CURRENT RESEARCH IN GREEN AND SUSTAINABLE CHEMISTRY

DESCRIPTION

Current Research in Green and Sustainable Chemistry (CRGSC) is a new primary research, gold open access journal from Elsevier. CRGSC publishes original papers and short communications (including viewpoints and perspectives) resulting from research in green and sustainable chemistry and associated disciplines. Review articles are also welcome, but only after consultation with the Editor.

Current Research in Green and Sustainable Chemistry is a peer-reviewed gold open access (OA) journal and upon acceptance all articles are permanently and freely available. It is a companion to the highly regarded review journal Current Opinion in Green and Sustainable Chemistry (2018 CiteScore 4.36) and is part of the Current Opinion and Research (CO+RE) suite of journals. All CO+RE journals leverage the Current Opinion legacy of editorial excellence, high-impact, and global reach to ensure they are a widely-read resource that is integral to scientists' workflows.

Current Research in Green and Sustainable Chemistry covers latest developments in: circular, sustainable, chemical processes and recycling; waste minimisation; renewable resources and sustainable materials, biorefineries and biomass valorisation; CO2 capture, storage and utilisation; green solvents; catalysis; green processes, technologies and engineering; green metrics; renewable energy and storage; life cycle assessment, and; new business models, ethics, legislation and economics. Criteria for publication are quality, novelty, and impact.

Current Research in Green and Sustainable Chemistry builds on Elsevier's reputation for excellence in scientific publishing and long-standing commitment to communicating reproducible chemistry research targeted at improving human health.

- **Expertise** - Editors and Editorial Board bring depth and breadth of expertise and experience to the journal.
- **Speed** - Submission and peer review is fast, and publication of final manuscripts is instantaneous.
- **Discoverability** - Articles get high visibility and maximum exposure on an industry-leading platform that reaches a vast global audience.

**Ethics in Publishing: General Statement**
The Editor(s) and Publisher of this Journal believe that there are fundamental principles underlying scholarly or professional publishing. For more information, please refer to https://www.elsevier.com/conflictsofinterest

ABSTRACTING AND INDEXING

EDITORIAL BOARD

Editor-in-Chief
Avtar S. Matharu, University of York, Green Chemistry Centre of Excellence, York, United Kingdom

Editorial Board Members
Yutaka Amao, Osaka Metropolitan University Graduate School of Science School of Science, Osaka, Japan
CO2 utilization, Biocatalyst, Photocatalysis
Fabio Arico, Ca' Foscari University Department of Environmental Sciences Informatics and Statistics, Venezia, Italy
Green Chemistry, Dialkyl Carbonates, bio-based platform chemicals, Chlorine-free chemistry
Thibault Cantat, French Alternative Energies and Atomic Energy Commission Saclay Center, Gif sur Yvette, France
Anshu Dandia, University of Rajasthan, Department of Chemistry, Jaipur, India
CO2 utilization, Biocatalyst, Photocatalysis
Mohammad Hadi Dehghani, Tehran University of Medical Sciences Department of Environmental Health Engineering, Tehran, Iran
Adsorption, Advanced oxidation process, Emerging pollutants, Photocatalytic degradation, Remediation technologies from water and wastewater, Micro pollutants, Green technologies for the decontamination of environment
Ana Rita C. Duarte, New University of Lisbon Department of Chemistry, Caparica, Portugal
Green Pharmaceutics, Alternative solvents, Deep eutectic Systems, Controlled drug delivery, Biomaterials
Fabrice Gallou, Novartis Pharma AG, Basel, Switzerland
chemistry,process research and development,sustainability,alternative media,chemistry in water
Glenn Hurst, University of York Department of Chemistry Green Chemistry Centre of Excellence, York, United Kingdom
Green chemistry education, Sustainability education, systems thinking
Anwar Jardine, University of Cape Town Department of Chemistry, Rondebosch, South Africa
Green and Sustainable Chemistry, Medicinal Chemistry
C. Oliver Kappe, University of Graz, Graz, Austria
Flow chemistry
Klaus Kümmerer, Leuphana University of Lüneburg Institute for Sustainable and Environmental Chemistry, Lüneburg, Germany
Environmental chemistry, Aquatic environmental chemistry, Benign by design, Green chemistry, Green pharmacy, Sustainable chemistry, Sustainable pharmacy, Resources (bio and metals)
Bradley P. Ladewig, Imperial College London, London, United Kingdom
Functional materials, Clean energy, Green chemistry, Flow chemistry, Photochemistry
Adam Lee, RMIT University, Melbourne, Victoria, Australia
Catalysis, Porous Solids, Green Chemistry, Nanomaterials, Surface Science
Bruce Lipshutz, University of California Santa Barbara, Santa Barbara, California, United States of America
Haichao Liu, Peking University College of Chemistry and Molecular Engineering, Beijing, China
Structure and composition of catalyst, Catalytic reaction kinetics, Catalytic reaction mechanism
Zhimin Liu, Institute of Chemistry Chinese Academy of Sciences, Beijing, China
Green Chemistry, CO2-involved synthesis, Chemicals and materials from Biomass, Green solvents including ionic liquids and supercritical fluids, Heterogeneous catalysis
Ekaterina S. Lokteva, Lomonosov Moscow State University, Moskva, Russian Federation
Heterogeneous catalysis, Green chemistry, Surface chemistry, Hydrogenation, Chlorinated wastes disposal, Environmental catalysis, Metal-containing catalysts, CO oxidation, Soot oxidation
Surinder MEHTA, Panjab University Department of Chemistry, Chandigarh, India
Nanochemistry, Colloidal Chemistry, Green Chemistry, drug delivery
Borhane Mahjoub, University of Sousse, Sousse, Tunisia
Wastewater treatment processes, Behaviour and fate of contaminants in Soils and Waters, Solid waste valorisation, Phytoremediation, Sustainable chemistry

