DESCRIPTION

*Actas Dermo-Sifiliográficas*, founded in 1909, is the oldest monthly medical journal published in Spain. It has been indexed in the Medline database since 2006, and has become a vehicle for expressing the most current and modern Spanish medicine. All articles are subjected to a rigorous peer review process and careful editing for literary and scientific style. Besides the classic Original and Clinical Case Study sections, we also include Reviews, Case Diagnoses, and Book Reviews.

*Actas Dermo-Sifiliográficas* is an essential publication for anyone who needs to be current on all aspects of Spanish and world dermatology. Indexed in: Medline, IME, Embase/Excerpta Medica, Embase, Toxline, Cab Abstracts, Cab Health, Cancerlit NIm, Serline: Biomed, Bibliomed, Pascal, Scopus, IBECs.

*Actas Dermo-Sifiliográficas*, fundada en 1909, es la más antigua de las revistas médicas mensuales editadas en España. En el año 2006 ha sido indexada en la base de datos de Medline, y se ha convertido en uno de los vehículos de expresión de la medicina española más actuales y modernos. Todos los artículos son sometidos a un riguroso proceso de revisión por pares y a una cuidadosa corrección de estilo, tanto literario como científico. Junto a las clásicas secciones de Originales y Casos clínicos, destacan las Revisiones, Casos para el diagnóstico y Crítica de libros.

EDITORIAL BOARD

Editor-in-Chief / Directora
Y. Gilaberte Calzada, Servicio de Dermatología, Hospital San Jorge, Huesca

Editor / Redactor Jefe
E. Nagore, Departamento de Dermatología, Instituto Valenciano de Oncología, Valencia

Assistant Editors / Editores Adjuntos
S. Arias Santiago, Hospital Virgen de las Nieves, Granada
D. Moreno Ramirez, Hospital Universitario Virgen Macarena, Sevilla
INTRODUCTION

Actas Dermo-Sifiliográficas is the official publication of the Spanish Academy of Dermatology and Venereology (AEDV). Founded by Juan de Aza in 1909, it is the longest-standing monthly Spanish medical journal. The journal is dedicated to articles on scientific research and continuing education with subjects related to medical-surgical dermatology and venereology. The journal is published in Spanish in its printed version and in Spanish and English in its on-line edition.

We suggest that articles by Spanish authors should comply with the general criteria of Law 14/2007, from 3rd July, for biomedical research (BOE n 159), which protects the rights of individuals who are subjects of research. Clinical assays should be registered with public databases prior to their initiation and patient recruitment, and only after approval of the institutional or regional Clinical Research Ethics Committee. The authors should provide the archive number and database where the assay is registered. For all clinical assays that initiate patient recruitment as of 1 January 2017, registration in public databases will be mandatory. Assays with patient recruitment prior to this date may still be submitted to the Journal for evaluation.

Types of article

Originals. This section includes original works of clinical and basic research. The recommended designs are experimental studies (clinical trials), analytic observational (case-control and cohorts) or descriptive ones (cross-sectional). To elaborate the clinical trials, must follow the CONSORT standards, available under http://www.consort-statement.org, the STARD initiative for diagnostic tests, available under http://www.stard-statement.org and for observational studies the STROBE guidelines available under http://www.strobe-statement.org/fileadmin/Strobe/uploads/translations/STROBE_short_Spanish.pdf

For single-centre studies, it is recommended that the number of signatories not exceed 6. More authors maybe considered for multicentre studies. In any case, each authors contribution to the manuscript must be specified. The maximum word count is 2500 words (excluding the title page, abstract, references, tables and figure legends). Up to 30 references, 6 figures and 6 tables will be accepted. These requirements may only be changed in exceptional situations and with prior permission from the Editor. For online publishing only, it is recommended that the authors submit all tables, figures and methodology that are not essential for understanding the study but that are useful for replicating the study or for a more thorough reading of it. The manuscript should be structured into the following sections:

1. Abstract and key words. The abstract should be structured with the following sections: Background and objectives, material (or patients) and methods, results, and conclusions. Up to 250 words can be included.

2. Introduction. This should be brief and only include enough explanation for the reader to understand the text that follows. Do not include either tables or figures. Include a final paragraph that clearly states the objective(s) of the work.

3. Material (or patients) and method. In this section, the center where the study was performed, the duration, the characteristics of the patient series studied, the selection criteria used, the techniques used, and the statistical methods applied should be included. Indicate the name and address (city, country) of the manufacturer of material used.

4. Results. This section should present, but not interpret, the observations made with the method used. These data should be presented in the text with the support of tables and figures.

5. Discussion. This section should emphasize the most important aspects of the study and the conclusions that can be drawn. The authors should present their own opinions on the topic. It is important in this section: a) the meaning and practical application of the results; b) discussion of a possible inconsistency in the methodology and reasons why the results might be valid; c) list of similar publications and comparison between the areas of agreement and disagreement; and d) indications and guidelines for future research. On the other hand, avoid converting the discussion into a review of the topic and a repetition of the concepts presented in the introduction. Do not repeat the study results.

Images in Dermatology To be considered for publication, images must be high quality originals that reflect the clinical characteristics of dermatological diseases or the results of additional tests in dermatology and have significant teaching value (either due to their uniqueness or visual impact),
which must be noted in the accompanying text. The image presented must be unique, although it may be composed of up to 2 photographies and shall be accompanied by a legend no longer than 200 words, with no associated references or abstract. The title should be brief (no more than 10 words), and it is recommended that there are no more than 3 authors be included. The images will be published on hardcopy or in electronic format at the discretion of the Journal's Editorial Committee.

