DESCRIPTION

Scientific African is a peer reviewed, open access, inter- and multidisciplinary scientific journal that is dedicated to expanding access to African research, increasing intra-African scientific collaboration, and building academic research capacity in Africa. The journal aims to provide a modern, highly-visible platform for publishing pan-African research and welcomes submissions from all scientific disciplines in the following broad categories:

AGF - Agriculture and Food Security
CHE - Chemistry
CON - Conservation and Sustainability Studies
ECO - Economics and Business
ENV - Environmental and Geosciences
ITE - Information Technology and Engineering
LIF - Life and Health Sciences
MAT - Mathematics
PHY - Physical Sciences
SOC - Social Sciences and Policy

The journal welcomes submissions of full text research articles, reviews but also publishes invited perspectives and critical policy papers.

ABSTRACTING AND INDEXING

EDITORIAL BOARD

Editor-in-Chief
Benji Gyampoh, Kwame Nkrumah University of Science and Technology Department of Fisheries and Watershed Management, Kumasi, Ghana
Editors

Agriculture and Food Security

Robert C. Abaidoo, Kwame Nkrumah University of Science and Technology, Ghana
Soil microbe-Plant interaction, Food systems, Environment Sciences

Mohammed Gagaoua, Teagasc Food Research Centre Ashtown, Ireland
OMICS, Muscle and meat biochemistry, Biomarkers of meat quality, Meat tenderization, Rearing practices and meat quality

Hannah Wangari Karuri, University of Embu, Department of Biological Sciences, Kenya
Crop diseases, Plant Ecology, Diversity of soil microorganisms and plants, Soil Science, Climate change effects on agriculture, Biotechnology

Ali Keshavarzi, University of Tehran Department of Soil Science, Iran

Donald Kugonza, Makerere University, Uganda
Animal Science, Apiculture, Poultry science, Livestock management.

Dharini Sivakumar, Tshwane University of Technology, South Africa
Food chemistry, Food technology, Postharvest technology, Agricultural chemistry, Indigenous food, Traditional recipes, Fermentation

Emma T. Steenkamp, University of Pretoria Forestry and Agricultural Biotechnology Institute, South Africa
Microbial genetics, Microbial systematics, Microbial genomics, Microbial evolution, Plant pathology

Chemistry

Mouad Dahbi, Mohammed VI Polytechnic University Department of Materials Science and Nano engineering, Morocco
Fundamental electrochemistry, Computational and theoretical electrochemistry, Batteries and power sources, Electrode and electrolyte materials, Electrodeposition and surface treatment, Desalination and Water Treatment

Mehdi Derradji, Polytechnic Military School, Algeria
Polymers Chemistry, Nanomaterials, Composites and Biocomposites, Polymer Membranes

Ross D. Jansen-van Vuuren, Queen’s University Department of Chemistry, Canada
Organic Electronics, Polymer Chemistry, Water Purification, Organic Synthesis, Chemistry Education, Polymer structure determination

Moses K. Langat, Royal Botanic Gardens Kew, United Kingdom
Natural Products Chemistry, Medicinal and other uses of plants and fungi, Spectroscopic and spectrometric analysis of organic compounds, Synthetic Chemistry, Separation Chemistry

Fidele Ntie-Kang, University of Buea, Department of Chemistry, Molecular Simulations Laboratory, Cameroon
Data Analysis, Data Collection, Database Development, Natural Product Chemistry, Protein Structure, Proteins, Medicinal and Pharmaceutical Chemistry, Computational Chemistry, Chromatography, Molecular Dynamics Simulation

Conservation and Sustainability Studies

Timothy Dube, University of the Western Cape, South Africa
Earth observation applications, Environmental modelling, Biodiversity/ ecosystems assessment, water resources assessment, Big data integration and analytics

Edson Gandiwa, Chinhoyi University of Technology, School of Wildlife, Ecology and Conservation, Zimbabwe
Conservation biology, protected area management, human-wildlife interactions, media framing of wildlife conservation, plant ecology

Abdelazim Negm, Zagazig University Faculty of Engineering, Egypt
Sustainability studies, sustainable development and green environment in addition to water resources management (hydraulics and hydrology).

Lucienne Wilmé, World Resources Institute Africa Madagascar Program, Madagascar
Biogeography, Biodiversity, Conservation, Forest, Geomorphology,

Economics and Business

Kamila Ait Yahia, Algiers School of Higher Studies in Business, Algeria
Marketing, Tourism marketing, Qualitative study, Territorial marketing, Digital marketing

Rangan Gupta, University of Pretoria Department of Economics, South Africa
Macroeconomics, Time series, Financial Economics, Open Economy Macroeconomics

Seán M. Muller, University of Johannesburg Public and Environment Economic Research Centre, South Africa
Applied microeconomics and microeconometrics, public economics, public finance, economics of education and higher education, and philosophy of economics

Muna Shifa, University of Cape Town School of Economics, South Africa
Land ownership and Tenure, Economic welfare and well-being, Economic Development
**Environmental and Geosciences**

**Asfawossen Asrat**, Addis Ababa University School of Earth Science, Ethiopia  
Terrestrial Processes, Paleoclimate-paleoenvironment reconstructions, Geochemistry-petrology, Geoheritage-geoarchaeology

**Paxie W. Chirwa**, University of Pretoria, South Africa  
Agroforestry, forest ecology, forestry, soil moisture, soil nutrients

