Gastrointestinal (GI) endoscopy is developing rapidly: Modern endoscopic imaging offers a plethora of detailed visual information and endoscopic procedures are becoming increasingly sophisticated and complex. Therefore endoscopists need a new appropriate tool for visual transmission of proceedings in endoscopy. The innovative Video Journal and Encyclopedia of GI Endoscopy takes these developments into account and aims to be the premium and first choice international reference for endoscopic findings and procedures. The focus on high-quality video demonstrations of endoscopic findings and procedures offers a completely new way of presenting the work of GI experts and allows for easy comprehension of information. Additional concise manuscripts to each video detail the procedures and the findings in a bullet point style. All articles are peer-reviewed and available both online and on mobile devices. The unique format of the Video Journal and Encyclopedia of GI Endoscopy provides two elements:

• An Expert Video Encyclopedia as a reference tool with systematic step-by-step demonstrations of common and rare GI pathologies and up-to-date endoscopic procedures. The video sequences in this section are of high educational impact and allow endoscopists and other health care providers to recognize a wide array of pathological findings, review existing techniques, and acquire new endoscopic techniques for implementation in their own clinical work.

• A Scientific Video Journal and premium reference for findings and techniques, demonstrating cutting edge endoscopic techniques and scientific results as well as clinical cases. In the journal section of VJGIEN original research will be published reporting latest results in respect to endoscopic procedures used in the treatment of gastrointestinal diseases.

For more information please visit www.vjgi-endoscopy.com.

Key words: video, endoscopy, gastrointestinal, gastroenterology, intestine, video journal, gastrointestinal endoscopy, intervention, resection, polypectomy, minimal invasive procedure, imaging.

EDITORIAL BOARD

GUIDE FOR AUTHORS

Aims & scope

VideoGIE, an official video journal of the American Society of Gastrointestinal Endoscopy, is an Open Access, online MEDLINE journal to serve patients with digestive diseases. VideoGIE publishes original, peer-reviewed video case reports and case series of endoscopic procedures used in the study, diagnosis, and treatment of digestive diseases. Videos demonstrate use of endoscopic systems, devices, and techniques; report outcomes of endoscopic interventions; and educate physicians and patients about gastrointestinal endoscopy. VideoGIE will serve the educational needs of endoscopists in training as well as advanced endoscopists, endoscopy staff and industry, and patients. VideoGIE will bring video commentaries from experts, legends, committees, and leadership of the society. Careful adherence to submission guidelines will avoid unnecessary delays, as incomplete submissions may be returned to the authors before initiation of the peer review process.

MANUSCRIPT TYPES

VideoGIE will consider the following types of submissions. Authors should consider these categories and review recent issues of the journal when preparing submissions. If you believe that your article should exceed these word lengths or author limits, please contact Senior Managing Editor Deborah Bowman at dbowman@asge.org and explain the reasons. VideoGIE will publish the following three sections in the journal.

Videos: Videos relating to endoscopy used in the diagnosis and management of digestive diseases, including standard-of-care cases that help the endoscopy team and trainees learn how to manage a problem correctly, complex problems that require novel techniques and thinking outside the box that help therapeutic endoscopy teams manage difficult cases, and videos to improve the education of everyone involved in endoscopy care. We encourage submissions of videos that are instructional, standard-of-care endoscopy techniques as well as videos of complex cases and novel procedures. Submission must include a video (maximum 300 MB; file format MP4 or MOV; 6 minutes maximum), authorship limited to 5, up to 9 images that tell the story, legends for figures and video, and a Word file with a description (limited to 200 words) of the case, procedure, and outcome. Use Video Case Report Template or Tools and Techniques Template to format your submission.

Case Report: Report of the diagnosis and management of digestive diseases using a single case. Submission must include a Word file with a description (limited to 600 words) of the case, procedure, and outcome, up to 9 images that tell the story, and legends for figures and video (maximum 300 MB; file format MP4 or MOV; 8 minutes maximum). Include IRB approval document. Use Video Case Report Template to format your submission.

Case Series: Report of the diagnosis and management of digestive diseases using 3 or more cases. Submission must include a Word file with a description (limited to 2,000 words) of the case, procedure, and outcome, up to 9 images that tell the story, and legends for figures and video (maximum 300 MB; file format MP4 or MOV; 8 minutes maximum). Include IRB approval document. Use Video Case Series Template to format your submission.