Case reports. Exhibition of short series of cases of rare or interesting disease, which make an important contribution to knowledge. Isolated cases, unless they are truly exceptional, will not be accepted. It must include an unstructured abstract (up to 150 words) and key words. The text may be up to 1250 words (excluding the title page, abstract, references, tables, and figure captions). Up to 5 figures and/or tables and 15 references are permitted. It is recommended that there are no more than 5 named authors. The case reports should include: a) an abstract (with a brief introduction, case descriptions, and discussion and/or conclusion); b) the text, with the following sections: introduction, clinic cases, discussion; and c) references. This section will appear in the electronic version of *Actas Dermo-Sifiliográficas*.

Cases for diagnosis. These manuscripts should include original clinical cases that have not been published previously in another journal. One to 3 authors will be allowed. Do not include an abstract. Key words are required. These manuscripts should include: 1. A first part (case presentation) with up to 200 words that can fit on a single printed page. This part should contain the following: a) the case history; b) physical examination; c) histopathology (that describes the histologic findings but does not give conclusive information about the diagnosis); d) complementary tests; e) figures of best possible quality, in color (maximum 3): these may be clinical, histologic, dermatoscopic,... with no figure captions (their meaning should be described in the text). 2. Second part (diagnosis and comments). Up to 450 words, excluding references, in order to be fitted in one printed page. This part should include: a) the diagnosis; b) course and treatment (of the patient presented); c) comments (on the reference disease, the case presented, and the differential diagnosis); d) references (up to 6 references).

Case and Research Letters. This Section is for publication of brief reports on studies or clinical cases. From 1 to 4 authors. The text can be up to 800 words. No abstract. Include key words. Up to 3 figures and/or tables. Up to 10 references.

Letters to the editor. This Section is for publishing critical opinions, agreements, praise or any other type of observation regarding articles published in the journal. This section can also be used for suggestions, criticism, or comments about any formal aspect or content of the issue of *Actas Dermo-Sifiliográficas*. From 1 to 4 authors are allowed. Do not include abstract. Include key words. The maximum length of text allowed is 800 words with up to 3 figures and/or tables and up to 10 references.

Opinion article. It includes the opinion of the author on a subject of his/her specialty, giving his/her personal thoughts on it, with the possibility of referring to related publications. One or two authors can be included. Do not include a abstract. Include key words. It is not generally divided into sections. References may be included. It may have an extension of 1250-2500 words not counting the references.

Review. Reviews update a topic of dermatological importance, reviewing it in depth based on updated quality scientific evidence. From 1 to 3 authors The length shall not exceed 3,500 words (excluding the title page, abstract, references, tables and figure legends) and a maximum of 100 references. Includes an unstructured abstract (maximum 150 words) and keywords. The reviews will be conducted at the express request of the Journal’s Editorial Committee or by a previous request from the author to the director (directoractas@aedv.es) and will be subjected to a peer review and consideration as Continuing Medical Education material. As part of the Continuing Medical Education program the authors will be requested to prepare 4 multiple-choice questions, whose standards of preparation will be detailed along with the request. Reviews that include recommendations on procedures and/or preventive, diagnostic and/or therapeutic techniques shall include the level of evidence and degree of recommendation following the SIGN, Oxford or NICE classification systems. As well as general reviews, the journal *Actas Dermo-Sifiliográficas* publishes reviews on issues related to clinical practice, controversies and developments, with the following standards for authors:
**Practical dermatology.** A review article on a topic with an eminently practical approach. Avoid an extensively long development of the work, orienting the subject towards recommendations for the daily clinical practice. Include from 1 to 3 authors. Length up to 2500 words (excluding the title page, abstract, references, tables, and figure captions). Include a non-structured (up to 150 words) and include key words. Use of figures, graphics, tables, or algorithms is recommended to facilitate the understanding of the topic. These articles are commissioned expressly by the Editor-in-Chief or by prior request of the author to the Editor (directoractas@aedv.es) and will be subjected to peer review.

**Controversies in dermatology.** These are review articles on a topic that has some controversial aspects. The author should give some personal criteria and cover the different positions found in the literature. Include from 1 to 3 authors. Maximum length should be up to 3,700 words (excluding the title page, abstract, references, tables, and figure captions). Include a non-structured abstract (up to 150 words) and key words. Use of figures or tables is recommended if they facilitate the understanding of the topic. These articles are commissioned expressly by the Editor-in-Chief or by prior request of the author to the Editor (directoractas@aedv.es) and will be subjected to peer review.

**Novelties in Dermatology.** These are articles in which a subject of great current interest is reviewed and briefly commented on. Include from 1 to 3 authors. Maximum length should be up to 2,500 words (excluding the title page, abstract, references, tables, and figure captions). Include a non-structured abstract (maximum 150 words) and key words. These articles are commissioned expressly by the Editor-in-Chief or by prior request of the author to the Editor (directoractas@aedv.es) and will be subjected to peer review.

**Consensus statements.** These articles cover the content of consensus statements, recommendations, and therapeutic or diagnostic guidelines drafted by a working group or a scientific society. Include a non structured abstract (up to 150 words) and key words.

