case, indicate the position of footnotes in the text and present the footnotes themselves separately at the end of the article.

Artwork

Electronic artwork

General points

- Make sure you use uniform lettering and sizing of your original artwork.
- Preferred fonts: Arial (or Helvetica), Times New Roman (or Times), Symbol, Courier.
- Number the illustrations according to their sequence in the text.
- Use a logical naming convention for your artwork files.
- Indicate per figure if it is a single, 1.5 or 2-column fitting image.
- For Word submissions only, you may still provide figures and their captions, and tables within a single file at the revision stage.
- Please note that individual figure files larger than 10 MB must be provided in separate source files. A detailed [guide on electronic artwork](#) is available.

You are urged to visit this site; some excerpts from the detailed information are given here.

Formats

Regardless of the application used, when your electronic artwork is finalized, please 'save as' or convert the images to one of the following formats (note the resolution requirements for line drawings, halftones, and line/halftone combinations given below):

EPS (or PDF): Vector drawings. Embed the font or save the text as 'graphics'.

TIFF (or JPG): Color or grayscale photographs (halftones): always use a minimum of 300 dpi.

TIFF (or JPG): Bitmapped line drawings: use a minimum of 1000 dpi.

TIFF (or JPG): Combinations bitmapped line/half-tone (color or grayscale): a minimum of 500 dpi is required.

Please do not:

- Supply files that are optimized for screen use (e.g., GIF, BMP, PICT, WPG); the resolution is too low.
- Supply files that are too low in resolution.
- Submit graphics that are disproportionately large for the content.

Color artwork

Please make sure that artwork files are in an acceptable format (TIFF (or JPEG), EPS (or PDF), or MS Office files) and with the correct resolution. If, together with your accepted article, you submit usable color figures then Elsevier will ensure, at no additional charge, that these figures will appear in color online (e.g., ScienceDirect and other sites) regardless of whether or not these illustrations are reproduced in color in the printed version. **For color reproduction in print, you will receive information regarding the costs from Elsevier after receipt of your accepted article.** Please indicate your preference for color: in print or online only. [Further information on the preparation of electronic artwork.](#)

Figure captions

Ensure that each illustration has a caption. A caption should comprise a brief title (**not** on the figure itself) and a description of the illustration. Keep text in the illustrations themselves to a minimum but explain all symbols and abbreviations used.

Tables

Please submit tables as editable text and not as images. Tables can be placed either next to the relevant text in the article, or on separate page(s) at the end. Number tables consecutively in accordance with their appearance in the text and place any table notes below the table body. Be sparing in the use of tables and ensure that the data presented in them do not duplicate results described elsewhere in the article. Please avoid using vertical rules and shading in table cells.

References

Text: Indicate references by number(s) in [square brackets] in line with the text-consecutively as they are cited. The actual authors can be referred to, but the reference number(s) must always be given.

List: Number the references [numbers in square brackets] in the list in the order in which they appear in the text.

Note **shortened form for last page number**. e.g., 51-9, and that **ALL authors** should be listed (et al. is not permitted), and **do NOT include issue number(s)**.

Examples:

Reference to a journal publication:

[1] Stabell N, Stubhaug A, Flægstad T, Nielsen CS. Increased pain sensitivity among adults reporting irritable bowel syndrome symptoms in a large population-based study. *Pain* 2013;154:385-92.

[2] Kontinen V, Kalso E. Why we are proud to publish well-performed negative clinical studies? *Scand J Pain* 2013;4:15-6.

Reference to a book:

[3] Strunk Jr W, White EB. *The elements of style*. 3 ed. New York: Macmillan; 1979.

[4] Breivik H, Campbell WI, Nicholas MK. *Clinical Pain management. Practice and Procedures*. (2nd ed) London: Hodder Arnold; 2008

Reference to a chapter in an edited book:

[5] Jensen TS, Finnerup NB. Central Pain. In: McMahon SB, Tracey I, Koltzenburg M, Turk DC, editors. *Wall and Melzack's Textbook of Pain*. 6th ed. London: Saunders; 2013, p 990-1002.

Title of publications in any non-English language should be written with [English translation in brackets]. Example:

[6] Breivik H, Stubhaug A. [Difficult drug reimbursement system for pain patients]. *Tidsskr Nor Laegeforen* 2013;133:130.

Personal communications, manuscripts in preparation and other unpublished data should not be cited in the reference list but may be mentioned in the text in parentheses.

Web references

As a minimum, the full URL should be given and the date when the reference was last accessed. Any further information, if known (DOI, author names, dates, reference to a source publication, etc.), should also be given. Web references can be listed separately (e.g., after the reference list) under a different heading if desired, or can be included in the reference list.

Data references

This journal encourages you to cite underlying or relevant datasets in your manuscript by citing them in your text and including a data reference in your Reference List. Data references should include the following elements: author name(s), dataset title, data repository, version (where available), year, and global persistent identifier. Add [dataset] immediately before the reference so we can properly identify it as a data reference. The [dataset] identifier will not appear in your published article.

[dataset] [7] Oguro M, Imahiro S, Saito S, Nakashizuka T. Mortality data for Japanese oak wilt disease and surrounding forest compositions, Mendeley Data, v1; 2015. <http://dx.doi.org/10.17632/xwj98nb39r.1>.