Choose the article type

We invite you to participate and contribute to this exciting new publication and welcome your submissions, dealing with new developments in endoscopic techniques, novel results or interesting clinical cases from all areas of GI endoscopy. All videos are fully peer-reviewed. Preparation of your contribution is simple: please use the specific templates for required items and adhere to the general instructions specified in the "Preparation" section. Presentation of multiple dimensions of a finding (endoscopy, ultrasound, radiology, histology) is encouraged. Submissions to the following sections are welcome:

The Video Journal and Encyclopedia of GI Endoscopy publishes the following article types:

Studies in Clinical Endoscopy (Original Articles)
Focus: Randomized controlled trials, case series on endoscopic procedures/findings

Innovation Forum and Experimental Endoscopy (Original Articles)
Focus: new techniques, new accessories, new equipment

In the Expert’s Focus
Focus: step-by-step explanation of a procedure by an expert endoscopist

Clinical Case Reports
Focus: video case reports
Supplementation to the Encyclopedia

Focus: the expert Encyclopedia of the journal is open for non-invited supplementing contributions (peer-reviewed to guarantee a high standard). For any of the above article types, use of the following templates for MANUSCRIPT and TEXT SLIDES is mandatory. If you do not want to create your own voiceover, please also download the respective template for your submission and fill in the text with exact timing. (Please note that professional voiceover and/or editing of text slides will be charged extra).

Mandatory:
• Click here for the Manuscript Template
• Click here for the Text Slide Template

Optional:
• Click here for the Voiceover Script Template
• Click here for the flexible slide template (for additional slides)

BEFORE YOU BEGIN

Ethics in Publishing
Prospective authors should refer to the Uniform Requirements for Manuscripts Submitted to Biomedical Journals1 (http://www.icmje.org) to familiarize themselves with ethical conventions of publication; specifically, the issues of redundant or duplicate publication, authorship criteria, and potential conflicts of interest. The Editor reserves the right to investigate alleged improprieties related to these conventions. When questions of scientific misconduct or dishonesty in research occur, the Editor reserves the right to proceed according to the guidelines of the Office of Research Integrity.2 Authors may be asked to provide the appropriate documentation of compliance, as well as the data on which the manuscript is based. Investigations involving human subjects or animals must have prior approval of the appropriate institutional review board or an equivalent body. If your research involves interacting with living human subjects or with the data from living human subjects and if you intend to make the results of your research public (eg, publish an article in VideoGIE), your research meets the definition of human subjects research and requires IRB review. This includes retrospective chart reviews.3,4 In countries where institutional review is not established practice, a statement must be included in the methods section that the research was carried out in accordance with the Helsinki Declaration.3

Human and animal rights
If the work involves the use of human subjects, the author should ensure that the work described has been carried out in accordance with The Code of Ethics of the World Medical Association (Declaration of Helsinki) for experiments involving humans; Uniform Requirements for manuscripts submitted to Biomedical journals. Authors should include a statement in the manuscript that informed consent was obtained for experimentation with human subjects. The privacy rights of human subjects must always be observed.

All animal experiments should comply with the ARRIVE guidelines and should be carried out in accordance with the U.K. Animals (Scientific Procedures) Act, 1986 and associated guidelines, EU Directive 2010/63/EU for animal experiments, or the National Institutes of Health guide for the care and use of Laboratory animals (NIH Publications No. 8023, revised 1978) and the authors should clearly indicate in the manuscript that such guidelines have been followed.

Declaration of interest
All authors must disclose any financial and personal relationships with other people or organizations that could inappropriately influence (bias) their work. Examples of potential conflicts of interest include employment, consultancies, stock ownership, honoraria, paid expert testimony, patent applications registrations, and grants or other funding. If there are no conflicts of interest then please state this: 'Conflicts of interest: none'. More information.

VJGIEN requires full disclosure of all potential conflicts of interest. All sources of funding supporting the work are to be declared. At the end of the manuscript text, under a subheading "Conflict of Interest", all authors must disclose any financial and personal relationships with other people or organizations that could inappropriately influence (bias) their work. If there are no conflicts of interest, the authors should state, "The authors declare that there are no conflicts of interest."
Submission declaration
Submission of an article implies that the work described has not been published previously (except in the form of an abstract or as part of a published lecture or academic thesis or as an electronic preprint, see 'Multiple, redundant or concurrent publication' section of our ethics policy for more information), that it is not under consideration for publication elsewhere, that its publication is approved by all authors and tacitly or explicitly by the responsible authorities where the work was carried out, and that, if accepted, it will not be published elsewhere including electronically in the same form, in English or in any other language, without the written consent of the copyright-holder.

Authorship
All authors should have made substantial contributions to all of the following: (1) the conception and design of the study, or acquisition of data, or analysis and interpretation of data, (2) drafting the article or revising it critically for important intellectual content, (3) final approval of the version to be submitted.