**History and humanities in dermatology.** These are review articles on the history or humanities related to dermatology and venereology. A maximum length up to 1500 without abstract. We admit 3 figures/tables and 10 references. These articles are commissioned expressly by the Editor-in-Chief or by prior request of the author to the Editor (directoractas@aedv.es) and will be subjected to peer review.

**Practical Dermoscopy.** This Section is dedicated to the publication of clinical-dermatoscopic cases. Includes clinical cases whose clinical diagnosis is difficult and in which dermoscopy provides the diagnostic key. Include from 1 to 3 authors. Do not include an abstract The practical dermoscopy should include: 1. Case presentation: include a 2 clinical imaging study, brief descriptive text without giving the diagnostic . 2. Dermoscopic images presentation: 2 dermoscopic images should be accompanied by the question "What is the diagnosis?". 3. Comment: should be no longer than 400 words, excluding the references. Includes dermatoscopic feature description emphasizing the differential diagnosis keys References: no more than 6.

**Videos of Surgical Procedures in Dermatology.** Will focus on the use of innovative surgical techniques and modifications to existing ones for the resolution of clinical cases as well as the use of known surgical techniques to solve clinical complex cases. Include from 1 to 4 authors. Extension up to 800 words (excluding title page, references, tables and figure captions). Do not include abstract. Include key-words. Figures and tables (maximum 3 figures and / or tables) should be embedded in the video stream. References (no more than 5) at the end of the manuscript and video stream. The manuscript should be structured into the following sections: introduction, surgical technique description, indications/contraindications, complications, conclusions and references. The link to the video will be placed at the foot of the manuscript. Video lasts up to 10 minutes. Surgical video will show complete surgery procedure from baseline to final outcome. It is recommended to include video footage or images of final postsurgical outcomes medium- to long term. To improve the understanding of the procedure described, short and clear commentaries (audio or subtitles) should be incorporated into the video file. Submit videos according to the following acceptable file formats .mov, .wmv, .mpg, .mpeg, .mp4 or .avi, and maximum file size of 50 MB. Verify that the videos are viewable in QuickTime or Windows Media Player . Editorial board of Actas Dermo-Sifiliográficas reserves the right to edit videos according to editorial line the journal. Accepted videos will be posted for viewing via streaming on http://ees.elsevier.com/ad, and its manuscript will be published in the print version of the journal.
Resident’s Forum. This section, which includes two manuscripts in each issue, is aimed at collecting short bibliographic reviews written by Dermatology Medical-Surgical and Venereology resident physicians who are aspiring academics to the Spanish Academy of Dermatology and Venereology (AEDV). These reviews will be assigned after contact is made with their representatives in the AEDV Board of Directors. Each review will cover a subject considered to be of maximum interest and current, based on 2 to 4 fundamental bibliographic references. It can include a maximum of 3 authors (all of them resident physicians in Dermatology). The manuscript title must include the prefix "RF-" followed by the review subject. Do not include a summary. Include key words. Maximum length of the text permitted is 500 words. In exceptional cases, a maximum of 1 figure and/or table will be accepted. The bibliography should include 3-4 references, from PubMed indexed journals in relation with the subject of the original article commented. The articles of this section will be written on request of the section coordinators.

Other sections. Book reviews, Obituaries.

Supplements. The aim of the supplements is to provide more detailed information on a monographic subject. The supplements will have a Coordinator and different authors who will collaborate in drafting the corresponding articles. These articles will be reviewed in the same way as regular articles. These articles are commissioned expressly by the Editor-in-Chief or by prior request of the coordinator to the Editor (directoractas@aedv.es). Funding is required for the publication of these supplements. They must follow the same publication guidelines as Actas Dermo-Sifiliográficas.

Contact details for submission
All manuscripts must be submitted online through the Actas Dermo-Sifiliográficas EES Web site at http://ees.elsevier.com/ad.
Electronic files of the manuscript contents must be uploaded at that Web site and the onscreen steps should be followed to submit the manuscript to the Editorial Office. In said platform, the type of article structure/section should be selected that is most appropriate for the type of manuscript being submitted.

In addition to the cover page, the remainder of the manuscript and any images, a cover letter should be attached with the following information:

COVER LETTER:

The cover letter accompanying the manuscript should include:
1) Title of the article.
2) Section of the Journal for which it is being submitted for consideration.
3) An explanation (max. one paragraph) of the original contribution and relevance of the article with regards to the scope of the Journal.
4) A declaration stating that the study is original and has not been submitted for consideration to any other scientific journals.
5) In the event that part of the article has been previously published by another journal (redundant or duplicate publication), this must be explained in detail. It is also necessary to declare that the author(s) has been granted the necessary publication permission by the author(s) and Editor (publishing house) of the journal from which it was extracted.
6) A statement that the authors have respected the "Ethical responsibilities" included in these guidelines. During the submission process, they are also asked to attach the signed document that affirms compliance by all authors, specifically the clauses referring to the protection of human and animal rights, data confidentiality, right to privacy and informed consent. This document will be sent as part of the submission.
7) A statement that the signing authors have complied with the requirements for authorship as outlined in the authorship section of these guidelines.
8) A declaration by each of the authors stating any conflict of interests and affirming that this declaration has also been included in the manuscript.
9) A statement that any funding or acknowledgements have also been mentioned in the body of the manuscript.
This Journal is subscription-based, and authors are not required to pay for either the evaluation or publication of their manuscripts, although they are required to transfer their copyright. Once the article has been accepted for publication, the corresponding author will receive an online link to sign a copyright transfer agreement.