**Anuradha Mishra**, Gautam Buddha University, School of Vocational Studies & Applied Sciences, Department of Applied Chemistry, Greater Noida, India

**Piergiuseppe Morone**, University of Rome La Sapienza, Roma, Italy

**Till Opatz**, Johannes Gutenberg University Mainz, Mainz, Germany

Natural products, Total synthesis, Method development, Green chemistry, Photochemistry

**Javier Remon**, Carboquimica Institute, Zaragoza, Spain

**Susan Schorr**, Helmholtz Center Berlin for Materials and Energy, Berlin, Germany

**Rakesh Sharma**, University of Delhi Department of Chemistry, New Delhi, India

Green Chemistry, Catalysis, Water Remediation

**Christian V. Stevens**, Ghent University Department of Chemistry, Gent, Belgium

Organic synthesis, Renewables, Flow chemistry

**Konstantinos Triantafyllidis**, Aristotle University of Thessaloniki Department of Chemistry Physical Chemistry Laboratory, Thessaloniki, Greece

Biomass Valorization, Heterogeneous Catalysis, Waste Recycling and Valorization, Green Chemistry, Micromesoporous Materials, Nanocomposites

**Nicholas J. Turner**, The University of Manchester Centre of Excellence for Biocatalysis Biotransformations and Biocatalytic Manufacture, Manchester, United Kingdom

Biocatalysis

**Chunming Xu**, China University of Petroleum Beijing College of Chemical Engineering, Chang Ping Qu, China

Heavy oil chemistry and processing technology, Petrochemical industry, Chemical reaction engineering

**Xianlai Zeng**, Tsinghua University, Beijing, China

Anthropogenic Circularity, Urban Mining, Metal Sustainability, Circular Economy

**Zhanrong Zhang**, Institute of Chemistry Chinese Academy of Sciences, Beijing, China

**Vânia G. Zuin Zeidler**, Federal University of São Carlos, São Carlos, Brazil

Green and Sustainable Analytical Chemistry (separation science), Chemicals from Biomass, Bioactive Natural Products, Green and Sustainable chemistry Education
GUIDE FOR AUTHORS

Types of article

Research Articles report the results of original research. The material must not have been previously published elsewhere. Research articles are usually up to 8,000 words, even though articles up to 10,000 words may be accepted if the type of analysis justifies this. Please select Article Type "Research Paper" when submitting your paper in Editorial Manager.

Letters to the Editor offering comment or useful critique on material published in the journal are welcomed. The decision to publish submitted letters rests purely with the Editor-in-Chief. It is hoped that the publication of such letters will permit an exchange of views which will be of benefit to both the journal and its readers.

Graphical Reviews

Graphical Reviews: A new way to publish your research are a short, structured article type, which primarily use illustrative schematic summaries to convey only key concepts and novel ideas on a major research interest. GRs present an opportunity to succinctly showcase your research contributions within a wider overview of recent developments within a field. GRs are designed to communicate information in a visually appealing representation of the current state of research on a specific topic. The overall message should be accessible to a broad scientific audience. GRs have a format of 3-5 (color) schemes/figures, ideally formatted as easily downloadable (PowerPoint) slides or the like, for use by readers for educational purposes. The text body should provide the reader with 'backbone' information and context, connecting the material presented in the figures. GRs cannot include unpublished data, new hypotheses, formal mathematical models, or meta-analysis.