**Nadjib Drouiche**, National Research Centre of Semiconductor Technologies for the Energy Sector, Algeria  
Desalination, Water treatment, Wastewater, WEF Nexus, Electrogoagulation, Hevy Metals, Bioremediation

**Ahmed Kenawy**, Mansoura University, Department of Geography, Egypt  
Climate Change and Variability, Hydrology, Geographical sciences, Remote sensing

**Ackmez Mudhoo**, University of Mauritius, Mauritius  
Bio/Remediation of solid/liquid wastes, Bioenergy production, Ultrasound & microwave–assisted biomass processing, Chemical Process Analysis

**Anthony Okoh**, University of Fort Hare Department of Biochemistry and Microbiology, South Africa  
Applied and Environmental Microbiology

**Almeida Sitoe**, Eduardo Mondlane University, Department of Forestry, Mozambique  
Forests and climate change, Climate change adaptation and mitigation, Forest dynamics, Biodiversity conservation, Social ecological systems, sustainable forest management, slash and burn agriculture

**Information Technology and Engineering**

**Robert Andoh**, AWD Consulting, United States of America  
Water Technology, Water Engineering

**Nana Yaw Asiedu**, Kwame Nkrumah University of Science and Technology Department Of Chemical Engineering, Ghana  
Chemical Engineering, Materials Engineering, Synthetic chemistry, Analytical Chemistry, Process Economics

**Anton Du Plessis**, Stellenbosch University Department of Physics, South Africa  
Additive manufacturing, X-ray tomography, biomimicry

**Mohamed Elhoseny**, Mansoura University Faculty of Computers and Information, Egypt  
Sensors & Ad-hoc Networks, Internet of Things (IoT), Data Security, Optimization Algorithms, Smart Cities Applications, Intelligent Systems

**Aboul Ella Hassanein**, Cairo University Faculty of Computers and Information, Egypt  
Artificial intelligence, Biotechnology

**Ali Idri**, Mohammed V University of Rabat National School of Computer Science and Systems Analysis, Morocco  
Software engineering, Machine learning and Medical informatics

**Amos Kabo-bah**, University of Energy and Natural Resources, Ghana  
General Engineering, Information Technologies, Environmental Engineering.

**Essam E. Khalil**, Cairo University Faculty of Engineering, Egypt  
Mechanical Engineering, Combustion, Thermal Power and Heat Transfer

**Slimane Merouani**, University of Constantine 3, Algeria  
Advanced oxidation processes (AOPs), Sonochemistry, Water treatment, Chemical engineering, Hydrogen energy

**Sanjay Misra**, Covenant University, Nigeria  
Software Engineering, Health Informatics, Sustainability Development Goals, Cyber Security, Web Engineering

**Anicia Peters**, Namibia University of Science and Technology, Namibia  

**Rashid A. Saed**, Sudan University of Science and Technology, Sudan  
Electronics Engineering, Telecomm, Wireless, IT, Computer Engineering, Networking

**Wellington Didibhuku Thwala**, University of Johannesburg, South Africa  
Infrastructure, Civil Engineering, Construction Engineering, Construction Project Management, Supply Chain, Construction Health and Safety, and Housing Studies

**Life and Health Sciences**

**Raphael N. Aologa**, China Pharmaceutical University, China  
Pharmacognosy, OMICS Techniques, Pharmacology, Pharmaceutical Analysis, Nanotechnology, Food Science

**Samuel Asare-Nkansah**, Kwame Nkrumah University of Science and Technology Department of Pharmaceutical Chemistry, Ghana
Pharmaceutical Analysis, Drug discovery and design, Natural product drug discovery, Drug quality control and quality assurance, Complementary and Alternative medicine, Drug delivery

**Robert Peter Biney**, University of Cape Coast, Ghana
Neuropharmacology, Natural Product Drug Discovery, Neurochemistry

**Josiane Desiree Etang**, University of Douala Faculty of Medicine and Pharmaceutical Sciences, Cameroon
Vector Borne and Parasitic Diseases, Vector Biology and Ecology, Mosquito Control, Insect Resistance to Insecticides, Development and assessment of new vector control tools

**Maher Gtari**, National Institute Of Applied Sciences And Technology, University Of Carthage, Tunisia
Bacteriology, Plant-Microbe interactions, Geomicrobiology, Microbial Ecology

**Fredros Okumu**, Ifakara Health Institute, Tanzania, United Republic of Infectious Diseases, Public Health, Malaria, Mosquitoes, Vector Control

**Alaa el-din Hamid Sayed**, Assiut University, Department of Zoology, Egypt
Fish Toxicology, Environmental Pollution, Aquaculture and Aquatic Toxicology

**Nicholas Thomford**, University of Cape Town Division of Human Genetics, South Africa
Genomics and health, Infectious disease/communicable diseases, Health Policy, Natural products and traditional medicine, Non-communicable diseases, Microbiome

**Mathematics**

**Florian Luca**, University Of The Witwatersrand, School Of Mathematics, South Africa
Mathematics, Number Theory, Combinatorics, Algebra

**Sandile Motsa**, University of Eswatini, Department of Mathematics, Eswatini
Finite Difference Methods, Spectral Methods, Iterative Methods, Computational Methods, Computational Solutions, Programming, Mathematical Modelling, Boundary Layer Flows, Channel Flows, Ordinary Differential Methods, Partial Differential Methods, Numerical Solutions for Differential Equations, Modelling Infectious Diseases, Mathematical Epidemiology