Technical support is available via the Elsevier Support Center. In any correspondence, please provide the corresponding author's name, title of the manuscript, manuscript number (if assigned), and a clear description of the problem.

**Formal Aspects of the Manuscript**

The entire manuscript should be typed double-spaced on DIN A4 pages, using uneven margins, 12-point letter size, with 2.5 cm margins on the right and left side. Number the pages consecutively, beginning on page 1 (title page), in the upper right corner.

Only use common abbreviations in the field of dermatology. Avoid abbreviations in the title or abstract. When an abbreviation appears for the first time, it should be preceded by the complete term to which it refers, except in the case of common units of measure, which are preferably expressed in the International System of Units. Trade names should be avoided in all the manuscript. Use generic names.

Authors can sign their articles with the name and the last name or with the two last names joined by a hyphen.

**Page charges**

This journal has no page charges.

**Language**

Articles may be submitted in Spanish or English.

**Submission checklist**

You can use this list to carry out a final check of your submission before you send it to the journal for review. Please check the relevant section in this Guide for Authors for more details.

Ensure that the following items are present:

One author has been designated as the corresponding author with contact details:
- E-mail address
- Full postal address

All necessary files have been uploaded:
**Manuscript:**
- Include keywords
- All figures (include relevant captions)
- All tables (including titles, description, footnotes)
- Ensure all figure and table citations in the text match the files provided
- Indicate clearly if color should be used for any figures in print

**Graphical Abstracts / Highlights files** (where applicable)
**Supplemental files** (where applicable)

Further considerations
- Manuscript has been 'spell checked' and 'grammar checked'
- All references mentioned in the Reference List are cited in the text, and vice versa
- Permission has been obtained for use of copyrighted material from other sources (including the Internet)
- A competing interests statement is provided, even if the authors have no competing interests to declare
- Journal policies detailed in this guide have been reviewed
- Referee suggestions and contact details provided, based on journal requirements

For further information, visit our Support Center.

**BEFORE YOU BEGIN**
Ethics in publishing
Please see our information pages on Ethics in publishing and Ethical guidelines for journal publication.

Human and animal rights
If the work involves the use of human subjects, the author should ensure that the work described has been carried out in accordance with The Code of Ethics of the World Medical Association (Declaration of Helsinki) for experiments involving humans; Uniform Requirements for manuscripts submitted to Biomedical journals. Authors should include a statement in the manuscript that informed consent was obtained for experimentation with human subjects. The privacy rights of human subjects must always be observed.

All animal experiments should comply with the ARRIVE guidelines and should be carried out in accordance with the U.K. Animals (Scientific Procedures) Act, 1986 and associated guidelines, EU Directive 2010/63/EU for animal experiments, or the National Institutes of Health guide for the care and use of Laboratory animals (NIH Publications No. 8023, revised 1978) and the authors should clearly indicate in the manuscript that such guidelines have been followed.

Declaration of interest
All authors must disclose any financial and personal relationships with other people or organizations that could inappropriately influence (bias) their work. Examples of potential conflicts of interest include employment, consultancies, stock ownership, honoraria, paid expert testimony, patent applications/registrations, and grants or other funding. If there are no conflicts of interest then please state this: 'Conflicts of interest: none'. More information.

Submission declaration and verification
Submission of an article implies that the work described has not been published previously (except in the form of an abstract or as part of a published lecture or academic thesis or as an electronic preprint, see 'Multiple, redundant or concurrent publication' section of our ethics policy for more information), that it is not under consideration for publication elsewhere, that its publication is approved by all authors and tacitly or explicitly by the responsible authorities where the work was carried out, and that, if accepted, it will not be published elsewhere in the same form, in English or in any other language, including electronically without the written consent of the copyright-holder. To verify originality, your article may be checked by the originality detection service CrossCheck.

Authorship
All authors should have made substantial contributions to all of the following: (1) the conception and design of the study, or acquisition of data, or analysis and interpretation of data, (2) drafting the article or revising it critically for important intellectual content, (3) final approval of the version to be submitted.

Changes to authorship
Authors are expected to consider carefully the list and order of authors before submitting their manuscript and provide the definitive list of authors at the time of the original submission. Any addition, deletion or rearrangement of author names in the authorship list should be made only before the manuscript has been accepted and only if approved by the journal Editor. To request such a change, the Editor must receive the following from the corresponding author: (a) the reason for the change in author list and (b) written confirmation (e-mail, letter) from all authors that they agree with the addition, removal or rearrangement. In the case of addition or removal of authors, this includes confirmation from the author being added or removed.

Only in exceptional circumstances will the Editor consider the addition, deletion or rearrangement of authors after the manuscript has been accepted. While the Editor considers the request, publication of the manuscript will be suspended. If the manuscript has already been published in an online issue, any requests approved by the Editor will result in a corrigendum.