GR article structure: Abstract: up to 250 words Body (exclusive of figure legends): up to 2000 words, double-spaced, Arial font, size 11 3-5 color schemes/figures summarizing the state of the specific topic covered. Each figure needs to be self-explanatory, including sufficient annotations to allow the readers to quickly grasp the content of the figure. Figure legends must be straight to the point, providing additional details which deepen the message of the figure itself. Please ensure that the reader, who may not be a direct expert in the field, can easily grasp the information provided. References: no more than 25 key articles that exemplify the most significant recent advances in the field. Illustrations: Authors are expected to use their own illustration resources. They may also make use of Elsevier's Illustration Services to ensure the best presentation of their images, in accordance with all technical requirements.

An example of a GR is available here

Review Articles

Current Research Review Article Type

Before submitting a review, you are encouraged to present a pre-submission proposal to the support center for approval. This proposal would typically include a cover letter explaining the purpose and originality of your review, a tentative abstract or outline, and a planned submission date. These are the criteria for consideration:

LengthTypically, authors choose to submit 2-4 figures and 22-32 pages of text (standard font size and double spacing) as a full-length review. We recommend 6,000-10,000 words but leave the length entirely up to you.

CoveragePlease feel free to decide the exact scope of your review and depth of coverage, keeping in mind that the overall message should be accessible to the broad readership of the journal. We would like to ask you to approach your review as a critical overview of the field, with a strong focus on current challenges and bottlenecks to future advances. Please make sure to adopt a mechanistic viewpoint where possible. The review must represent a fair coverage of the most recent advances and relevant approaches and accommodate different points of view. The scope of the review should stand out from other recently published reviews on the same theme. Please also feel free to highlight areas that you think deserve more attention from the scientific community. Finally, we would encourage you to include an 'outlook' paragraph at the end of your review that proposes the future direction you personally consider the field should take and the prospects for useful applications you might expect to see in the near future and beyond.
Figures and References
We strongly encourage the use of **summary illustrations** which may serve as an easy reference to readers to understand the message of the overall messages relayed in the review. We would like to discourage listing too many References, but only cite **directly relevant literature** published **in the recent years**. A primary research result used in a review should reference the original research article, not another review.

**Contact details for submission**
For questions, please visit our [Support Center](www.elsevier.com/locate/crgsc)

**Submission checklist**
You can use this list to carry out a final check of your submission before you send it to the journal for review. Please check the relevant section in this Guide for Authors for more details.

**Ensure that the following items are present:**

One author has been designated as the corresponding author with contact details:
- E-mail address
- Full postal address

All necessary files have been uploaded:
- **Manuscript:**
  - Include keywords
  - All figures (include relevant captions)
  - All tables (including titles, description, footnotes)
  - Ensure all figure and table citations in the text match the files provided
  - Indicate clearly if color should be used for any figures in print
- **Graphical Abstracts / Highlights files** (where applicable)
- **Supplemental files** (where applicable)

Further considerations
- Manuscript has been 'spell checked' and 'grammar checked'
- All references mentioned in the Reference List are cited in the text, and vice versa
- Permission has been obtained for use of copyrighted material from other sources (including the Internet)
- A competing interests statement is provided, even if the authors have no competing interests to declare
- Journal policies detailed in this guide have been reviewed
- Referee suggestions and contact details provided, based on journal requirements

For further information, visit our [Support Center](www.elsevier.com/locate/crgsc).

**BEFORE YOU BEGIN**

**Ethics in publishing**
Please see our information on Ethics in publishing.

**Declaration of competing interest**
Corresponding authors, on behalf of all the authors of a submission, must disclose any financial and personal relationships with other people or organizations that could inappropriately influence (bias) their work. Examples of potential conflicts of interest include employment, consultancies, stock ownership, honoraria, paid expert testimony, patent applications/registrations, and grants or other funding. All authors, including those without competing interests to declare, should provide the relevant information to the corresponding author (which, where relevant, may specify they have nothing to declare). Corresponding authors should then use [this tool](www.elsevier.com/locate/crgsc) to create a shared statement and upload to the submission system at the Attach Files step. **Please do not convert the .docx template to another file type. Author signatures are not required.**

**Submission declaration**
Submission of an article implies that the work described has not been published previously (except in the form of an abstract, a published lecture or academic thesis, see 'Multiple, redundant or concurrent publication' for more information), that it is not under consideration for publication elsewhere, that its publication is approved by all authors and tacitly or explicitly by the responsible authorities where
the work was carried out, and that, if accepted, it will not be published elsewhere in the same form, in English or in any other language, including electronically without the written consent of the copyright-holder.