**Hilary Izuchukwu Okagbue**, Covenant University, Nigeria
Data Science, Mathematical Statistics

**Aissa Wade**, The Pennsylvania State University Department of Mathematics, United States of America
Differential geometry, Contact geometry, Poisson geometry, and mathematical physics

**Physical Sciences**

**Mohamed Hassan Eisa**, Sudan University of Science and Technology Department of Physics, Sudan
Ion beam physics, semiconductor nanostructures, optoelectronics and biomedical materials

**Waled M. Moslem**, Port Said University, Department of Physics, Egypt
Theoretical Plasma Physics, with emphasis on Nonlinear Dynamics, Waves and Instabilities in Classical and Quantum Plasmas, Plasmonics, Drift Waves, Wake Potential, Soliton Collision, Plasma Expansion, as well as Nanostructures in Surface Materials

**Social Sciences and Policy**

**Jude Ndzifon Kimengsi**, University of Bamenda, Cameroon
Policy, migration, co-management, livelihoods, climate adaptation

**Jayne Rogerson**, University of Johannesburg, School of Tourism and Hospitality, South Africa
Tourism Studies - tourism accommodation, urban tourism, historical tourism, tourism and sustainability. Urban Studies - Urban economy, urban histories, urban greening

**Charlie Shackleton**, Rhodes University, Department of Environmental Science, South Africa
Non-timber forest products, rural livelihoods, land and resource use, urban greening/forestry, provisioning ecosystem service

**Adam Sneyd**, University of Guelph Department of Political Science, Canada
Governance, sustainable development, political economy, commodities, politics and policy in African contexts

**Peter Szyszlo**, African Institute for Mathematical Sciences, Canada
Comparative and international higher education, globalization, the knowledge society/economy, internationalization, innovation transfer, mapping institutional change

**NEF Community of Scientists**

**Amna Abdalla Mohammed Khalid**, University of Göttingen III Institute of Physics, Göttingen, Germany

**Oluwafemi Akande**, Federal University of Technology Minna Department of Architecture, Minna, Nigeria

**Yabebal Fantaye**, African Institute for Mathematical Sciences, Muizenberg, South Africa

**Charles Lebon Mberi Kimpolo**, African Institute for Mathematical Sciences Rwandada, Kigali, Rwanda

**Aneth David Mwakilili**, University of Dar es Salaam, Dar es Salaam, Tanzania, United Republic of

**Sanushka Naidoo**, University of Pretoria, Pretoria, South Africa
Plant Genetics, Plant Biotechnology, Molecular Plant Microbe Interactions, Plant Genomics, Plant resilience
Advisory Board

Berhanu Abegaz, University of Johannesburg, Auckland Park, South Africa
Abdon Atangana, University of the Free State Faculty of Natural and Agricultural Sciences, Bloemfontein, South Africa

Ghada Bassioni, Ain Shams University Faculty of Engineering, Cairo, Egypt
Abdallah Daar, University of Toronto, Toronto, Canada
David Dodoo-Arhin, University of Ghana, Legon, Ghana
Abba Gumel, Arizona State University, Tempe, United States of America
Ameenah Gurib-Fakim

Eliane Ubalijoro, McGill University Institute for the Study of International Development, Montréal, Canada
**GUIDE FOR AUTHORS**

*Your Paper Your Way*

We now differentiate between the requirements for new and revised submissions. You may choose to submit your manuscript as a single Word or PDF file to be used in the refereeing process. Only when your paper is at the revision stage, will you be requested to put your paper in to a 'correct format' for acceptance and provide the items required for the publication of your article.

*To find out more, please visit the Preparation section below.*

**INTRODUCTION**

*Types of Articles*

Research papers - original full-length research papers that have not been published previously, except in a preliminary form, and should not exceed 7,500 words from introduction to conclusion (not including references) (including no more than six tables and figures combined - additional tables and figures can be submitted as supplementary material). Research papers should not contain more than 40 references. Review articles - will be accepted in areas of topical interest, will normally focus on literature published over the previous five years, and should not exceed 10,000 words from introduction to conclusion (not including references) (including allowance for no more than six tables and figures combined). Review articles should not contain more than 120 references. If it is felt absolutely necessary to exceed these numbers (tables, figures, references), please contact the editorial office for advice before submission. Short communications - Short communications of up to 3000 words from introduction to conclusion (not including references), describing work that may be of a preliminary nature but merits publication. These papers should not contain more than 40 references. Letters to the Editor - Letters are published from time to time on matters of topical interest.

*Article Section*

At submission, authors are requested to indicate a discipline their manuscript belongs to by selecting one from the following broad categories:

Agriculture and Food Security Chemistry Conservation and Sustainability Studies Economics and Business Environmental and Geosciences Information Technology and Engineering Life and Health Sciences Mathematics Physical Sciences Social Sciences and Policy

*Submission checklist*

You can use this list to carry out a final check of your submission before you send it to the journal for review. Please check the relevant section in this Guide for Authors for more details.

**Ensure that the following items are present:**

One author has been designated as the corresponding author with contact details:
- E-mail address
- Full postal address

All necessary files have been uploaded:

*Manuscript:*
- Include keywords
- All figures (include relevant captions)
- All tables (including titles, description, footnotes)
- Ensure all figure and table citations in the text match the files provided
- Indicate clearly if color should be used for any figures in print

*Graphical Abstracts / Highlights files* (where applicable)

*Supplemental files* (where applicable)

Further considerations
- Manuscript has been 'spell checked' and 'grammar checked'
- All references mentioned in the Reference List are cited in the text, and vice versa
- Permission has been obtained for use of copyrighted material from other sources (including the Internet)
- A competing interests statement is provided, even if the authors have no competing interests to declare
BEFORE YOU BEGIN

Ethics in publishing
Please see our information on Ethics in publishing.

