DESCRIPTION

The Westerdijk Fungal Biodiversity Institute - an institute of the Royal Netherlands Academy of Arts and Sciences (KNAW) and situated in Utrecht, The Netherlands - maintains a world-renowned collection of living filamentous fungi, yeasts and bacteria. The institute's research programmes principally focus on the taxonomy and evolution of fungi as well as on functional aspects of fungal biology and ecology, incorporating molecular and genomics approaches. The Westerdijk Fungal Biodiversity Institute employs circa 70 personnel, among whom circa 24 scientists.

Studies in Mycology is an international peer-reviewed journal which publishes systematic monographs on the biodiversity of filamentous fungi and yeasts. The first issue was published in 1972. The emphasis of papers should be on fungal taxonomy and biodiversity. Accepted papers will appear immediately online. Authors who intend to submit monographs should contact the Executive Editor in advance. There are no restrictions of length, though it is generally expected that manuscripts should be at least 50 A4 pages in print.

Authors who intend to submit monographs or topical issues should contact the Executive Editor in advance. Authors are obliged to meet the requirements as set out in our Instructions for Authors.

INTRODUCTION

Instructions for Authors
Studies in Mycology is an international journal which publishes systematic monographs of filamentous fungi and yeasts and special topical issues related to all fields of mycology, biotechnology, ecology, molecular biology, pathology and systematics. The journal is open-access, but an article processing charge (APC) of € 1250, applies to each paper. Authors who intend to submit monographs or topical issues (5-6 papers per issue) should contact the Executive Editor in advance. There are no restrictions of length, although it is generally expected that manuscripts should be at least 50 A4 pages in print.

Contact details for submission

Executive Editor
Robert A. Samson, Westerdijk Fungal Biodiversity Institute, Utrecht, Netherlands.

Managing Editor
Pedro W. Crous, Westerdijk Fungal Biodiversity Institute, Utrecht, Netherlands.

Layout Editor
Manon van den Hoeven-Verweij, Westerdijk Fungal Biodiversity Institute, Utrecht, Netherlands.

Graphic Design Editor
Marjan Vermaas, Westerdijk Fungal Biodiversity Institute, Utrecht, Netherlands

Scientific Editor
M. Catherine Aime, Department of Botany and Plant Pathology, Purdue University, West Lafayette, IN, USA
Feng-Yan Bai, State Key Laboratory of Mycology, Institute of Microbiology, Chinese Academy of Sciences, Beijing, China
Uwe Braun, Geobotanik und Botanischer Garten, Martin-Luther-Universitat Halle-Wittenberg, Halle, Germany
Lei Cai, State Key Laboratory of Mycology, Institute of Microbiology, Chinese Academy of Sciences, Beijing, China
David Canovas, Department of Genetics, University of Sevilla, Spain
Jozsef Geml, MTA-EKE Lendulet Environmental Microbiome Research Group, Eszterhazy Karoly University, Eger, Hungary
Josepa Gene, Mycology Unit, Medical School and IISPV, Universitat Rovira i Virgili (URV), Reus, Spain
Johannes Z. Groenewald, Westerdijk Fungal Biodiversity Institute, Utrecht, Netherlands
Feng-Yan Bai, State Key Laboratory of Mycology, Institute of Microbiology, Chinese Academy of Sciences, Beijing, China
David S. Hibbett, Department of Biology, Clark University, Worcester, Massachusetts, USA
Jos Houbraken, Westerdijk Fungal Biodiversity Institute, Utrecht, Netherlands
Vit Hubka, Department of Botany, Faculty of Science, Charles University, Prague, Czech Republic
Andrew N. Miller, University of Illinois Urbana-Champaign, Illinois Natural History Survey, Champaign, Illinois
Laszlo G. Nagy, Synthetic and Systems Biology Unit, Biological Research Center, Hungarian Academy of Sciences, Szeged, Hungary
Leirei L. Norvell, Pacific Northwest Mycology Service, Portland, OR, USA
Giancarlo Perrone, Institute of Sciences of Food Production, National Research Council, Bari, Italy
Alan J.L. Phillips, Faculty of Sciences, Biosystems and Integrative Sciences Institute (BioISI), Universidade de Lisboa, Lisbon, Portugal
Martina Reblova, Department of Taxonomy, Institute of Botany of the Czech Academy of Sciences, Pr?honice 252 43, Czech Republic
Amy Y. Rossman, Department of Botany and Plant Pathology, Oregon State University, Corvallis, Oregon, USA
Hyeon-Dong Shin, Division of Environmental Science & Ecological Engineering, Korea University, Seoul, The Republic of Korea
Roger Shivas, University of Southern Queensland, Toowoomba, Queensland, Australia
Marc Stadler, Department of Microbial Drugs, Helmholtz-Zentrum fur Infektionsforschung (HZI), Braunschweig, Germany
Jeffrey K. Stone, Department of Botany and Plant Pathology, Oregon State University, Corvallis, Oregon, USA
Richard C. Summerbell, Dalla Lana School of Public Health, University of Toronto, Toronto, ON, Canada
Brett Summerell, Royal Botanic Gardens and Domain Trust, Sydney, NSW, Australia
Cobus Visagie, Department of Genetics, Biochemistry and Microbiology, Forestry and Agricultural Biotechnology Institute (FABI), University of Pretoria, Pretoria, South Africa
Andrey Yurkov, Leibniz Institute DSMZ-German Collection of Microorganisms and Cell Cultures GmbH, Braunschweig, Germany
BEFORE YOU BEGIN