Preprints
Please note that preprints can be shared anywhere at any time, in line with Elsevier's sharing policy. Sharing your preprints e.g. on a preprint server will not count as prior publication (see 'Multiple, redundant or concurrent publication' for more information).

Preprint posting on SSRN
In support of Open Science, this journal offers its authors a free preprint posting service. Preprints provide early registration and dissemination of your research, which facilitates early citations and collaboration.

During submission to Editorial Manager, you can choose to release your manuscript publicly as a preprint on the preprint server SSRN once it enters peer-review with the journal. Your choice will have no effect on the editorial process or outcome with the journal. Please note that the corresponding author is expected to seek approval from all co-authors before agreeing to release the manuscript publicly on SSRN.

You will be notified via email when your preprint is posted online and a Digital Object Identifier (DOI) is assigned. Your preprint will remain globally available free to read whether the journal accepts or rejects your manuscript.

For more information about posting to SSRN, please consult the SSRN Terms of Use and FAQs.

Use of inclusive language
Inclusive language acknowledges diversity, conveys respect to all people, is sensitive to differences, and promotes equal opportunities. Content should make no assumptions about the beliefs or commitments of any reader; contain nothing which might imply that one individual is superior to another on the grounds of age, gender, race, ethnicity, culture, sexual orientation, disability or health condition; and use inclusive language throughout. Authors should ensure that writing is free from bias, stereotypes, slang, reference to dominant culture and/or cultural assumptions. We advise to seek gender neutrality by using plural nouns ("clinicians, patients/clients") as default/wherever possible to avoid using "he, she," or "he/she." We recommend avoiding the use of descriptors that refer to personal attributes such as age, gender, race, ethnicity, culture, sexual orientation, disability or health condition unless they are relevant and valid. When coding terminology is used, we recommend to avoid offensive or exclusionary terms such as "master", "slave", "blacklist" and " whitelist". We suggest using alternatives that are more appropriate and (self-) explanatory such as "primary", "secondary", "blocklist" and "allowlist". These guidelines are meant as a point of reference to help identify appropriate language but are by no means exhaustive or definitive.

Author contributions
For transparency, we encourage authors to submit an author statement file outlining their individual contributions to the paper using the relevant CRediT roles: Conceptualization; Data curation; Formal analysis; Funding acquisition; Investigation; Methodology; Project administration; Resources; Software; Supervision; Validation; Visualization; Roles/Writing - original draft; Writing - review & editing. Authorship statements should be formatted with the names of authors first and CRediT role(s) following. More details and an example.

Changes to authorship
Authors are expected to consider carefully the list and order of authors before submitting their manuscript and provide the definitive list of authors at the time of the original submission. Any addition, deletion or rearrangement of author names in the authorship list should be made only before the manuscript has been accepted and only if approved by the journal Editor. To request such a change, the Editor must receive the following from the corresponding author: (a) the reason for the change in author list and (b) written confirmation (e-mail, letter) from all authors that they agree with the addition, removal or rearrangement. In the case of addition or removal of authors, this includes confirmation from the author being added or removed.
Only in exceptional circumstances will the Editor consider the addition, deletion or rearrangement of authors after the manuscript has been accepted. While the Editor considers the request, publication of the manuscript will be suspended. If the manuscript has already been published in an online issue, any requests approved by the Editor will result in a corrigendum.

**Copyright**
Upon acceptance of an article, authors will be asked to complete a 'License Agreement' (see more information on this). Permitted third party reuse of open access articles is determined by the author's choice of user license.

**Author rights**
As an author you (or your employer or institution) have certain rights to reuse your work. More information.

*Elsevier supports responsible sharing*
Find out how you can share your research published in Elsevier journals.

**Role of the funding source**
You are requested to identify who provided financial support for the conduct of the research and/or preparation of the article and to briefly describe the role of the sponsor(s), if any, in study design; in the collection, analysis and interpretation of data; in the writing of the report; and in the decision to submit the article for publication. If the funding source(s) had no such involvement, it is recommended to state this.

**Open access**
Please visit our Open Access page for more information.

*Elsevier Researcher Academy*
Researcher Academy is a free e-learning platform designed to support early and mid-career researchers throughout their research journey. The "Learn" environment at Researcher Academy offers several interactive modules, webinars, downloadable guides and resources to guide you through the process of writing for research and going through peer review. Feel free to use these free resources to improve your submission and navigate the publication process with ease.