Studies in humans and animals
If the work involves the use of human subjects, the author should ensure that the work described has been carried out in accordance with The Code of Ethics of the World Medical Association (Declaration of Helsinki) for experiments involving humans. The manuscript should be in line with the Recommendations for the Conduct, Reporting, Editing and Publication of Scholarly Work in Medical Journals and aim for the inclusion of representative human populations (sex, age and ethnicity) as per those recommendations. The terms sex and gender should be used correctly.

Authors should include a statement in the manuscript that informed consent was obtained for experimentation with human subjects. The privacy rights of human subjects must always be observed.

All animal experiments should comply with the ARRIVE guidelines and should be carried out in accordance with the U.K. Animals (Scientific Procedures) Act, 1986 and associated guidelines, EU Directive 2010/63/EU for animal experiments, or the National Institutes of Health guide for the care and use of Laboratory animals (NIH Publications No. 8023, revised 1978) and the authors should clearly indicate in the manuscript that such guidelines have been followed. The sex of animals must be indicated, and where appropriate, the influence (or association) of sex on the results of the study.

Declaration of competing interest
All authors must disclose any financial and personal relationships with other people or organizations that could inappropriately influence (bias) their work. Examples of potential conflicts of interest include employment, consultancies, stock ownership, honoraria, paid expert testimony, patent applications/registrations, and grants or other funding. Authors should complete the declaration of competing interest statement using this template and upload to the submission system at the Attach/Upload Files step. Note: Please do not convert the .docx template to another file type. Author signatures are not required. If there are no interests to declare, please choose the first option in the template. More information.

Authors (or research teams) whose work has been rejected by Scientific African three times in succession within any 12-month period, will not have their subsequent submissions considered for publication by the journal for 12 months after their last unsuccessful submission. Submission of an article implies that the work described has not been published previously (except in the form of an abstract, a published lecture or academic thesis, see 'Multiple, redundant or concurrent publication' for more information), that it is not under consideration for publication elsewhere, that its publication is approved by all authors and tacitly or explicitly by the responsible authorities where the work was carried out, and that, if accepted, it will not be published elsewhere in the same form, in English or in any other language, including electronically without the written consent of the copyright-holder.

Use of inclusive language
Inclusive language acknowledges diversity, conveys respect to all people, is sensitive to differences, and promotes equal opportunities. Content should make no assumptions about the beliefs or commitments of any reader; contain nothing which might imply that one individual is superior to another on the grounds of age, gender, race, ethnicity, culture, sexual orientation, disability or health condition; and use inclusive language throughout. Authors should ensure that writing is free from bias, stereotypes, slang, reference to dominant culture and/or cultural assumptions. We advise to seek gender neutrality by using plural nouns ("clinicians, patients/clients") as default/wherever possible to avoid using "he, she," or "he/she." We recommend avoiding the use of descriptors that refer to personal attributes such as age, gender, race, ethnicity, culture, sexual orientation, disability or health condition unless they are relevant and valid. These guidelines are meant as a point of reference to help identify appropriate language but are by no means exhaustive or definitive.
Contributors
Each author is required to declare his or her individual contribution to the article: all authors must have materially participated in the research and/or article preparation, so roles for all authors should be described. The statement that all authors have approved the final article should be true and included in the disclosure.

Changes to authorship
Authors are expected to consider carefully the list and order of authors before submitting their manuscript and provide the definitive list of authors at the time of the original submission. Any addition, deletion or rearrangement of author names in the authorship list should be made only before the manuscript has been accepted and only if approved by the journal Editor. To request such a change, the Editor must receive the following from the corresponding author: (a) the reason for the change in author list and (b) written confirmation (e-mail, letter) from all authors that they agree with the addition, removal or rearrangement. In the case of addition or removal of authors, this includes confirmation from the author being added or removed. Only in exceptional circumstances will the Editor consider the addition, deletion or rearrangement of authors after the manuscript has been accepted. While the Editor considers the request, publication of the manuscript will be suspended. If the manuscript has already been published in an online issue, any requests approved by the Editor will result in a corrigendum.

Copyright
Upon acceptance of an article, authors will be asked to complete a 'License Agreement' (see more information on this). Permitted third party reuse of open access articles is determined by the author's choice of user license.

Author rights
As an author you (or your employer or institution) have certain rights to reuse your work. More information.

Elsevier supports responsible sharing
Find out how you can share your research published in Elsevier journals.

Role of the funding source
You are requested to identify who provided financial support for the conduct of the research and/or preparation of the article and to briefly describe the role of the sponsor(s), if any, in study design; in the collection, analysis and interpretation of data; in the writing of the report; and in the decision to submit the article for publication. If the funding source(s) had no such involvement then this should be stated.

Open access
As an open access journal with no subscription charges, a fee is payable by the author or research funder to cover the costs associated with publication. This ensures your article will be immediately and permanently free to access by everyone. The open access publication fee for this journal is USD 200, excluding taxes. If your paper is accepted, this fee will be collected by the Next Einstein Forum. Authors are not eligible for Research4Life waivers or discounts. For questions about pricing, waivers and discounts, please contact Next Einstein forum directly at ekunda@nef.org.