**Ethics in publishing**
Please see our information on Ethics in publishing.

**Declaration of interest**
All authors must disclose any financial and personal relationships with other people or organizations that could inappropriately influence (bias) their work. Examples of potential competing interests include employment, consultancies, stock ownership, honoraria, paid expert testimony, patent applications/registrations, and grants or other funding. Authors must disclose any interests in two places: 1. A summary declaration of interest statement in the title page file (if double anonymized) or the manuscript file (if single anonymized). If there are no interests to declare then please state this: ‘Declarations of interest: none’. 2. Detailed disclosures as part of a separate Declaration of Interest form, which forms part of the journal's official records. It is important for potential interests to be declared in both places and that the information matches. More information.

**Submission declaration and verification**
Submission of an article implies that the work described has not been published previously (except in the form of an abstract, a published lecture or academic thesis, see 'Multiple, redundant or concurrent publication' for more information), that it is not under consideration for publication elsewhere, that its publication is approved by all authors and tacitly or explicitly by the responsible authorities where the work was carried out, and that, if accepted, it will not be published elsewhere in the same form, in English or in any other language, including electronically without the written consent of the copyright-holder. To verify originality, your article may be checked by the originality detection service Crossref Similarity Check.

**Use of inclusive language**
Inclusive language acknowledges diversity, conveys respect to all people, is sensitive to differences, and promotes equal opportunities. Content should make no assumptions about the beliefs or commitments of any reader; contain nothing which might imply that one individual is superior to another on the grounds of age, gender, race, ethnicity, culture, sexual orientation, disability or health condition; and use inclusive language throughout. Authors should ensure that writing is free from bias, stereotypes, slang, reference to dominant culture and/or cultural assumptions. We advise to seek gender neutrality by using plural nouns (“clinicians, patients/clients”) as default/wherever possible to avoid using "he, she," or "he/she." We recommend avoiding the use of descriptors that refer to personal attributes such as age, gender, race, ethnicity, culture, sexual orientation, disability or health condition unless they are relevant and valid. These guidelines are meant as a point of reference to help identify appropriate language but are by no means exhaustive or definitive.

**Changes to authorship**
Authors are expected to consider carefully the list and order of authors before submitting their manuscript and provide the definitive list of authors at the time of the original submission. Any addition, deletion or rearrangement of author names in the authorship list should be made only before the manuscript has been accepted and only if approved by the journal Editor. To request such a change, the Editor must receive the following from the corresponding author: (a) the reason for the change in author list and (b) written confirmation (e-mail, letter) from all authors that they agree with the addition, removal or rearrangement. In the case of addition or removal of authors, this includes confirmation from the author being added or removed. Only in exceptional circumstances will the Editor consider the addition, deletion or rearrangement of authors after the manuscript has been accepted. While the Editor considers the request, publication of the manuscript will be suspended. If the manuscript has already been published in an online issue, any requests approved by the Editor will result in a corrigendum.

**Copyright**
Upon acceptance of an article, authors will be asked to complete a 'Journal Publishing Agreement' (see more information on this). An e-mail will be sent to the corresponding author confirming receipt of the manuscript together with a 'Journal Publishing Agreement' form or a link to the online version of this agreement.