Clinical trial results
In line with the position of the International Committee of Medical Journal Editors, the journal will not consider results posted in the same clinical trials registry in which primary registration resides to be prior publication if the results posted are presented in the form of a brief structured (less than 500 words) abstract or table. However, divulging results in other circumstances (e.g., investors' meetings) is discouraged and may jeopardise consideration of the manuscript. Authors should fully disclose all posting in registries of results of the same or closely related work.
Reporting clinical trials
Randomized controlled trials should be presented according to the CONSORT guidelines. At manuscript submission, authors must provide the CONSORT checklist accompanied by a flow diagram that illustrates the progress of patients through the trial, including recruitment, enrollment, randomization, withdrawal and completion, and a detailed description of the randomization procedure. The CONSORT checklist and template flow diagram are available online.

Registration of clinical trials
Registration in a public trials registry is a condition for publication of clinical trials in this journal in accordance with International Committee of Medical Journal Editors recommendations. Trials must register at or before the onset of patient enrolment. The clinical trial registration number should be included at the end of the abstract of the article. A clinical trial is defined as any research study that prospectively assigns human participants or groups of humans to one or more health-related interventions to evaluate the effects of health outcomes. Health-related interventions include any intervention used to modify a biomedical or health-related outcome (for example drugs, surgical procedures, devices, behavioural treatments, dietary interventions, and process-of-care changes). Health outcomes include any biomedical or health-related measures obtained in patients or participants, including pharmacokinetic measures and adverse events. Purely observational studies (those in which the assignment of the medical intervention is not at the discretion of the investigator) will not require registration.

Copyright
Upon acceptance of an article, authors will be asked to complete a 'Journal Publishing Agreement' (see more information on this). An e-mail will be sent to the corresponding author confirming receipt of the manuscript together with a 'Journal Publishing Agreement' form or a link to the online version of this agreement.

Subscribers may reproduce tables of contents or prepare lists of articles including abstracts for internal circulation within their institutions. Permission of the Publisher is required for resale or distribution outside the institution and for all other derivative works, including compilations and translations. If excerpts from other copyrighted works are included, the author(s) must obtain written permission from the copyright owners and credit the source(s) in the article. Elsevier has preprinted forms for use by authors in these cases.

Author rights
As an author you (or your employer or institution) have certain rights to reuse your work. More information.

Elsevier supports responsible sharing
Find out how you can share your research published in Elsevier journals.

Role of the funding source
You are requested to identify who provided financial support for the conduct of the research and/or preparation of the article and to briefly describe the role of the sponsor(s), if any, in study design; in the collection, analysis and interpretation of data; in the writing of the report; and in the decision to submit the article for publication. If the funding source(s) had no such involvement then this should be stated.

Funding body agreements and policies
Elsevier has established a number of agreements with funding bodies which allow authors to comply with their funder's open access policies. Some funding bodies will reimburse the author for the Open Access Publication Fee. Details of existing agreements are available online.

Elsevier Publishing Campus
The Elsevier Publishing Campus (www.publishingcampus.com) is an online platform offering free lectures, interactive training and professional advice to support you in publishing your research. The College of Skills training offers modules on how to prepare, write and structure your article and explains how editors will look at your paper when it is submitted for publication. Use these resources, and more, to ensure that your submission will be the best that you can make it.
Language (usage and editing services)
Please write your text in good English (American or British usage is accepted, but not a mixture of these). Authors who feel their English language manuscript may require editing to eliminate possible grammatical or spelling errors and to conform to correct scientific English may wish to use the English Language Editing service available from Elsevier's WebShop.

Informed consent and patient details
Studies on patients or volunteers require ethics committee approval and informed consent, which should be documented in the paper. Appropriate consents, permissions and releases must be obtained where an author wishes to include case details or other personal information or images of patients and any other individuals in an Elsevier publication. Written consents must be retained by the author and copies of the consents or evidence that such consents have been obtained must be provided to Elsevier on request. For more information, please review the Elsevier Policy on the Use of Images or Personal Information of Patients or other Individuals. Unless you have written permission from the patient (or, where applicable, the next of kin), the personal details of any patient included in any part of the article and in any supplementary materials (including all illustrations and videos) must be removed before submission.

Submission
Our online submission system guides you stepwise through the process of entering your article details and uploading your files. The system converts your article files to a single PDF file used in the peer-review process. Editable files (e.g., Word, LaTeX) are required to typeset your article for final publication. All correspondence, including notification of the Editor's decision and requests for revision, is sent by e-mail.

Submit your article
Please submit your article via http://ees.elsevier.com/ad.

Referees
Please submit the names and institutional e-mail addresses of several potential referees. For more details, visit our Support site. Note that the editor retains the sole right to decide whether or not the suggested reviewers are used.

PREPARATION
Double-blind review
This journal uses double-blind review, which means the identities of the authors are concealed from the reviewers, and vice versa. More information is available on our website. To facilitate this, please include the following separately:
Title page (with author details): This should include the title, authors’ names, affiliations, acknowledgements and any Declaration of Interest statement, and a complete address for the corresponding author including an e-mail address.
Blinded manuscript (no author details): The main body of the paper (including the references, figures, tables and any acknowledgements) should not include any identifying information, such as the authors’ names or affiliations.