Elsevier Researcher Academy
Researcher Academy is a free e-learning platform designed to support early and mid-career researchers throughout their research journey. The "Learn" environment at Researcher Academy offers several interactive modules, webinars, downloadable guides and resources to guide you through the process of writing for research and going through peer review. Feel free to use these free resources to improve your submission and navigate the publication process with ease.

Language (usage and editing services)
Please write your text in good English (American or British usage is accepted, but not a mixture of these). Authors who feel their English language manuscript may require editing to eliminate possible grammatical or spelling errors and to conform to correct scientific English may wish to use the English Language Editing service available from Elsevier's Author Services.
**Submission**

Our online submission system guides you stepwise through the process of entering your article details and uploading your files. The system converts your article files to a single PDF file used in the peer-review process. Editable files (e.g., Word, LaTeX) are required to typeset your article for final publication. All correspondence, including notification of the Editor's decision and requests for revision, is sent by e-mail.

**Referees**

Please submit the names and institutional e-mail addresses of several potential referees. For more details, visit our Support site. Note that the editor retains the sole right to decide whether or not the suggested reviewers are used.

**PREPARATION**

**Queries**

For questions about the editorial process (including the status of manuscripts under review) or for technical support on submissions, please visit our Support Center.

**NEW SUBMISSIONS**

Submission to this journal proceeds totally online and you will be guided stepwise through the creation and uploading of your files. The system automatically converts your files to a single PDF file, which is used in the peer-review process.

As part of the Your Paper Your Way service, you may choose to submit your manuscript as a single file to be used in the refereeing process. This can be a PDF file or a Word document, in any format or layout that can be used by referees to evaluate your manuscript. It should contain high enough quality figures for refereeing. If you prefer to do so, you may still provide all or some of the source files at the initial submission. Please note that individual figure files larger than 10 MB must be uploaded separately.

**References**

There are no strict requirements on reference formatting at submission. References can be in any style or format as long as the style is consistent. Where applicable, author(s) name(s), journal title/book title, chapter title/article title, year of publication, volume number/book chapter and the article number or pagination must be present. Use of DOI is highly encouraged. The reference style used by the journal will be applied to the accepted article by Elsevier at the proof stage. Note that missing data will be highlighted at proof stage for the author to correct.

**Formatting requirements**

There are no strict formatting requirements but all manuscripts must contain the essential elements needed to convey your manuscript, for example Abstract, Keywords, Introduction, Materials and Methods, Results, Conclusions, Artwork and Tables with Captions.

If your article includes any Videos and/or other Supplementary material, this should be included in your initial submission for peer review purposes.

Divide the article into clearly defined sections.

**Figures and tables embedded in text**

Please ensure the figures and the tables included in the single file are placed next to the relevant text in the manuscript, rather than at the bottom or the top of the file. The corresponding caption should be placed directly below the figure or table.

**Peer review**

This journal operates a single anonymized review process. All contributions will be initially assessed by the editor for suitability for the journal. Papers deemed suitable are then typically sent to a minimum of two independent expert reviewers to assess the scientific quality of the paper. The Editor is responsible for the final decision regarding acceptance or rejection of articles. The Editor's decision is final. Editors are not involved in decisions about papers which they have written themselves or have been written by family members or colleagues or which relate to products or services in which the editor has an interest. Any such submission is subject to all of the journal's usual procedures, with peer review handled independently of the relevant editor and their research groups. More information on types of peer review.
Use of word processing software
It is important that the file be saved in the native format of the word processor used. The text should be in single-column format. Keep the layout of the text as simple as possible. Most formatting codes will be removed and replaced on processing the article. In particular, do not use the word processor's options to justify text or to hyphenate words. However, do use bold face, italics, subscripts, superscripts etc. When preparing tables, if you are using a table grid, use only one grid for each individual table and not a grid for each row. If no grid is used, use tabs, not spaces, to align columns. The electronic text should be prepared in a way very similar to that of conventional manuscripts (see also the Guide to Publishing with Elsevier). Note that source files of figures, tables and text graphics will be required whether or not you embed your figures in the text. See also the section on Electronic artwork.

To avoid unnecessary errors you are strongly advised to use the 'spell-check' and 'grammar-check' functions of your word processor.

Article structure
Subdivision - numbered sections
Divide your article into clearly defined and numbered sections. Subsections should be numbered 1.1 (then 1.1.1, 1.1.2, ...), 1.2, etc. (the abstract is not included in section numbering). Use this numbering also for internal cross-referencing: do not just refer to 'the text'. Any subsection may be given a brief heading. Each heading should appear on its own separate line.

Introduction
State the objectives of the work and provide an adequate background, avoiding a detailed literature survey or a summary of the results.

Material and methods
Provide sufficient details to allow the work to be reproduced by an independent researcher. Methods that are already published should be summarized, and indicated by a reference. If quoting directly from a previously published method, use quotation marks and also cite the source. Any modifications to existing methods should also be described.

Theory/calculation
A Theory section should extend, not repeat, the background to the article already dealt with in the Introduction and lay the foundation for further work. In contrast, a Calculation section represents a practical development from a theoretical basis.

Results
Results should be clear and concise.

Discussion
This should explore the significance of the results of the work, not repeat them. A combined Results and Discussion section is often appropriate. Avoid extensive citations and discussion of published literature.

Conclusions
The main conclusions of the study may be presented in a short Conclusions section, which may stand alone or form a subsection of a Discussion or Results and Discussion section.