Changes to authorship
Authors are expected to consider carefully the list and order of authors before submitting their manuscript and provide the definitive list of authors at the time of the original submission. Any addition, deletion or rearrangement of author names in the authorship list should be made only before the manuscript has been accepted and only if approved by the journal Editor. To request such a change, the Editor must receive the following from the corresponding author: (a) the reason for the change in author list and (b) written confirmation (e-mail, letter) from all authors that they agree with the addition, removal or rearrangement. In the case of addition or removal of authors, this includes confirmation from the author being added or removed.

Only in exceptional circumstances will the Editor consider the addition, deletion or rearrangement of authors after the manuscript has been accepted. While the Editor considers the request, publication of the manuscript will be suspended. If the manuscript has already been published in an online issue, any requests approved by the Editor will result in a corrigendum.

Reporting clinical trials
Randomized controlled trials should be presented according to the CONSORT guidelines. At manuscript submission, authors must provide the CONSORT checklist accompanied by a flow diagram that illustrates the progress of patients through the trial, including recruitment, enrollment, randomization, withdrawal and completion, and a detailed description of the randomization procedure. The CONSORT checklist and template flow diagram are available online.

Registration of clinical trials
VideoGIE follows the International Committee of Medical Journal Editors (ICMJE)'s Uniform Requirements for Manuscripts Submitted to Biomedical Journals. All clinical trials submitted to Video GIE should have been registered BEFORE the trial begins through one of the registries approved by the ICMJE, and proof of that registration, including the date registered and the registration number, must be submitted to Video GIE along with the article. IRB approval information must be included in the manuscript text, including the date of IRB registration. As of January 2015, all clinical trials as defined by the ICMJE must also have been registered before the trial began (not just randomized clinical trials). For further details and a list of ICMJE-acceptable registries, please go to http://www.icmje.org

Copyright
Upon acceptance of an article, authors will be asked to complete an 'Exclusive License Agreement' (see more information on this). Permitted third party reuse of open access articles is determined by the author's choice of user license.

Author rights
As an author you (or your employer or institution) have certain rights to reuse your work. More information.

Role of the funding source
You are requested to identify who provided financial support for the conduct of the research and/or preparation of the article and to briefly describe the role of the sponsor(s), if any, in study design; in the collection, analysis and interpretation of data; in the writing of the report; and in the decision to submit the article for publication. If the funding source(s) had no such involvement then this should be stated.
Funding body agreements and policies
Elsevier has established a number of agreements with funding bodies which allow authors to comply
with their funder's open access policies. Some funding bodies will reimburse the author for the Open
Access Publication Fee. Details of existing agreements are available online. After acceptance, open access papers will be published under a noncommercial license. For authors requiring a commercial CC BY license, you can apply after your manuscript is accepted for publication.

Please choose one of the available licenses and fill out the appropriate Journal Publishing License Agreement (JPLA) which is available for download here: CC-BY-NC-ND Submission of the JPLA along with your video and manuscript is mandatory.

As of 2016 the charge for publication is: EUR 2,000 / USD 2,600 / JPY 261,680 for the sections Studies in Clinical Endoscopy, Innovation Forum and Experimental Endoscopy, In the Expert's Focus, and Supplementation to the Encyclopedia, and EUR 1,000 / USD 1,300 / JPY 138,840 for the section Clinical Case Reports. This charge is necessary to offset publishing costs — from managing article submission to typesetting, tagging and indexing of articles, hosting articles and videos on dedicated servers, editing videos, supporting sales and marketing costs to ensure global dissemination via ScienceDirect, and permanently preserving the journal article. The fee excludes taxes.

If you require professional voiceover and/or editing of your text slides into your video, an additional fee of EUR 500 / USD 650 / JPY 65,420 will be charged. In this case, please provide with your submission the filled out voiceover script and text slides (see "Choose the Article Type").

Fee Waivers
If you would like your article to be published, but you genuinely cannot afford to pay the fees, then individual waiver requests can be considered and may be granted in cases of genuine need. Priority for this waiver program will be given to applications by authors from countries eligible for the Research4Life program.

For more information about the application and selection process, please contact the Editorial Coordinator: VJGIEN@elsevier.com.

Language (usage and editing services)
Please write your text in good English (American or British usage is accepted, but not a mixture of these). Authors who feel their English language manuscript may require editing to eliminate possible grammatical or spelling errors and to conform to correct scientific English may wish to use the English Language Editing service available from Elsevier's WebShop.