**Language (usage and editing services)**
Please write your text in good English (American or British usage is accepted, but not a mixture of these). Authors who feel their English language manuscript may require editing to eliminate possible grammatical or spelling errors and to conform to correct scientific English may wish to use the English Language Editing service available from Elsevier's Author Services.

**Submission**
Our online submission system guides you stepwise through the process of entering your article details and uploading your files. The system converts your article files to a single PDF file used in the peer-review process. Editable files (e.g., Word, LaTeX) are required to typeset your article for final publication. All correspondence, including notification of the Editor's decision and requests for revision, is sent by e-mail.

**Suggesting reviewers**
Please submit the names and institutional e-mail addresses of several potential reviewers.

You should not suggest reviewers who are colleagues, or who have co-authored or collaborated with you during the last three years. Editors do not invite reviewers who have potential competing interests with the authors. Further, in order to provide a broad and balanced assessment of the work, and ensure scientific rigor, please suggest diverse candidate reviewers who are located in different countries/regions from the author group. Also consider other diversity attributes e.g. gender, race and ethnicity, career stage, etc. Finally, you should not include existing members of the journal's editorial team, of whom the journal are already aware.

Note: the editor decides whether or not to invite your suggested reviewers.

**PREPARATION**

**Queries**
For questions about the editorial process (including the status of manuscripts under review) or for technical support on submissions, please visit our Support Center.
**Figures and tables embedded in text**
Please ensure the figures and the tables included in the single file are placed next to the relevant text in the manuscript, rather than at the bottom or the top of the file. The corresponding caption should be placed directly below the figure or table.

**Peer review**
This journal operates a single anonymized review process. All contributions are typically sent to a minimum of two independent expert reviewers to assess the scientific quality of the paper. The Editor is responsible for the final decision regarding acceptance or rejection of articles. The Editor's decision is final. Editors are not involved in decisions about papers which they have written themselves or have been written by family members or colleagues or which relate to products or services in which the editor has an interest. Any such submission is subject to all of the journal's usual procedures, with peer review handled independently of the relevant editor and their research groups. More information on types of peer review.

**Appeals Statement**
If you believe that the editorial decision about your manuscript was based on factual errors, you can contact us at our Support Center. Please state the manuscript number and describe in detail why you believe the decision was erroneous. Your appeal will be evaluated by the Editor-in-Chief, who will revisit the previous decision in light of your comments. Please note that we do not allow multiple appeals: a second decision will be final.

**Use of word processing software**
It is important that the file be saved in the native format of the word processor used. The text should be in single-column format. Keep the layout of the text as simple as possible. Most formatting codes will be removed and replaced on processing the article. In particular, do not use the word processor's options to justify text or to hyphenate words. However, do use bold face, italics, subscripts, superscripts etc. When preparing tables, if you are using a table grid, use only one grid for each individual table and not a grid for each row. If no grid is used, use tabs, not spaces, to align columns. The electronic text should be prepared in a way very similar to that of conventional manuscripts (see also the Guide to Publishing with Elsevier). Note that source files of figures, tables and text graphics will be required whether or not you embed your figures in the text. See also the section on Electronic artwork.

To avoid unnecessary errors you are strongly advised to use the 'spell-check' and 'grammar-check' functions of your word processor.

**Article structure**

**Subdivision - numbered sections**
Divide your article into clearly defined and numbered sections. Subsections should be numbered 1.1 (then 1.1.1, 1.1.2, ...), 1.2, etc. (the abstract is not included in section numbering). Use this numbering also for internal cross-referencing: do not just refer to 'the text'. Any subsection may be given a brief heading. Each heading should appear on its own separate line.

**Introduction**
State the objectives of the work and provide an adequate background, avoiding a detailed literature survey or a summary of the results.

**Material and methods**
Provide sufficient details to allow the work to be reproduced by an independent researcher. Methods that are already published should be summarized, and indicated by a reference. If quoting directly from a previously published method, use quotation marks and also cite the source. Any modifications to existing methods should also be described.

**Results**
Results should be clear and concise.

**Discussion**
This should explore the significance of the results of the work, not repeat them. A combined Results and Discussion section is often appropriate. Avoid extensive citations and discussion of published literature.

**Conclusions**
The main conclusions of the study may be presented in a short Conclusions section, which may stand alone or form a subsection of a Discussion or Results and Discussion section.
Appendices
If there is more than one appendix, they should be identified as A, B, etc. Formulae and equations in appendices should be given separate numbering: Eq. (A.1), Eq. (A.2), etc.; in a subsequent appendix, Eq. (B.1) and so on. Similarly for tables and figures: Table A.1; Fig. A.1, etc.