Appendices
If there is more than one appendix, they should be identified as A, B, etc. Formulae and equations in appendices should be given separate numbering: Eq. (A.1), Eq. (A.2), etc.; in a subsequent appendix, Eq. (B.1) and so on. Similarly for tables and figures: Table A.1; Fig. A.1, etc.

Essential title page information
- Title. Concise and informative. Titles are often used in information-retrieval systems. Avoid abbreviations and formulae where possible.
- Author names and affiliations. Please clearly indicate the given name(s) and family name(s) of each author and check that all names are accurately spelled. You can add your name between parentheses in your own script behind the English transliteration. Present the authors' affiliation addresses (where the actual work was done) below the names. Indicate all affiliations with a lowercase superscript letter immediately after the author's name and in front of the appropriate address. Provide the full postal address of each affiliation, including the country name and, if available, the e-mail address of each author.
• **Corresponding author.** Clearly indicate who will handle correspondence at all stages of refereeing and publication, also post-publication. This responsibility includes answering any future queries about Methodology and Materials. **Ensure that the e-mail address is given and that contact details are kept up to date by the corresponding author.**

• **Present/permanent address.** If an author has moved since the work described in the article was done, or was visiting at the time, a 'Present address' (or 'Permanent address') may be indicated as a footnote to that author's name. The address at which the author actually did the work must be retained as the main, affiliation address. Superscript Arabic numerals are used for such footnotes.

**Highlights**

Highlights are optional yet highly encouraged for this journal, as they increase the discoverability of your article via search engines. They consist of a short collection of bullet points that capture the novel results of your research as well as new methods that were used during the study (if any). Please have a look at the examples here: example Highlights.

Highlights should be submitted in a separate editable file in the online submission system. Please use 'Highlights' in the file name and include 3 to 5 bullet points (maximum 85 characters, including spaces, per bullet point).

**Abstract**

A concise and factual abstract of no more than 300 words is required. The abstract should state briefly the purpose of the research, the principal results and major conclusions. An abstract is often presented separately from the article, so it must be able to stand alone. For this reason, References should be avoided, but if essential, then cite the author(s) and year(s). Also, non-standard or uncommon abbreviations should be avoided, but if essential they must be defined at their first mention in the abstract itself.

**Graphical abstract**

Although a graphical abstract is optional, its use is encouraged as it draws more attention to the online article. The graphical abstract should summarize the contents of the article in a concise, pictorial form designed to capture the attention of a wide readership. Graphical abstracts should be submitted as a separate file in the online submission system. Image size: Please provide an image with a minimum of 531 × 1328 pixels (h × w) or proportionally more. The image should be readable at a size of 5 × 13 cm using a regular screen resolution of 96 dpi. Preferred file types: TIFF, EPS, PDF or MS Office files. You can view Example Graphical Abstracts on our information site.

Authors can make use of Elsevier's Illustration Services to ensure the best presentation of their images and in accordance with all technical requirements.

**Keywords**

Immediately after the abstract, provide a maximum of 6 keywords, using American spelling and avoiding general and plural terms and multiple concepts (avoid, for example, 'and', 'of'). Be sparing with abbreviations: only abbreviations firmly established in the field may be eligible. These keywords will be used for indexing purposes.

**Abbreviations**

Define abbreviations that are not standard in this field in a footnote to be placed on the first page of the article. Such abbreviations that are unavoidable in the abstract must be defined at their first mention there, as well as in the footnote. Ensure consistency of abbreviations throughout the article.

**Acknowledgements**

Collate acknowledgements in a separate section at the end of the article before the references and do not, therefore, include them on the title page, as a footnote to the title or otherwise. List here those individuals who provided help during the research (e.g., providing language help, writing assistance or proof reading the article, etc.).

**Formatting of funding sources**

List funding sources in this standard way to facilitate compliance to funder's requirements:

Funding: This work was supported by the National Institutes of Health [grant numbers xxxx, yyyy]; the Bill & Melinda Gates Foundation, Seattle, WA [grant number zzzz]; and the United States Institutes of Peace [grant number aaaa].
It is not necessary to include detailed descriptions on the program or type of grants and awards. When funding is from a block grant or other resources available to a university, college, or other research institution, submit the name of the institute or organization that provided the funding.

If no funding has been provided for the research, please include the following sentence:

This research did not receive any specific grant from funding agencies in the public, commercial, or not-for-profit sectors.

Math formulae
Please submit math equations as editable text and not as images. Present simple formulae in line with normal text where possible and use the solidus (/) instead of a horizontal line for small fractional terms, e.g., \(X/Y\). In principle, variables are to be presented in italics. Powers of \(e\) are often more conveniently denoted by \(\exp\). Number consecutively any equations that have to be displayed separately from the text (if referred to explicitly in the text).

Footnotes
Footnotes should be used sparingly. Number them consecutively throughout the article. Many word processors can build footnotes into the text, and this feature may be used. Otherwise, please indicate the position of footnotes in the text and list the footnotes themselves separately at the end of the article. Do not include footnotes in the Reference list.

Artwork
Electronic artwork
General points
• Make sure you use uniform lettering and sizing of your original artwork.
• Embed the used fonts if the application provides that option.
• Aim to use the following fonts in your illustrations: Arial, Courier, Times New Roman, Symbol, or use fonts that look similar.
• Number the illustrations according to their sequence in the text.
• Use a logical naming convention for your artwork files.
• Provide captions to illustrations separately.
• Size the illustrations close to the desired dimensions of the published version.
• Submit each illustration as a separate file.
• Ensure that color images are accessible to all, including those with impaired color vision.