Use of word processing software
It is important that the file be saved in the native format of the word processor used. The text should be in single-column format. Keep the layout of the text as simple as possible. Most formatting codes will be removed and replaced on processing the article. In particular, do not use the word processor's options to justify text or to hyphenate words. However, do use bold face, italics, subscripts, superscripts etc. When preparing tables, if you are using a table grid, use only one grid for each individual table and not a grid for each row. If no grid is used, use tabs, not spaces, to align columns. The electronic text should be prepared in a way very similar to that of conventional manuscripts (see also the Guide to Publishing with Elsevier). Note that source files of figures, tables and text graphics will be required whether or not you embed your figures in the text. See also the section on Electronic artwork.
To avoid unnecessary errors you are strongly advised to use the 'spell-check' and 'grammar-check' functions of your word processor.

Article structure
Subdivision - numbered sections
Divide your article into clearly defined and numbered sections. Subsections should be numbered 1.1 (then 1.1.1, 1.1.2, ...), 1.2, etc. (the abstract is not included in section numbering). Use this numbering also for internal cross-referencing: do not just refer to 'the text'. Any subsection may be given a brief heading. Each heading should appear on its own separate line.

Introduction
State the objectives of the work and provide an adequate background, avoiding a detailed literature survey or a summary of the results.

Material and methods
Provide sufficient detail to allow the work to be reproduced. Methods already published should be indicated by a reference: only relevant modifications should be described.

Theory/calculation
A Theory section should extend, not repeat, the background to the article already dealt with in the Introduction and lay the foundation for further work. In contrast, a Calculation section represents a practical development from a theoretical basis.

Results
Results should be clear and concise.

Discussion
This should explore the significance of the results of the work, not repeat them. A combined Results and Discussion section is often appropriate. Avoid extensive citations and discussion of published literature.

Conclusions
The main conclusions of the study may be presented in a short Conclusions section, which may stand alone or form a subsection of a Discussion or Results and Discussion section.

Appendices
If there is more than one appendix, they should be identified as A, B, etc. Formulae and equations in appendices should be given separate numbering: Eq. (A.1), Eq. (A.2), etc.; in a subsequent appendix, Eq. (B.1) and so on. Similarly for tables and figures: Table A.1; Fig. A.1, etc.

Essential title page information
• Title. Concise and informative. Titles are often used in information-retrieval systems. Avoid abbreviations and formulae where possible.
• Author names and affiliations. Please clearly indicate the given name(s) and family name(s) of each author and check that all names are accurately spelled. Present the authors' affiliation addresses (where the actual work was done) below the names. Indicate all affiliations with a lower-case superscript letter immediately after the author's name and in front of the appropriate address. Provide the full postal address of each affiliation, including the country name and, if available, the e-mail address of each author.
• Corresponding author. Clearly indicate who will handle correspondence at all stages of refereeing and publication, also post-publication. Ensure that the e-mail address is given and that contact details are kept up to date by the corresponding author.
• Present/permanent address. If an author has moved since the work described in the article was done, or was visiting at the time, a 'Present address' (or 'Permanent address') may be indicated as a footnote to that author's name. The address at which the author actually did the work must be retained as the main, affiliation address. Superscript Arabic numerals are used for such footnotes.

Structured abstract
A structured abstract, by means of appropriate headings, should provide the context or background for the research and should state its purpose, basic procedures (selection of study subjects or laboratory animals, observational and analytical methods), main findings (giving specific effect sizes and their statistical significance, if possible), and principal conclusions. It should emphasize new and important aspects of the study or observations.

Graphical abstract
Although a graphical abstract is optional, its use is encouraged as it draws more attention to the online article. The graphical abstract should summarize the contents of the article in a concise, pictorial form designed to capture the attention of a wide readership. Graphical abstracts should be submitted as a separate file in the online submission system. Image size: Please provide an image with a minimum
of 531 × 1328 pixels (h × w) or proportionally more. The image should be readable at a size of 5 × 13 cm using a regular screen resolution of 96 dpi. Preferred file types: TIFF, EPS, PDF or MS Office files. You can view Example Graphical Abstracts on our information site. Authors can make use of Elsevier’s Illustration Services to ensure the best presentation of their images and in accordance with all technical requirements.

**Highlights**
Highlights are a short collection of bullet points that convey the core findings of the article. Highlights are optional and should be submitted in a separate editable file in the online submission system. Please use 'Highlights' in the file name and include 3 to 5 bullet points (maximum 85 characters, including spaces, per bullet point). You can view example Highlights on our information site.

**Keywords**
Immediately after the abstract, provide a maximum of 6 keywords, using British spelling and avoiding general and plural terms and multiple concepts (avoid, for example, ‘and’, ‘of’). Be sparing with abbreviations: only abbreviations firmly established in the field may be eligible. These keywords will be used for indexing purposes.

**Abbreviations**
Define abbreviations that are not standard in this field in a footnote to be placed on the first page of the article. Such abbreviations that are unavoidable in the abstract must be defined at their first mention there, as well as in the footnote. Ensure consistency of abbreviations throughout the article.

**Acknowledgements**
Collate acknowledgements in a separate section at the end of the article before the references and do not, therefore, include them on the title page, as a footnote to the title or otherwise. List here those individuals who provided help during the research (e.g., providing language help, writing assistance or proof reading the article, etc.).

**Formatting of funding sources**
List funding sources in this standard way to facilitate compliance to funder's requirements:

Funding: This work was supported by the National Institutes of Health [grant numbers xxxx, yyyy]; the Bill & Melinda Gates Foundation, Seattle, WA [grant number zzzz]; and the United States Institutes of Peace [grant number aaaa].