Essential title page information
• **Title.** Concise and informative. Titles are often used in information-retrieval systems. Avoid abbreviations and formulae where possible.
• **Author names and affiliations.** Please clearly indicate the given name(s) and family name(s) of each author and check that all names are accurately spelled. You can add your name between parentheses in your own script behind the English transliteration. Present the authors' affiliation addresses (where the actual work was done) below the names. Indicate all affiliations with a lower-case superscript letter immediately after the author's name and in front of the appropriate address. Provide the full postal address of each affiliation, including the country name and, if available, the e-mail address of each author.
• **Corresponding author.** Clearly indicate who will handle correspondence at all stages of refereeing and publication, also post-publication. This responsibility includes answering any future queries about Methodology and Materials. **Ensure that the e-mail address is given and that contact details are kept up to date by the corresponding author.**
• **Present/permanent address.** If an author has moved since the work described in the article was done, or was visiting at the time, a 'Present address' (or 'Permanent address') may be indicated as a footnote to that author's name. The address at which the author actually did the work must be retained as the main, affiliation address. Superscript Arabic numerals are used for such footnotes.

Highlights
Highlights are optional yet highly encouraged for this journal, as they increase the discoverability of your article via search engines. They consist of a short collection of bullet points that capture the novel results of your research as well as new methods that were used during the study (if any). Please have a look at the examples here: example Highlights.

Highlights should be submitted in a separate editable file in the online submission system. Please use 'Highlights' in the file name and include 3 to 5 bullet points (maximum 85 characters, including spaces, per bullet point).

Abstract
A concise and factual abstract is required. The abstract should state briefly the purpose of the research, the principal results and major conclusions. An abstract is often presented separately from the article, so it must be able to stand alone. For this reason, References should be avoided, but if essential, then cite the author(s) and year(s). Also, non-standard or uncommon abbreviations should be avoided, but if essential they must be defined at their first mention in the abstract itself.

Graphical abstract
Although a graphical abstract is optional, its use is encouraged as it draws more attention to the online article. The graphical abstract should summarize the contents of the article in a concise, pictorial form designed to capture the attention of a wide readership. Graphical abstracts should be submitted as a separate file in the online submission system. Image size: Please provide an image with a minimum of 531 × 1328 pixels (h × w) or proportionally more. The image should be readable at a size of 5 × 13 cm using a regular screen resolution of 96 dpi. Preferred file types: TIFF, EPS, PDF or MS Office files. You can view Example Graphical Abstracts on our information site. Authors can make use of Elsevier's Illustration Services to ensure the best presentation of their images and in accordance with all technical requirements.

Keywords
Immediately after the abstract, provide a maximum of 6 keywords, using American spelling and avoiding general and plural terms and multiple concepts (avoid, for example, 'and', 'of'). Be sparing with abbreviations: only abbreviations firmly established in the field may be eligible. These keywords will be used for indexing purposes.

Abbreviations
Define abbreviations that are not standard in this field in a footnote to be placed on the first page of the article. Such abbreviations that are unavoidable in the abstract must be defined at their first mention there, as well as in the footnote. Ensure consistency of abbreviations throughout the article.
Acknowledgements
Collate acknowledgements in a separate section at the end of the article before the references and do not, therefore, include them on the title page, as a footnote to the title or otherwise. List here those individuals who provided help during the research (e.g., providing language help, writing assistance or proof reading the article, etc.).

Formatting of funding sources
List funding sources in this standard way to facilitate compliance to funder’s requirements:

Funding: This work was supported by the National Institutes of Health [grant numbers xxxx, yyyy]; the Bill & Melinda Gates Foundation, Seattle, WA [grant number zzzz]; and the United States Institutes of Peace [grant number aaaa].

It is not necessary to include detailed descriptions on the program or type of grants and awards. When funding is from a block grant or other resources available to a university, college, or other research institution, submit the name of the institute or organization that provided the funding.

If no funding has been provided for the research, it is recommended to include the following sentence:

This research did not receive any specific grant from funding agencies in the public, commercial, or not-for-profit sectors.

Units
Follow internationally accepted rules and conventions: use the international system of units (SI). If other units are mentioned, please give their equivalent in SI.

Math formulae
Please submit math equations as editable text and not as images. Present simple formulae in line with normal text where possible and use the solidus (/) instead of a horizontal line for small fractional terms, e.g., X/Y. In principle, variables are to be presented in italics. Powers of e are often more conveniently denoted by exp. Number consecutively any equations that have to be displayed separately from the text (if referred to explicitly in the text).