A detailed guide on electronic artwork is available.
You are urged to visit this site; some excerpts from the detailed information are given here.

Formats
If your electronic artwork is created in a Microsoft Office application (Word, PowerPoint, Excel) then please supply 'as is' in the native document format.
Regardless of the application used other than Microsoft Office, when your electronic artwork is finalized, please ‘Save as’ or convert the images to one of the following formats (note the resolution requirements for line drawings, halftones, and line/halftone combinations given below):
EPS (or PDF): Vector drawings, embed all used fonts.
TIFF (or JPEG): Color or grayscale photographs (halftones), keep to a minimum of 300 dpi.
TIFF (or JPEG): Bitmapped (pure black & white pixels) line drawings, keep to a minimum of 1000 dpi.
TIFF (or JPEG): Combinations bitmapped line/halftone (color or grayscale), keep to a minimum of 500 dpi.

Please do not:
• Supply files that are optimized for screen use (e.g., GIF, BMP, PICT, WPG); these typically have a low number of pixels and limited set of colors;
• Supply files that are too low in resolution;
• Submit graphics that are disproportionately large for the content.

Color artwork
Please make sure that artwork files are in an acceptable format (TIFF (or JPEG), EPS (or PDF), or MS Office files) and with the correct resolution. If, together with your accepted article, you submit usable color figures then Elsevier will ensure, at no additional charge, that these figures will appear in color online (e.g., ScienceDirect and other sites) regardless of whether or not these illustrations are reproduced in color in the printed version. For color reproduction in print, you will receive
information regarding the costs from Elsevier after receipt of your accepted article. Please indicate your preference for color: in print or online only. Further information on the preparation of electronic artwork.

Illustration services
Elsevier's Author Services offers Illustration Services to authors preparing to submit a manuscript but concerned about the quality of the images accompanying their article. Elsevier's expert illustrators can produce scientific, technical and medical-style images, as well as a full range of charts, tables and graphs. Image 'polishing' is also available, where our illustrators take your image(s) and improve them to a professional standard. Please visit the website to find out more.

Figure captions
Ensure that each illustration has a caption. Supply captions separately, not attached to the figure. A caption should comprise a brief title (not on the figure itself) and a description of the illustration. Keep text in the illustrations themselves to a minimum but explain all symbols and abbreviations used.

Tables
Please submit tables as editable text and not as images. Tables can be placed either next to the relevant text in the article, or on separate page(s) at the end. Number tables consecutively in accordance with their appearance in the text and place any table notes below the table body. Be sparing in the use of tables and ensure that the data presented in them do not duplicate results described elsewhere in the article. Please avoid using vertical rules and shading in table cells.

References
Citation in text
Please ensure that every reference cited in the text is also present in the reference list (and vice versa). Any references cited in the abstract must be given in full. Unpublished results and personal communications are not recommended in the reference list, but may be mentioned in the text. If these references are included in the reference list they should follow the standard reference style of the journal and should include a substitution of the publication date with either 'Unpublished results' or 'Personal communication'. Citation of a reference as 'in press' implies that the item has been accepted for publication.

Reference links
Increased discoverability of research and high quality peer review are ensured by online links to the sources cited. In order to allow us to create links to abstracting and indexing services, such as Scopus, CrossRef and PubMed, please ensure that data provided in the references are correct. Please note that incorrect surnames, journal/book titles, publication year and pagination may prevent link creation. When copying references, please be careful as they may already contain errors. Use of the DOI is highly encouraged.

A DOI is guaranteed never to change, so you can use it as a permanent link to any electronic article. An example of a citation using DOI for an article not yet in an issue is: VanDecar J.C., Russo R.M., James D.E., Ambeh W.B., Franke M. (2003). Aseismic continuation of the Lesser Antilles slab beneath northeastern Venezuela. Journal of Geophysical Research, https://doi.org/10.1029/2001JB000884. Please note the format of such citations should be in the same style as all other references in the paper.

Web references
As a minimum, the full URL should be given and the date when the reference was last accessed. Any further information, if known (DOI, author names, dates, reference to a source publication, etc.), should also be given. Web references can be listed separately (e.g., after the reference list) under a different heading if desired, or can be included in the reference list.

Data references
This journal encourages you to cite underlying or relevant datasets in your manuscript by citing them in your text and including a data reference in your Reference List. Data references should include the following elements: author name(s), dataset title, data repository, version (where available), year, and global persistent identifier. Add [dataset] immediately before the reference so we can properly identify it as a data reference. The [dataset] identifier will not appear in your published article.

References in a special issue
Please ensure that the words 'this issue' are added to any references in the list (and any citations in the text) to other articles in the same Special Issue.
Reference formatting
There are no strict requirements on reference formatting at submission. References can be in any style or format as long as the style is consistent. Where applicable, author(s) name(s), journal title/book title, chapter title/article title, year of publication, volume number/book chapter and the article number or pagination must be present. Use of DOI is highly encouraged. The reference style used by the journal will be applied to the accepted article by Elsevier at the proof stage. Note that missing data will be highlighted at proof stage for the author to correct. If you do wish to format the references yourself they should be arranged according to the following examples:

Journal abbreviations source
Journal names should be abbreviated according to the List of Title Word Abbreviations.