Informed consent and patient details
Studies on patients or volunteers require ethics committee approval and informed consent, which should be documented in the paper. Appropriate consents, permissions and releases must be obtained where an author wishes to include case details or other personal information or images of patients and any other individuals in an Elsevier publication. Written consents must be retained by the author and copies of the consents or evidence that such consents have been obtained must be provided to Elsevier on request. For more information, please review the Elsevier Policy on the Use of Images or Personal Information of Patients or other Individuals. Unless you have written permission from the patient (or, where applicable, the next of kin), the personal details of any patient included in any part of the article and in any supplementary materials (including all illustrations and videos) must be removed before submission.

Full Online Submission
Original submissions will be considered for publication with the understanding that they are contributed solely to VideoGIE. If any material related to the submission (other than a brief abstract) has been published in any medium or has been submitted for publication elsewhere, the authors should provide copies of all related manuscripts, and outline the relationship of all materials for the Editors, to avoid allegations of duplicate publication. Use the slide templates to prepare the video. Each submission requires inclusion of a video, figures in a TIFF or .eps format, legends for figures and video, Word file, and disclosure statement. Refer to "Manuscript Types" above for word length. Title slide should include the title and a maximum of 5 authors for Videos and Case Reports and a maximum of 8 authors for Case Series. Funding source(s) and disclosure of conflict of interest should be included in the video immediately after the title slide and displayed for a minimum of 3 seconds. Provide 4 to 6 keywords based on the organ of interest, endoscopy performed, pathology observed, treatment, and accessories used. Maximum length of videos is 6 minutes for Videos, 6
minutes for Case Reports, and 8 minutes for Case Series Maximum size of any video is 300 MB. File format should be MP4 or MOV. Avoid any names, dates, or numbers on the videos (black them out or ask your endoscopy vendor to set up your system to record a clean video without any names, dates, or alphabets on the video). The audio portion of the video must be in English. Please speak clearly and at an average rate of speech. As a guide, the maximum average word count per 10 seconds should be 15 words. Provide a written transcript of the video audio. This is optional at the time of submission but will be required for accepted articles. Articles can include up to 9 figures, submitted in TIFF or .eps format. Articles must be written in standard English and submitted in a Word file, along with figure and video legend(s). Include a title page, description of the case, technique, and legends to figures and video. Accepted manuscripts are subject to copyediting for conciseness, clarity, grammar, spelling, and journal style. Authors who are not native English speakers are strongly encouraged to have their manuscript proofread by a native English-speaking researcher PRIOR TO SUBMISSION. Articles that refer to currency must use U.S. currency. For all instances of the word "complications," substitute "adverse events. All manuscripts must be submitted online at http://ees.elsevier.com/vgie/ This website provides step-by-step instructions for manuscript submission as well as a tutorial for authors. All peer review, tracking, and follow-up will be done through this system.

PUBLISHING CHARGES

OPEN ACCESS

This is an Open Access journal: all articles will be immediately and permanently free for everyone to read and download. To provide open access, this journal has an Open Access fee (also known as an article publishing charge APC) that needs to be paid by the authors or on their behalf, eg, by their research funder or institution. Permitted third party (re)use is defined by the following Creative Commons user licenses (see https://www.elsevier.com/openaccesslicenses)

Creative Commons Attribution-NonCommercial-NoDerivs (CC BY-NC-ND)
For non-commercial purposes, lets others distribute and copy the article, and to include in a collective work (such as

Submit your article
Please submit your article via http://ees.elsevier.com/vgienen.

Referees
Please submit the names and institutional e-mail addresses of several potential referees. For more details, visit our Support site. Note that the editor retains the sole right to decide whether or not the suggested reviewers are used.