Footnotes
Footnotes should be used sparingly. Number them consecutively throughout the article. Many word processors can build footnotes into the text, and this feature may be used. Otherwise, please indicate the position of footnotes in the text and list the footnotes themselves separately at the end of the article. Do not include footnotes in the Reference list.

Artwork
Electronic artwork
General points
• Make sure you use uniform lettering and sizing of your original artwork.
• Embed the used fonts if the application provides that option.
• Aim to use the following fonts in your illustrations: Arial, Courier, Times New Roman, Symbol, or use fonts that look similar.
• Number the illustrations according to their sequence in the text.
• Use a logical naming convention for your artwork files.
• Provide captions to illustrations separately.
• Size the illustrations close to the desired dimensions of the published version.
• Submit each illustration as a separate file.
• Ensure that color images are accessible to all, including those with impaired color vision.

A detailed guide on electronic artwork is available.
You are urged to visit this site; some excerpts from the detailed information are given here.

Formats
If your electronic artwork is created in a Microsoft Office application (Word, PowerPoint, Excel) then please supply ‘as is’ in the native document format. Regardless of the application used other than Microsoft Office, when your electronic artwork is finalized, please ‘Save as’ or convert the images to one of the following formats (note the resolution requirements for line drawings, halftones, and line/halftone combinations given below):
EPS (or PDF): Vector drawings, embed all used fonts.
TIFF (or JPEG): Color or grayscale photographs (halftones), keep to a minimum of 300 dpi.
TIFF (or JPEG): Bitmapped (pure black & white pixels) line drawings, keep to a minimum of 1000 dpi.  
TIFF (or JPEG): Combinations bitmapped line/half-tone (color or grayscale), keep to a minimum of 500 dpi.

**Please do not:**
- Supply files that are optimized for screen use (e.g., GIF, BMP, PICT, WPG); these typically have a low number of pixels and limited set of colors;
- Supply files that are too low in resolution;
- Submit graphics that are disproportionately large for the content.

**Color artwork**
Please make sure that artwork files are in an acceptable format (TIFF (or JPEG), EPS (or PDF) or MS Office files) and with the correct resolution. If, together with your accepted article, you submit usable color figures then Elsevier will ensure, at no additional charge, that these figures will appear in color online (e.g., ScienceDirect and other sites). Further information on the preparation of electronic artwork.

**Illustration services**
Elsevier’s Author Services offers Illustration Services to authors preparing to submit a manuscript but concerned about the quality of the images accompanying their article. Elsevier’s expert illustrators can produce scientific, technical and medical-style images, as well as a full range of charts, tables and graphs. Image ‘polishing’ is also available, where our illustrators take your image(s) and improve them to a professional standard. Please visit the website to find out more.

**Figure captions**
Ensure that each illustration has a caption. Supply captions separately, not attached to the figure. A caption should comprise a brief title (not on the figure itself) and a description of the illustration. Keep text in the illustrations themselves to a minimum but explain all symbols and abbreviations used.

**Text graphics**
Text graphics may be embedded in the text at the appropriate position. See further under Electronic artwork.

**Tables**
Please submit tables as editable text and not as images. Tables can be placed either next to the relevant text in the article, or on separate page(s) at the end. Number tables consecutively in accordance with their appearance in the text and place any table notes below the table body. Be sparing in the use of tables and ensure that the data presented in them do not duplicate results described elsewhere in the article. Please avoid using vertical rules and shading in table cells.

**References**

**Citation in text**
Please ensure that every reference cited in the text is also present in the reference list (and vice versa). Any references cited in the abstract must be given in full. Unpublished results and personal communications are not recommended in the reference list, but may be mentioned in the text. If these references are included in the reference list they should follow the standard reference style of the journal and should include a substitution of the publication date with either ‘Unpublished results’ or ‘Personal communication’. Citation of a reference as ‘in press’ implies that the item has been accepted for publication.

**Reference links**
Increased discoverability of research and high quality peer review are ensured by online links to the sources cited. In order to allow us to create links to abstracting and indexing services, such as Scopus, CrossRef and PubMed, please ensure that data provided in the references are correct. Please note that incorrect surnames, journal/book titles, publication year and pagination may prevent link creation. When copying references, please be careful as they may already contain errors. Use of the DOI is highly encouraged.