Video
Elsevier accepts video material and animation sequences to support and enhance your scientific research. Authors who have video or animation files that they wish to submit with their article are strongly encouraged to include links to these within the body of the article. This can be done in the same way as a figure or table by referring to the video or animation content and noting in the body text where it should be placed. All submitted files should be properly labeled so that they directly relate to the video file's content. In order to ensure that your video or animation material is directly usable, please provide the file in one of our recommended file formats with a preferred maximum size of 150 MB per file, 1 GB in total. Video and animation files supplied will be published online in the electronic version of your article in Elsevier Web products, including ScienceDirect. Please supply 'stills' with your files: you can choose any frame from the video or animation or make a separate image. These will be used instead of standard icons and will personalize the link to your video data. For more detailed instructions please visit our video instruction pages. Note: since video and animation cannot be embedded in the print version of the journal, please provide text for both the electronic and the print version for the portions of the article that refer to this content.

Data visualization
Include interactive data visualizations in your publication and let your readers interact and engage more closely with your research. Follow the instructions here to find out about available data visualization options and how to include them with your article.

Supplementary material
Supplementary material such as applications, images and sound clips, can be published with your article to enhance it. Submitted supplementary items are published exactly as they are received (Excel or PowerPoint files will appear as such online). Please submit your material together with the article and supply a concise, descriptive caption for each supplementary file. If you wish to make changes to supplementary material during any stage of the process, please make sure to provide an updated file. Do not annotate any corrections on a previous version. Please switch off the 'Track Changes' option in Microsoft Office files as these will appear in the published version.

Research data
This journal encourages and enables you to share data that supports your research publication where appropriate, and enables you to interlink the data with your published articles. Research data refers to the results of observations or experimentation that validate research findings. To facilitate reproducibility and data reuse, this journal also encourages you to share your software, code, models, algorithms, protocols, methods and other useful materials related to the project.

Below are a number of ways in which you can associate data with your article or make a statement about the availability of your data when submitting your manuscript. If you are sharing data in one of these ways, you are encouraged to cite the data in your manuscript and reference list. Please refer to the "References" section for more information about data citation. For more information on depositing, sharing and using research data and other relevant research materials, visit the research data page.

Data linking
If you have made your research data available in a data repository, you can link your article directly to the dataset. Elsevier collaborates with a number of repositories to link articles on ScienceDirect with relevant repositories, giving readers access to underlying data that gives them a better understanding of the research described.
There are different ways to link your datasets to your article. When available, you can directly link your dataset to your article by providing the relevant information in the submission system. For more information, visit the database linking page.

For supported data repositories a repository banner will automatically appear next to your published article on ScienceDirect.

In addition, you can link to relevant data or entities through identifiers within the text of your manuscript, using the following format: Database: xxxx (e.g., TAIR: AT1G01020; CCDC: 734053; PDB: 1XFN).

**Mendeley Data**
This journal supports Mendeley Data, enabling you to deposit any research data (including raw and processed data, video, code, software, algorithms, protocols, and methods) associated with your manuscript in a free-to-use, open access repository. During the submission process, after uploading your manuscript, you will have the opportunity to upload your relevant datasets directly to Mendeley Data. The datasets will be listed and directly accessible to readers next to your published article online.

For more information, visit the Mendeley Data for journals page.

**Data statement**
To foster transparency, we encourage you to state the availability of your data in your submission. This may be a requirement of your funding body or institution. If your data is unavailable to access or unsuitable to post, you will have the opportunity to indicate why during the submission process, for example by stating that the research data is confidential. The statement will appear with your published article on ScienceDirect. For more information, visit the Data Statement page.

**AFTER ACCEPTANCE**

**Proofs**
One set of page proofs (as PDF files) will be sent by e-mail to the corresponding author (if we do not have an e-mail address then paper proofs will be sent by post) or a link will be provided in the e-mail so that authors can download the files themselves. To ensure a fast publication process of the article, we kindly ask authors to provide us with their proof corrections within two days. Elsevier now provides authors with PDF proofs which can be annotated; for this you will need to download the free Adobe Reader, version 9 (or higher). Instructions on how to annotate PDF files will accompany the proofs (also given online). The exact system requirements are given at the Adobe site.

If you do not wish to use the PDF annotations function, you may list the corrections (including replies to the Query Form) and return them to Elsevier in an e-mail. Please list your corrections quoting line number. If, for any reason, this is not possible, then mark the corrections and any other comments (including replies to the Query Form) on a printout of your proof and scan the pages and return via e-mail. Please use this proof only for checking the typesetting, editing, completeness and correctness of the text, tables and figures. Significant changes to the article as accepted for publication will only be considered at this stage with permission from the Editor. We will do everything possible to get your article published quickly and accurately. It is important to ensure that all corrections are sent back to us in one communication: please check carefully before replying, as inclusion of any subsequent corrections cannot be guaranteed. Proofreading is solely your responsibility.

**Offprints**
The corresponding author, at no cost, will be provided with a PDF file of the article via e-mail (the PDF file is a watermarked version of the published article and includes a cover sheet with the journal cover image and a disclaimer outlining the terms and conditions of use). For an extra charge, paper offprints can be ordered via the offprint order form which is sent once the article is accepted for publication. Both corresponding and co-authors may order offprints at any time via Elsevier’s Author Services.

**AUTHOR INQUIRIES**
Visit the Elsevier Support Center to find the answers you need. Here you will find everything from Frequently Asked Questions to ways to get in touch. You can also check the status of your submitted article or find out when your accepted article will be published.