PREPARATION

Your submission consists of up to five items:1. Video file (mandatory)
If your video file is bigger than 500 MB please contact the Editorial Coordinator: VJGIEN@elsevier.com 2. Accompanying manuscript (mandatory)
The structure of your manuscript depends on the section you would like to submit it to. For details and template please see "Choose the Article Type".3. Journal Publishing License Agreement (mandatory)
Please carefully select the Creative Commons Attribution License (see paragraph "Open Access") you wish to apply to your article and submit the respective agreement form along with your article. If you require professional voiceover and/or editing of text slides (integration of text slides into your video at the positions defined in the voiceover script template), please also submit the following items. Please note that these services will be charged extra.4. Text slides (PPT file)
Use of the template (see "Choose the Article Type") is mandatory. Please submit if you require professional editing.5. Voiceover script (excel file)
Use and submission of the voiceover script template is mandatory if you require professional voiceover. (We recommend to also use the template when creating your own voiceover and for correct positioning of text slides in your video.)
Preparing the video
Your video should have the appropriate length to address the topic in question adequately, but should not extend approx. 10 minutes. Please be sure that your video file shows all relevant aspects. Please do not insert an introductory slide (title, author names and affiliations) - this will be done in a consistent manner by our multimedia team. Your video should include text slides (see "Preparing the text slides") to highlight the most important aspects of your findings and may also include explanatory figures. Please ensure to use only core information. The use of the template is mandatory. We strongly encourage you to use histology and/or radiology images in your video for teaching purposes. Please deliver a voiced-over video: While conducting the procedure, narrate throughout in present tense, as if you were teaching a colleague to do the procedure. Including your own 'tips and tricks' along with the basic steps of the procedure will help to enhance the video. It is important for any live narration or discussion to be captured with minimal background noise. It is recommended that a lavaliere/lapel microphone be used on the individual(s) speaking for best quality and clarity. Professional voiceover can be arranged at additional cost (please contact the Editorial Coordinator). Optional for the section "Supplementation to the Encyclopedia": If you wish, please send us your picture (.jpg or .tif format) for publication on our website.

Digital file formats
Formats accepted: MPG (.mpg), MP4 (.mp4), Apple Quick Time (.mov), Microsoft Audio/Video Interlaced format (.avi) Upper limit for the size of files is 500 MB If you have any questions please contact the Editorial Coordinator: VJGIEN@elsevier.com

Preparing the text slides
The text slides should highlight the most important aspects of your video. Please use the template set of slides (see "Choose the Article Type"). The position of each slide within the video is indicated in the voiceover script template. Conflict of Interest/CC License
Please enter the title of your video, state any conflicts of interest (please also state if there are no conflicts) and choose the appropriate CC license based on your Journal Publishing License Agreement. Background
Please briefly describe the background of your publication in bullet points

Take Home Message/Impact on Clinical Practice
This slide will conclude your video. Please enter in bullet points. You may also insert additional slides at other positions if appropriate. Please use our flexible slide template for this purpose.

If you intend to submit a voiced-over video, please insert the text slides at the positions defined in the voiceover script template (esp. if narration is required while the slides are shown). Please pay special attention to correct spelling and grammar as well as uniform layout of your slides. Any corrections to the text slides will significantly delay publication of your video! Alternatively, the slides can be edited into your video by our Multimedia Team. In this case, submission of the separate text slide file is mandatory. Please note that this service will be charged extra.

Please make sure to use Arial or Arial narrow no smaller than 24 pt in order to allow for all information to be legible also on mobile devices with a small screen (smartphone).

Preparing the voiceover
If you intend to request professional voiceover, please use the mandatory script template (see "Choose the Article Type") and fill it out according to the instructions. We recommend use of the template even if you are going to submit an already voiced video. The template will help you prepare the voice stream according to our requirements.

If possible, please provide an already voiced-over video. If necessary, professional voiceover can be arranged at additional cost. Please contact the Editorial Coordinator for more information.

The voiceover should be an expert explanation of the procedure, including tips and tricks and imitating a tutorial situation, thus providing a 'take-home-message'. It can also include an explanation on equipment and materials. Please ensure that the text is in present tense. The language should be vivid as if the user was attending a live process ("Now you can see ...", "This is ...").

IMPORTANT: Please ensure the length of the voice over fits well with the length of your video. The maximum average word count per 10 seconds is 15.
To prepare a voiceover script you will need to watch the video in a format that allows you to make note of the start and end time for each piece of narration. Time intervals should be short (no more than 30 seconds) to ensure exact matching of the spoken text and the images, and long pauses should be avoided. Voiceover is welcome for text slides (please do not simply read the slides but summarize in your own words). Please provide start and end time in the following format: hr:min:sec, e.g. 00:00:00.

It is mandatory that you "time" the audio narration to match the length of the video where possible - reading the written script aloud while you watch the selected clip is one way to do this. The voiceover script template will alert you if your word count exceeds the maximum average word count of 15 words in 10 seconds.

Please specify how long your video file is (time) and which size it has (data). You can give this information in the voiceover script. Ensure that the information on the slides can easily be read and understood within the given time.

Preparing the manuscript
It is important that the text files be saved in the native format of the wordprocessor used. The text should be in single-column format. Keep the layout of the text as simple as possible. Most formatting codes will be removed and replaced on processing the article. In particular, do not use the wordprocessor's options to justify text or to hyphenate words. However, do use bold face, italics, subscripts, superscripts etc. When preparing tables, if you are using a table grid, use only one grid for each individual table and not a grid for each row. If no grid is used, use tabs, not spaces, to align columns. The electronic text should be prepared in a way very similar to that of conventional manuscripts (see also the Guide to Publishing with Elsevier: http://www.elsevier.com/guidepublication). To avoid unnecessary errors you are strongly advised to use the 'spell-check' and 'grammar-check' functions of your wordprocessor.