It is not necessary to include detailed descriptions on the program or type of grants and awards. When funding is from a block grant or other resources available to a university, college, or other research institution, submit the name of the institute or organization that provided the funding.

If no funding has been provided for the research, please include the following sentence:

This research did not receive any specific grant from funding agencies in the public, commercial, or not-for-profit sectors.

**Units**
Follow internationally accepted rules and conventions: use the international system of units (SI). If other units are mentioned, please give their equivalent in SI.

**Math formulae**
Please submit math equations as editable text and not as images. Present simple formulae in line with normal text where possible and use the solidus (/) instead of a horizontal line for small fractional terms, e.g., X/Y. In principle, variables are to be presented in italics. Powers of e are often more conveniently denoted by exp. Number consecutively any equations that have to be displayed separately from the text (if referred to explicitly in the text).

**Footnotes**
Footnotes should be used sparingly. Number them consecutively throughout the article. Many word processors can build footnotes into the text, and this feature may be used. Otherwise, please indicate the position of footnotes in the text and list the footnotes themselves separately at the end of the article. Do not include footnotes in the Reference list.

**Artwork**
**Image manipulation**

Whilst it is accepted that authors sometimes need to manipulate images for clarity, manipulation for purposes of deception or fraud will be seen as scientific ethical abuse and will be dealt with accordingly. For graphical images, this journal is applying the following policy: no specific feature within an image may be enhanced, obscured, moved, removed, or introduced. Adjustments of brightness, contrast, or color balance are acceptable if and as long as they do not obscure or eliminate any information present in the original. Nonlinear adjustments (e.g. changes to gamma settings) must be disclosed in the figure legend.

**Electronic artwork**

**General points**

- Make sure you use uniform lettering and sizing of your original artwork.
- Embed the used fonts if the application provides that option.
- Aim to use the following fonts in your illustrations: Arial, Courier, Times New Roman, Symbol, or use fonts that look similar.
- Number the illustrations according to their sequence in the text.
- Use a logical naming convention for your artwork files.
- Provide captions to illustrations separately.
- Size the illustrations close to the desired dimensions of the published version.
- Submit each illustration as a separate file.

A detailed guide on electronic artwork is available.

You are urged to visit this site; some excerpts from the detailed information are given here.

**Formats**

If your electronic artwork is created in a Microsoft Office application (Word, PowerPoint, Excel) then please supply ‘as is’ in the native document format. Regardless of the application used other than Microsoft Office, when your electronic artwork is finalized, please ‘Save as’ or convert the images to one of the following formats (note the resolution requirements for line drawings, halftones, and line/halftone combinations given below):

- EPS (or PDF): Vector drawings, embed all used fonts.
- TIFF (or JPEG): Color or grayscale photographs (halftones), keep to a minimum of 300 dpi.
- TIFF (or JPEG): Bitmapped (pure black & white pixels) line drawings, keep to a minimum of 1000 dpi.
- TIFF (or JPEG): Combinations bitmapped line/halftone (color or grayscale), keep to a minimum of 500 dpi.

Please do not:

- Supply files that are optimized for screen use (e.g., GIF, BMP, PICT, WPG); these typically have a low number of pixels and limited set of colors;
- Supply files that are too low in resolution;
- Submit graphics that are disproportionately large for the content.

**Color artwork**

Please make sure that artwork files are in an acceptable format (TIFF (or JPEG), EPS (or PDF) or MS Office files) and with the correct resolution. If, together with your accepted article, you submit usable color figures then Elsevier will ensure, at no additional charge, that these figures will appear in color online (e.g., ScienceDirect and other sites). Further information on the preparation of electronic artwork.

**Illustration services**

Elsevier's WebShop offers Illustration Services to authors preparing to submit a manuscript but concerned about the quality of the images accompanying their article. Elsevier's expert illustrators can produce scientific, technical and medical-style images, as well as a full range of charts, tables and graphs. Image 'polishing' is also available, where our illustrators take your image(s) and improve them to a professional standard. Please visit the website to find out more.

**Figure captions**

Ensure that each illustration has a caption. Supply captions separately, not attached to the figure. A caption should comprise a brief title (not on the figure itself) and a description of the illustration. Keep text in the illustrations themselves to a minimum but explain all symbols and abbreviations used.
Tables
Please submit tables as editable text and not as images. Tables can be placed either next to the relevant text in the article, or on separate page(s) at the end. Number tables consecutively in accordance with their appearance in the text and place any table notes below the table body. Be sparing in the use of tables and ensure that the data presented in them do not duplicate results described elsewhere in the article. Please avoid using vertical rules and shading in table cells.

References
Citation in text
Please ensure that every reference cited in the text is also present in the reference list (and vice versa). Any references cited in the abstract must be given in full. Unpublished results and personal communications are not recommended in the reference list, but may be mentioned in the text. If these references are included in the reference list they should follow the standard reference style of the journal and should include a substitution of the publication date with either 'Unpublished results' or 'Personal communication'. Citation of a reference as 'in press' implies that the item has been accepted for publication.

Reference links
Increased discoverability of research and high quality peer review are ensured by online links to the sources cited. In order to allow us to create links to abstracting and indexing services, such as Scopus, CrossRef and PubMed, please ensure that data provided in the references are correct. Please note that incorrect surnames, journal/book titles, publication year and pagination may prevent link creation. When copying references, please be careful as they may already contain errors. Use of the DOI is encouraged.