A DOI is guaranteed never to change, so you can use it as a permanent link to any electronic article. An example of a citation using DOI for an article not yet in an issue is: VanDecar J.C., Russo R.M., James D.E., Ambeh W.B., Franke M. (2003). Aseismic continuation of the Lesser Antilles slab beneath northeastern Venezuela. Journal of Geophysical Research, https://doi.org/10.1029/2001JB000884. Please note the format of such citations should be in the same style as all other references in the paper.
Web references
As a minimum, the full URL should be given and the date when the reference was last accessed. Any further information, if known (DOI, author names, dates, reference to a source publication, etc.), should also be given. Web references can be listed separately (e.g., after the reference list) under a different heading if desired, or can be included in the reference list.

Data references
This journal encourages you to cite underlying or relevant datasets in your manuscript by citing them in your text and including a data reference in your Reference List. Data references should include the following elements: author name(s), dataset title, data repository, version (where available), year, and global persistent identifier. Add [dataset] immediately before the reference so we can properly identify it as a data reference. The [dataset] identifier will not appear in your published article.

References in a special issue
Please ensure that the words 'this issue' are added to any references in the list (and any citations in the text) to other articles in the same Special Issue.

Journal abbreviations source
Journal names should be abbreviated according to the List of Title Word Abbreviations.

Video
Elsevier accepts video material and animation sequences to support and enhance your scientific research. Authors who have video or animation files that they wish to submit with their article are strongly encouraged to include links to these within the body of the article. This can be done in the same way as a figure or table by referring to the video or animation content and noting in the body text where it should be placed. All submitted files should be properly labeled so that they directly relate to the video file's content. In order to ensure that your video or animation material is directly usable, please provide the file in one of our recommended file formats with a preferred maximum size of 150 MB per file, 1 GB in total. Video and animation files supplied will be published online in the electronic version of your article in Elsevier Web products, including ScienceDirect. Please supply 'stills' with your files: you can choose any frame from the video or animation or make a separate image. These will be used instead of standard icons and will personalize the link to your video data. For more detailed instructions please visit our video instruction pages. Note: since video and animation cannot be embedded in the print version of the journal, please provide text for both the electronic and the print version for the portions of the article that refer to this content.

Data visualization
Include interactive data visualizations in your publication and let your readers interact and engage more closely with your research. Follow the instructions here to find out about available data visualization options and how to include them with your article.

Supplementary material
Supplementary material such as applications, images and sound clips, can be published with your article to enhance it. Submitted supplementary items are published exactly as they are received (Excel or PowerPoint files will appear as such online). Please submit your material together with the article and supply a concise, descriptive caption for each supplementary file. If you wish to make changes to supplementary material during any stage of the process, please make sure to provide an updated file. Do not annotate any corrections on a previous version. Please switch off the 'Track Changes' option in Microsoft Office files as these will appear in the published version.

AFTER ACCEPTANCE
Proofs
One set of page proofs (as PDF files) will be sent by e-mail to the corresponding author (if we do not have an e-mail address then paper proofs will be sent by post) or a link will be provided in the e-mail so that authors can download the files themselves. To ensure a fast publication process of the article, we kindly ask authors to provide us with their proof corrections within two days. Elsevier now provides authors with PDF proofs which can be annotated; for this you will need to download the free Adobe Reader, version 9 (or higher). Instructions on how to annotate PDF files will accompany the proofs (also given online). The exact system requirements are given at the Adobe site. If you do not wish to use the PDF annotations function, you may list the corrections (including replies to the Query Form) and return them to Elsevier in an e-mail. Please list your corrections quoting line number. If, for any reason, this is not possible, then mark the corrections and any other comments (including replies to the Query Form) on a printout of your proof and scan the pages and return via e-
mail. Please use this proof only for checking the typesetting, editing, completeness and correctness of the text, tables and figures. Significant changes to the article as accepted for publication will only be considered at this stage with permission from the Editor. We will do everything possible to get your article published quickly and accurately. It is important to ensure that all corrections are sent back to us in one communication: please check carefully before replying, as inclusion of any subsequent corrections cannot be guaranteed. Proofreading is solely your responsibility.

**Offprints**
The corresponding author will be notified and receive a link to the published version of the open access article on ScienceDirect. This link is in the form of an article DOI link which can be shared via email and social networks. For an extra charge, paper offprints can be ordered via the offprint order form which is sent once the article is accepted for publication. Both corresponding and co-authors may order offprints at any time via Elsevier's Author Services.

**AUTHOR INQUIRIES**
Visit the Elsevier Support Center to find the answers you need. Here you will find everything from Frequently Asked Questions to ways to get in touch.
You can also check the status of your submitted article or find out when your accepted article will be published.