Style
The manuscript is considered to accompany the video. It is therefore necessary to keep the manuscript short. With the exception of the manuscript parts Abstract and Discussion (see manuscript template), please use bullet-point style. A bullet point is considered a statement of up to 3 sentences referring to a precise question.

The manuscript template can be used for all article types, however, each article type has different requirements. Each paragraph heading will detail (in brackets) which article types it applies to. If no information is given, the paragraph is mandatory for all types.

After choosing an article type, please read the manuscript template carefully and delete all paragraphs that do not apply before you start writing. All instructions and examples are written in grey font and should be deleted before submission.

Details on article structure
You will find more detailed information on the individual parts of each article type in the manuscript template (see " Choose the Article Type").

Peer review
This journal operates a double blind review process. All contributions will be initially assessed by the editor for suitability for the journal. Papers deemed suitable are then sent to a minimum of two independent expert reviewers to assess the scientific quality of the paper. The Editor is responsible for the final decision regarding acceptance or rejection of articles. The Editor's decision is final. More information on types of peer review.

Essential title page information
• **Title.** Concise and informative.Titles are often used in information-retrieval systems. Avoid abbreviations and formulae where possible.
• **Author names and affiliations.** Please clearly indicate the given name(s) and family name(s) of each author and check that all names are accurately spelled. Present the authors' affiliation addresses (where the actual work was done) below the names. Indicate all affiliations with a lower-case superscript letter immediately after the author's name and in front of the appropriate address. Provide the full postal address of each affiliation, including the country name and, if available, the e-mail address of each author.
• **Corresponding author.** Clearly indicate who will handle correspondence at all stages of refereeing and publication, also post-publication. **Ensure that the e-mail address is given and that contact details are kept up to date by the corresponding author.**

• **Present/permanent address.** If an author has moved since the work described in the article was done, or was visiting at the time, a 'Present address' (or 'Permanent address') may be indicated as a footnote to that author's name. The address at which the author actually did the work must be retained as the main, affiliation address. Superscript Arabic numerals are used for such footnotes.

**Structured abstract**
A structured abstract, by means of appropriate headings, should provide the context or background for the research and should state its purpose, basic procedures (selection of study subjects or laboratory animals, observational and analytical methods), main findings (giving specific effect sizes and their statistical significance, if possible), and principal conclusions. It should emphasize new and important aspects of the study or observations.

**Keywords**
Immediately after the abstract, provide a maximum of 6 keywords, using American spelling and avoiding general and plural terms and multiple concepts (avoid, for example, 'and', 'of'). Be sparing with abbreviations: only abbreviations firmly established in the field may be eligible. These keywords will be used for indexing purposes.

**Abbreviations**
Define abbreviations that are not standard in this field in a footnote to be placed on the first page of the article. Such abbreviations that are unavoidable in the abstract must be defined at their first mention there, as well as in the footnote. Ensure consistency of abbreviations throughout the article.

**Formatting of funding sources**
List funding sources in this standard way to facilitate compliance to funder's requirements:

Funding: This work was supported by the National Institutes of Health [grant numbers xxxx, yyyy]; the Bill & Melinda Gates Foundation, Seattle, WA [grant number zzzz]; and the United States Institutes of Peace [grant number aaaa].

It is not necessary to include detailed descriptions on the program or type of grants and awards. When funding is from a block grant or other resources available to a university, college, or other research institution, submit the name of the institute or organization that provided the funding.

If no funding has been provided for the research, please include the following sentence:

This research did not receive any specific grant from funding agencies in the public, commercial, or not-for-profit sectors.

**Units**
Follow internationally accepted rules and conventions: use the international system of units (SI). If other units are mentioned, please give their equivalent in SI.

**Artwork**

*Image manipulation*
Whilst it is accepted that authors sometimes need to manipulate images for clarity, manipulation for purposes of deception or fraud will be seen as scientific ethical abuse and will be dealt with accordingly. For graphical images, this journal is applying the following policy: no specific feature within an image may be enhanced, obscured, moved, removed, or introduced. Adjustments of brightness, contrast, or color balance are acceptable if and as long as they do not obscure or eliminate any information present in the original. Nonlinear adjustments (e.g. changes to gamma settings) must be disclosed in the figure legend.