References in a special issue

Please ensure that the words 'this issue' are added to any references in the list (and any citations in the text) to other articles in the same Special Issue.

Reference management software

Most Elsevier journals have their reference template available in many of the most popular reference management software products. These include all products that support [Citation Style Language styles](#), such as [Mendeley](#) and [Zotero](#), as well as [EndNote](#). Using the word processor plug-ins from these products, authors only need to select the appropriate journal template when preparing their article, after which citations and bibliographies will be automatically formatted in the journal's style. If no template is yet available for this journal, please follow the format of the sample references and citations as shown in this Guide.

Users of Mendeley Desktop can easily install the reference style for this journal by clicking the following link:

<http://open.mendeley.com/use-citation-style/scandinavian-journal-of-pain>

When preparing your manuscript, you will then be able to select this style using the Mendeley plug-ins for Microsoft Word or LibreOffice.

Reference formatting

There are no strict requirements on reference formatting at submission. References can be in any style or format as long as the style is consistent. Where applicable, author(s) name(s), journal title/book title, chapter title/article title, year of publication, volume number/book chapter and the pagination must be present. Use of DOI is highly encouraged. The reference style used by the journal will be applied to the accepted article by Elsevier at the proof stage. Note that missing data will be highlighted at proof stage for the author to correct. If you do wish to format the references yourself they should be arranged according to the following examples:

Journal abbreviations source

Journal names should be abbreviated according to the [List of Title Word Abbreviations](#).

Video

Elsevier accepts video material and animation sequences to support and enhance your scientific research. Authors who have video or animation files that they wish to submit with their article are strongly encouraged to include links to these within the body of the article. This can be done in the same way as a figure or table by referring to the video or animation content and noting in the body text where it should be placed. All submitted files should be properly labeled so that they directly relate to the video file's content. In order to ensure that your video or animation material is directly usable, please provide the files in one of our recommended file formats with a preferred maximum size of 150 MB. Video and animation files supplied will be published online in the electronic version of your article in Elsevier Web products, including [ScienceDirect](#). Please supply 'stills' with your files: you can choose any frame from the video or animation or make a separate image. These will be used instead of standard icons and will personalize the link to your video data. For more detailed instructions please visit our [video instruction pages](#). Note: since video and animation cannot be embedded in the print version of the journal, please provide text for both the electronic and the print version for the portions of the article that refer to this content.

Supplementary material

Supplementary material such as applications, images and sound clips, can be published with your article to enhance it. Submitted supplementary items are published exactly as they are received (Excel or PowerPoint files will appear as such online). Please submit your material together with the article and supply a concise, descriptive caption for each supplementary file. If you wish to make changes to

supplementary material during any stage of the process, please make sure to provide an updated file. Do not annotate any corrections on a previous version. Please switch off the 'Track Changes' option in Microsoft Office files as these will appear in the published version.

AudioSlides

The journal encourages authors to create an AudioSlides presentation with their published article. AudioSlides are brief, webinar-style presentations that are shown next to the online article on ScienceDirect. This gives authors the opportunity to summarize their research in their own words and to help readers understand what the paper is about. [More information and examples are available](#). Authors of this journal will automatically receive an invitation e-mail to create an AudioSlides presentation after acceptance of their paper.

Google Maps and KML files

KML (Keyhole Markup Language) files (optional): You can enrich your online articles by providing KML or KMZ files which will be visualized using Google maps. The KML or KMZ files can be uploaded in our online submission system. KML is an XML schema for expressing geographic annotation and visualization within Internet-based Earth browsers. Elsevier will generate Google Maps from the submitted KML files and include these in the article when published online. Submitted KML files will also be available for downloading from your online article on ScienceDirect. [More information](#).

AFTER ACCEPTANCE

Proofs

One set of page proofs (as PDF files) will be sent by e-mail to the corresponding author (if we do not have an e-mail address then paper proofs will be sent by post) or, a link will be provided in the e-mail so that authors can download the files themselves. Elsevier now provides authors with PDF proofs which can be annotated; for this you will need to [download the free Adobe Reader](#), version 9 (or higher). Instructions on how to annotate PDF files will accompany the proofs (also given online). The exact system requirements are given at the [Adobe site](#).

If you do not wish to use the PDF annotations function, you may list the corrections (including replies to the Query Form) and return them to Elsevier in an e-mail. Please list your corrections quoting line number. If, for any reason, this is not possible, then mark the corrections and any other comments (including replies to the Query Form) on a printout of your proof and scan the pages and return via e-mail. Please use this proof only for checking the typesetting, editing, completeness and correctness of the text, tables and figures. Significant changes to the article as accepted for publication will only be considered at this stage with permission from the Editor. We will do everything possible to get your article published quickly and accurately. It is important to ensure that all corrections are sent back to us in one communication: please check carefully before replying, as inclusion of any subsequent corrections cannot be guaranteed. Proofreading is solely your responsibility.

AUTHOR INQUIRIES

Visit the [Elsevier Support Center](#) to find the answers you need. Here you will find everything from Frequently Asked Questions to ways to get in touch.

You can also [check the status of your submitted article](#) or find out [when your accepted article will be published](#).