A DOI can be used to cite and link to electronic articles where an article is in-press and full citation details are not yet known, but the article is available online. A DOI is guaranteed never to change, so you can use it as a permanent link to any electronic article. An example of a citation using DOI for an article not yet in an issue is: VanDecar J.C., Russo R.M., James D.E., Ambeh W.B., Franke M. (2003). Aseismic continuation of the Lesser Antilles slab beneath northeastern Venezuela. Journal of Geophysical Research, https://doi.org/10.1029/2001JB000884. Please note the format of such citations should be in the same style as all other references in the paper.

Web references
As a minimum, the full URL should be given and the date when the reference was last accessed. Any further information, if known (DOI, author names, dates, reference to a source publication, etc.), should also be given. Web references can be listed separately (e.g., after the reference list) under a different heading if desired, or can be included in the reference list.

Data references
This journal encourages you to cite underlying or relevant datasets in your manuscript by citing them in your text and including a data reference in your Reference List. Data references should include the following elements: author name(s), dataset title, data repository, version (where available), year, and global persistent identifier. Add [dataset] immediately before the reference so we can properly identify it as a data reference. The [dataset] identifier will not appear in your published article.

References in a special issue
Please ensure that the words 'this issue' are added to any references in the list (and any citations in the text) to other articles in the same Special Issue.

Reference style
Text: Indicate references by superscript numbers in the text. The actual authors can be referred to, but the reference number(s) must always be given.
List: Number the references in the list in the order in which they appear in the text.
Examples:
Reference to a journal publication:
Reference to a book:
Reference to a chapter in an edited book:
Note shortened form for last page number. e.g., 51–9, and that for more than 6 authors the first 6 should be listed followed by 'et al.’ For further details you are referred to 'Uniform Requirements for Manuscripts submitted to Biomedical Journals' (J Am Med Assoc 1997;277:927–34)(see also Samples of Formatted References).

Journal abbreviations source
Journal names should be abbreviated according to the List of Title Word Abbreviations.

Video
Elsevier accepts video material and animation sequences to support and enhance your scientific research. Authors who have video or animation files that they wish to submit with their article are strongly encouraged to include links to these within the body of the article. This can be done in the same way as a figure or table by referring to the video or animation content and noting in the body text where it should be placed. All submitted files should be properly labeled so that they directly relate to the video file’s content. In order to ensure that your video or animation material is directly usable, please provide the files in one of our recommended file formats with a preferred maximum size of 150 MB. Video and animation files supplied will be published online in the electronic version of your article in Elsevier Web products, including ScienceDirect. Please supply 'stills' with your files: you can choose any frame from the video or animation or make a separate image. These will be used instead of standard icons and will personalize the link to your video data. For more detailed instructions please visit our video instruction pages. Note: since video and animation cannot be embedded in the print version of the journal, please provide text for both the electronic and the print version for the portions of the article that refer to this content.

Supplementary material
Supplementary material such as applications, images and sound clips, can be published with your article to enhance it. Submitted supplementary items are published exactly as they are received (Excel or PowerPoint files will appear as such online). Please submit your material together with the article and supply a concise, descriptive caption for each supplementary file. If you wish to make changes to supplementary material during any stage of the process, please make sure to provide an updated file. Do not annotate any corrections on a previous version. Please switch off the 'Track Changes' option in Microsoft Office files as these will appear in the published version.

AFTER ACCEPTANCE

Proofs
One set of page proofs (as PDF files) will be sent by e-mail to the corresponding author (if we do not have an e-mail address then paper proofs will be sent by post) or, a link will be provided in the e-mail so that authors can download the files themselves. Elsevier now provides authors with PDF proofs which can be annotated; for this you will need to download the free Adobe Reader, version 9 (or higher). Instructions on how to annotate PDF files will accompany the proofs (also given online). The exact system requirements are given at the Adobe site. If you do not wish to use the PDF annotations function, you may list the corrections (including replies to the Query Form) and return them to Elsevier in an e-mail. Please list your corrections quoting line number. If, for any reason, this is not possible, then mark the corrections and any other comments (including replies to the Query Form) on a printout of your proof and scan the pages and return via e-mail. Please use this proof only for checking the typesetting, editing, completeness and correctness of the text, tables and figures. Significant changes to the article as accepted for publication will only be considered at this stage with permission from the Editor. We will do everything possible to get your article published quickly and accurately. It is important to ensure that all corrections are sent back to us in one communication: please check carefully before replying, as inclusion of any subsequent corrections cannot be guaranteed. Proofreading is solely your responsibility.

Offprints
The corresponding author will, at no cost, receive a customized Share Link providing 50 days free access to the final published version of the article on ScienceDirect. The Share Link can be used for sharing the article via any communication channel, including email and social media. For an extra charge, paper offprints can be ordered via the offprint order form which is sent once the article is accepted for publication. Both corresponding and co-authors may order offprints at any time via Elsevier's Webshop. Corresponding authors who have published their article open access do not receive a Share Link as their final published version of the article is available open access on ScienceDirect and can be shared through the article DOI link.
AUTHOR INQUIRIES

Visit the Elsevier Support Center to find the answers you need. Here you will find everything from Frequently Asked Questions to ways to get in touch.

You can also check the status of your submitted article or find out when your accepted article will be published.