*Electronic artwork*

**General points**
• Make sure you use uniform lettering and sizing of your original artwork.
• Embed the used fonts if the application provides that option.
• Aim to use the following fonts in your illustrations: Arial, Courier, Times New Roman, Symbol, or use fonts that look similar.
• Number the illustrations according to their sequence in the text.
• Use a logical naming convention for your artwork files.
• Provide captions to illustrations separately.
• Size the illustrations close to the desired dimensions of the published version.
• Submit each illustration as a separate file.
A detailed guide on electronic artwork is available.

You are urged to visit this site; some excerpts from the detailed information are given here.

Formats
If your electronic artwork is created in a Microsoft Office application (Word, PowerPoint, Excel) then please supply 'as is' in the native document format.
Regardless of the application used other than Microsoft Office, when your electronic artwork is finalized, please 'Save as' or convert the images to one of the following formats (note the resolution requirements for line drawings, halftones, and line/halftone combinations given below):
EPS (or PDF): Vector drawings, embed all used fonts.
TIFF (or JPEG): Color or grayscale photographs (halftones), keep to a minimum of 300 dpi.
TIFF (or JPEG): Bitmapped (pure black & white pixels) line drawings, keep to a minimum of 1000 dpi.
TIFF (or JPEG): Combinations bitmapped line/halftone (color or grayscale), keep to a minimum of 500 dpi.

Please do not:
• Supply files that are optimized for screen use (e.g., GIF, BMP, PICT, WPG); these typically have a low number of pixels and limited set of colors;
• Supply files that are too low in resolution;
• Submit graphics that are disproportionately large for the content.

Illustration services
Elsevier's WebShop offers Illustration Services to authors preparing to submit a manuscript but concerned about the quality of the images accompanying their article. Elsevier's expert illustrators can produce scientific, technical and medical-style images, as well as a full range of charts, tables and graphs. Image 'polishing' is also available, where our illustrators take your image(s) and improve them to a professional standard. Please visit the website to find out more.

Figure captions
Ensure that each illustration has a caption. Supply captions separately, not attached to the figure. A caption should comprise a brief title (not on the figure itself) and a description of the illustration. Keep text in the illustrations themselves to a minimum but explain all symbols and abbreviations used.

Tables
Please submit tables as editable text and not as images. Tables can be placed either next to the relevant text in the article, or on separate page(s) at the end. Number tables consecutively in accordance with their appearance in the text and place any table notes below the table body. Be sparing in the use of tables and ensure that the data presented in them do not duplicate results described elsewhere in the article. Please avoid using vertical rules.

References
Citation in text
Please ensure that every reference cited in the text is also present in the reference list (and vice versa). Any references cited in the abstract must be given in full. Unpublished results and personal communications are not recommended in the reference list, but may be mentioned in the text. If these references are included in the reference list they should follow the standard reference style of the journal and should include a substitution of the publication date with either 'Unpublished results' or 'Personal communication'. Citation of a reference as 'in press' implies that the item has been accepted for publication.

Reference links
Increased discoverability of research and high quality peer review are ensured by online links to the sources cited. In order to allow us to create links to abstracting and indexing services, such as Scopus, CrossRef and PubMed, please ensure that data provided in the references are correct. Please note that incorrect surnames, journal/book titles, publication year and pagination may prevent link creation. When copying references, please be careful as they may already contain errors. Use of the DOI is encouraged.

A DOI can be used to cite and link to electronic articles where an article is in-press and full citation details are not yet known, but the article is available online. A DOI is guaranteed never to change, so you can use it as a permanent link to any electronic article. An example of a citation using DOI for an article not yet in an issue is: VanDecar J.C., Russo R.M., James D.E., Ambeh W.B., Franke M.

Web references
As a minimum, the full URL should be given and the date when the reference was last accessed. Any further information, if known (DOI, author names, dates, reference to a source publication, etc.), should also be given. Web references can be listed separately (e.g., after the reference list) under a different heading if desired, or can be included in the reference list.

Reference management software
Most Elsevier journals have their reference template available in many of the most popular reference management software products. These include all products that support Citation Style Language styles, such as Mendeley and Zotero, as well as EndNote. Using the word processor plug-ins from these products, authors only need to select the appropriate journal template when preparing their article, after which citations and bibliographies will be automatically formatted in the journal's style. If no template is yet available for this journal, please follow the format of the sample references and citations as shown in this Guide.

Users of Mendeley Desktop can easily install the reference style for this journal by clicking the following link:
When preparing your manuscript, you will then be able to select this style using the Mendeley plug-ins for Microsoft Word or LibreOffice.