**Author rights**
As an author you (or your employer or institution) have certain rights to reuse your work. More information.
Elsevier supports responsible sharing
Find out how you can share your research published in Elsevier journals.

Open access
Please visit our Open Access page for more information.

Elsevier Researcher Academy
Researcher Academy is a free e-learning platform designed to support early and mid-career researchers throughout their research journey. The "Learn" environment at Researcher Academy offers several interactive modules, webinars, downloadable guides and resources to guide you through the process of writing for research and going through peer review. Feel free to use these free resources to improve your submission and navigate the publication process with ease.

Language (usage and editing services)
Please write your text in good English (American or British usage is accepted, but not a mixture of these). Authors who feel their English language manuscript may require editing to eliminate possible grammatical or spelling errors and to conform to correct scientific English may wish to use the English Language Editing service available from Elsevier's Author Services.

Submit your article
Please submit your article via https://www.editorialmanager.com/simyco/.

PREPARATION
To submit a manuscript to Studies in Mycology please adhere to the following:

1. Manuscript body text should be processed in Microsoft Word; tables (Microsoft Excel), legends (Microsoft Word) and illustrations (tif or psd with layers included). Note: See 12 below for further instructions regarding illustrations. Missing data in tables should be indicated with an emdash for missing, or n/d (not determined) or n/a (not available), depending on the type of missing data.

2. A cover letter which clearly states the name and address of the person with whom the Executive Editor should correspond, and which confirms that: (a) all named authors have agreed to publication of the work; and (b) the manuscript does not infringe any personal or other copyright or property rights. The Declaration of Interest should also be stated.

3. If the manuscript references papers which are "in press", copies should be included for the benefit of the referees.

4. The content should be set out as follows: Abstract, Introduction, Materials and methods, Results or Taxonomy, Discussion, Acknowledgements and References. Key words and a Running Head should also be provided.

5. British-English is preferred, and used for all non-article material. Authors of articles can use American-English, provided that it is consistent within their contributions. Words of non-English origin, like bona fide, comb. nov., fide, f. sp., ibid., in vitro, in situ, prima facie, sensu, sensu lato (stricto), sp. nov., should be placed in italics, together with plant and fungal scientific names of any rank (e.g. Ascomycota, Dothideales, Mycosphaerellaceae, Mycosphaerella nubilosa, Clonostachys rosea f. catenulata). The use of either "Culture characteristics" or "Cultural characteristics" is allowed, but the style must be consistent within a single paper.

6. Common abbreviations are as follows: h, min, s, mL, mg/L, °C, Fig., Figs, d, wk, mo, but also ITS, RPD, RFLP, rDNA, 18S etc. When a number is used in text as an adjective, thousands should be separated by spaces, e.g. 1 000 plants, and millions indicated with a capital M, e.g. 10 M generations. Similarly, if a number is less than 10 it should be written out, e.g. five plants versus 15 animals. Citation of nomenclatural authorities for taxa should follow the list of authors' names, see http://www.indexfungorum.org/authorsoffungalnames.htm. Journal abbreviations in the text (species synonymies, descriptions, etc.) should follow B-P-H and B-P-H/S (Botanico-Periodicum-Huntianum/Supplementum). Subspecies and formae speciales should be abbreviated as subsp. and f. sp. respectively.
7. Experimental procedures must be reproducible and must follow Good Cultural Practice (Mycological Research 106: 1378-1379), with sequences lodged at one of the partners of the International Nucleotide Sequence Database Collaboration (i.e. the DNA DataBank of Japan (DDBJ), the European Molecular Biology Laboratory (EMBL), or GenBank at NCBI). These sequence accession numbers must be mentioned in a Table (linked to published papers from which they were retrieved), along with material/cultures examined. Alignments and phylogenetic trees should be deposited in TreeBASE, voucher specimens in a recognized fungarium (Index Herbariorum or World Directory of Collections and Cultures of Microorganisms acronym; accompanying ex-type and other cultures in CBS and other culture collections. Taxonomic novelties (MB number) and typification events (MBT number) should be deposited in MycoBank after acceptance of the paper (see http://www.mycobank.org.).

8. Collections must be cited as: Material(s) examined: **Country**, location, substratum, date (e.g. 10 Jul. 1993), collector (e.g. B. Dylan & L. Cohen), FUNGARIUM (acronym according to Index Herbariorum), **holotype**, culture ex-type CBS xxx. (thus only country and type indications in bold face; all calendar months to be abbreviated to the first three letters followed by a full stop, except for May). "Material(s) examined" is preferred to "Specimen(s) examined", but the style must be consistent within a single volume.