Reference style
Text: Indicate references by number(s) in square brackets in line with the text. The actual authors can be referred to, but the reference number(s) must always be given.
List: Number the references (numbers in square brackets) in the list in the order in which they appear in the text.
Examples:
Reference to a journal publication:
Reference to a book:
Reference to a chapter in an edited book:
Reference to a website:
[4] Cancer Research UK. Cancer statistics reports for the UK, http://www.cancerresearchuk.org/aboutcancer/statistics/cancerstatsreport/; 2003 [accessed 13.03.03]. Note shortened form for last page number. e.g., 51–9, and that for more than 6 authors the first 6 should be listed followed by 'et al.' For further details you are referred to 'Uniform Requirements for Manuscripts submitted to Biomedical Journals' (J Am Med Assoc 1997;277:927–34) (see also Samples of Formatted References).

Journal abbreviations source
Journal names should be abbreviated according to the List of Title Word Abbreviations.

Submission checklist
The following list will be useful during the final checking of an article prior to sending it to the journal for review. Please consult this Guide for Authors for further details on any item.

Ensure that you have: chosen one of the available article types and used the mandatory templates for your submission made up your mind if you prefer to insert the text slides yourself and create your own voiceover (no extra costs), or if you will request professional voiceover and/or editing upon submission (extra cost, longer production time) selected a CC license that defines how others may use your open access video and article once published (Journal Publishing License Agreement), and included the license information both in your manuscript and the appropriate text slide in your video closely followed the instructions while preparing manuscript, text slides and voiceover

Ensure that the following items are present:
One author has been designated as the corresponding author with contact details: E-mail address, full postal address, phone numbers. All necessary files have been uploaded: Video, Manuscript, Journal Publishing License Agreement (optional: Voiceover script, Text slides).

**Further considerations:** Manuscript and text slides have been 'spell-checked' and 'grammar-checked.' All author names and affiliations have been entered correctly both in the manuscript and in EES. Any additional text slides have been prepared using the flexible slide template. References are in the correct format for this journal. All references mentioned in the Reference list are cited in the text, and vice versa. Permission has been obtained for use of copyrighted material from other sources (including the Web). Conflict of Interest Statement has been included on the manuscript and on the appropriate text slide in the video. All ethical standards have been considered and included in the manuscript.

For any further information please visit our customer support site at [http://support.elsevier.com](http://support.elsevier.com) or contact the Editorial Coordinator at VJGIEN@elsevier.com.

**AFTER ACCEPTANCE**

**Proofs**
During production, proofs of the edited video and the typeset manuscript will be emailed to the corresponding author separately. In order to ensure fast production, please respond within 7 days.

One set of page proofs (as PDF files) will be sent by e-mail to the corresponding author (if we do not have an e-mail address then paper proofs will be sent by post) or, a link will be provided in the e-mail so that authors can download the files themselves. Elsevier now provides authors with PDF proofs which can be annotated; for this you will need to download Adobe Reader version 7 (or higher) available free from [http://get.adobe.com/reader](http://get.adobe.com/reader). Instructions on how to annotate PDF files will accompany the proofs (also given online). The exact system requirements are given at the Adobe site: [http://www.adobe.com/products/reader/tech-specs.html](http://www.adobe.com/products/reader/tech-specs.html).

If you do not wish to use the PDF annotations function, you may list the corrections (including replies to the Query Form) and return them to Elsevier in an e-mail. Please list your corrections quoting line number. If, for any reason, this is not possible, then mark the corrections and any other comments (including replies to the Query Form) on a printout of your proof and return by fax, or scan the pages and e-mail, or by post. Please use this proof only for checking the typesetting, editing, completeness and correctness of the text, tables and figures. Significant changes to the article as accepted for publication will only be considered at this stage with permission from the Editor. We will do everything possible to get your article published quickly and accurately – please let us have all your corrections within 7 days. It is important to ensure that all corrections are sent back to us in one communication: please check carefully before replying, as inclusion of any subsequent corrections cannot be guaranteed. Proofreading is solely your responsibility. Note that Elsevier may proceed with the publication of your article if no response is received.

**Offprints**

The corresponding author will, at no cost, receive a customized Share Link providing 50 days free access to the final published version of the article on ScienceDirect. The Share Link can be used for sharing the article via any communication channel, including email and social media. For an extra charge, paper offprints can be ordered via the offprint order form which is sent once the article is accepted for publication. Both corresponding and co-authors may order offprints at any time via Elsevier's Webshop. Corresponding authors who have published their article open access do not receive a Share Link as their final published version of the article is available open access on ScienceDirect and can be shared through the article DOI link.