9. Details of type materials should appear separate from Material(s) examined under the heading **Typus**:

10. Reference citation in text: References in the text should be chronological, and given in the following form: "Smith & Jones (1965) have shown ...", or, "some authors (Zabetta 1928, Taylor & Palmer 1970, Zabetta 1970, De Hoog & Gerrits van den Ende 1998) consider that ...". The names of collaborating authors are joined by an ampersand (&). Where there are three or more authors, names should be cited by the first name only, adding "et al.", e.g. "Bowie, Black & White (1964)" are given as "Bowie et al. (1964)" or "(Bowie et al. 1964)". Where authors have published more than one work in a year, to which reference is made, they should be distinguished by placing a, b, etc. immediately after the date, based on their alphabetical order in the reference list, e.g. "Dylan (1965a, b)". Reference citations in text should be in ascending order of year first, followed by authors' names. In the References section, citations should be strictly alphabetical, with papers having the same authors arranged according to date. Each reference should include the full title of the paper and unabbreviated journal name, volume number, and the final as well as the first page number. In the case of chapters in books, the names of editors, first and last page numbers of the articles, publisher and place of publication are needed. References with more than three authors, should list the first three authors, followed by *et al.*

**Examples for publications, books and dissertations (note that the en-dash symbol is used for ranges; plant and fungal scientific names of any rank mentioned in the book title remains in italics, e.g. Banksia, Grevillea and the other Proteaceae of Western Australia):**

**Examples for software, online databases, and online articles:**

References in Nomenclators:

• Only book titles in italics (use a simple colon before the page number), all other information in Roman letters. Journals abbreviated according to Hunt.
• Insert a space after the volume number with colon.

11. Authors shall retain full copyright.

12. Illustrations: Illustrations must be submitted in digital form. Line drawings and half tone pictures should be submitted as tif or psd files, never as MS Powerpoint or Adobe PDF files. Phylogenetic trees can be submitted as MS Powerpoint or Adobe Illustrator files, and NOT as MS Word files, images or images pasted into MS Powerpoint slides. Fonts in phylogenetic trees are restricted to Arial, Times or Times New Roman, with the minimum font size 8 or 10 points. Lines should be at least 1 point thick, and the tree must fit A4 format (multi-page trees allowed, but trees should then be divided across multiple pages with arrows linking the parts. Very long branches can be shortened but the factor used for shortening should then be indicated on that branch, e.g. 2x for the branch which was halved). Half tones at 300 dpi or higher, and line drawings at 600 dpi or higher.

13. Fonts and lines on photoplates:
• size of complete plate: 18 cm wide and max. 26.2 cm high; resolution 300 or higher dpi (300 dpi alone is sufficient for a plate of 18 x 26.2 cm)
• separate pictures should be in RGB with a resolution of at least 300 dpi;
• scale bars: place = bottom right hand side corner; thickness; 6 pixels, 2 mm up and 2 mm to the left of the corner;
• letters: place = bottom left hand side corner; 2 mm up and 2 mm to the right of the corner;
• font = Arial regular capital, size 12 pixels
• thickness of white lines separating the pictures: 15 pixels
• Please submit the photoplate as a psd file with unflattened layers (never as an Adobe PDF file)

Authors should upload their research data to MycoBank after the paper has been accepted, and include relevant MycoBank accession numbers in their manuscripts, e.g. MycoBank: MB476. This will be then converted into a hyperlink to the corresponding MycoBank record.

Peer review
This journal operates a single anonymized review process. All contributions will be initially assessed by the editor for suitability for the journal. Papers deemed suitable are then typically sent to a minimum of two independent expert reviewers to assess the scientific quality of the paper. The Editor is responsible for the final decision regarding acceptance or rejection of articles. The Editor's decision is final. Editors are not involved in decisions about papers which they have written themselves or have been written by family members or colleagues or which relate to products or services in which the editor has an interest. Any such submission is subject to all of the journal's usual procedures, with peer review handled independently of the relevant editor and their research groups. More information on types of peer review.

AUTHOR INQUIRIES
Visit the Elsevier Support Center to find the answers you need. Here you will find everything from Frequently Asked Questions to ways to get in touch. You can also check the status of your submitted article or find out when your accepted article will be published.
